Kinnock condemns miners' contacts with Libyan unions

By Anthony Bevins, Political Correspondent

Mrs Margaret Thatcher and Mr Neil Kinnock yesterday united in condemnation of contacts between the National Union of Mineworkers and Colonel Gaddafi, and the possibility that Libyan cash might be donated to the strikers' cause.

Mr Arthur Scargill, the miners' president, said in a defiant interview on BBC radio [page 2] that there was a clear distinction to be made between Libyan trades unionists and the Libyan Government.

"As far as we are concerned", he said, "we would welcome financial assistance from any-

But Mr Kinnock appeared to have no doubts that the contact had been made between the union and Colonel Gaddafi. Support for that view came from Libyan television film, shown on British television last night, of the NUM representative exchanging warm embraces and handshakes with the Libyan leader, followed by friendly discussion.

Without even consulting the NUM leadership. Mr Kinnock issued a statement "By any measure of political, civil, rade union or human rights, the-Gaddafi regime is vile.

"Any offers from them would be an insult to everything the British labour movement stands for. If such offers are ever made, then of course they must and will be rejected."

Authoritative Whitehall sources said that the Prime ports" Minister's initial reaction to The Sunday Times report; which gave a detailed account

of how meetings were held in Paris and Tripoli, had been one

She had thought, at first, that it could not be true, that Mr Scargill and his senior colleagues could not possibly have been so foolish. As initial confirmation came in, her attitude had then changed to amazement, topped by con-

tempt and anger.
Mrs Thatcher felt contempt and anger for any group that could forge links with a regime which had been responsible for the killing of Police Constable Yvonne Fletcher and for the arrest, without charge or trial, of innocent British nationals.

Mr. Peter Walker, Secretary of Mr. Peter Walker, Secretary of State for Energy, said that Mr Scargill had admitted that he had sought money from the Russians and the Hungarians as well as the Libyans. "I would just note: you must always judge a man by his friends."

He dismissed Mr Scargill's attempt to draw a line between the Gaddafi regime and Libyan.

the Gaddafi regime and Libyan

trade unionists.

He pointed to The Sunday Times statement that the initial Paris contact between Mr Scargill and his union's chief executive, Mr Roger Windsor, had not been made by a trades unionist but by Mr Salem Ibrahim, described as "the trusted confident of the Libyan leader who negotiates and arranges the financial payments to the disparate groups and causes which Gaddair sup-

reported that in a meeting with Colonely Gaddafi he had spoken of 80,000 oppressed strikers. 30,000 injured and 8,000 imprisoned in British

The agancy report said: "The envoy added that he left miners' families a target of hunger and hardship, reaching the extent of their inability to feed their children or bury their dead."

Mr Scargili said yesterday: Two no idea what happened between Mr Windsor and the leader of Libya . . . I can't know of all the details of what was said from one person to

The extent of the embarrassment caused by the affair was measured by Mr Kinnock's statement, and the knowledge that intense political capital will be made out of the matter.

The Labour leader's intervention was in marked contrast to that of a number of Labour backbenchers, who said that the Government traded and dealt with any number of repugnant regimes, and they did not object to the hard-pressed NUM receiving aid from any quarter,

Mr Kinnock's eagerness to leap into the Libyan controversy, without the courtesy of a prior call to Mr Scargill, will be seen at Westminster as part of an exercise to distance the Labour Party from Mr Scargill and what is becoming a -personal strike.

Mr David Steel, the Liberal Mr. Windsor arrived in leader, said that the "Libya Tripoli a week ago and the connextion" had exposed the official Libyan news agency miners' strike as political.

Travellers may still get cheap US By Michael Baily, Transport Editor

Passengers from Britain may be able to take cheap flights to the United States from Thursday, even though the Government has declared the cut-price winter fares of big airlines illegal. But airlines allowing them to do so face prosecution and may even have their route licence withdrawn.

Squads of specially-recruited inspectors from the Civil Avaition Authority will be on duty at Heathrow and Gatwick to check passengers' tickets at the terminal. But they will take

punish airlines, such as British Airways, British Caledonian, Pan American, and TWA, who have sold more than 100,000 cheap tickets in good faith, is not yet clear. But there seems. little hope that the US will give the guarantees the British Government wants as a price of

making the cheap fares legal

traveller," the Department of ban £40 cuts in trans Atlantic Transport said yesterday. "It is fares. But he says the Anglo-US between us and the airlines." "Bermuda 2" aviation agree-Just how far the British ment has become "almost Government is prepared to unworkable" and a tough stance by Britain is needed to get a revision.

> But there is little sign, however, that the guarantees Britain wants will be forthcoming, especially in the short term during the run-up to a presidential election.

quickly, if at all.

no action against passengers holding the tickets that have retary of State for Transport, by the Department of Justice now been declared invalid.

"We are not seeking to wage war against the individual clearly exasperated at having to US experts say that while it

which could cost BA and B.-Cal up to £1,000m.

Bermuda 2 is an "executive agreement" and does not override the US civil courts. Only a formal treaty would provide the kind of exemption Britain wants, experts say and that could not be put together

But with Mr Ridley clearly embarked on a confrontation course, something has to give, and his department is clear that it must be the US. "The problem is of their making and it is for them to find a solution"

Profits expected, page 4

Plodding through his un-changing fact-free speeches of optimism and hope, Mr Reagan told young people in Washington (he campaigns close to home as much as possible): "I just have to say your generation really sparkles. I've seen en-

get high on America." Mr Mondale was encouraged yesterday when he received the endorsement of The New York Times. A leading article said Mr Reagan had done a good job in some ways. The country was better off. But he should not be reelected because he had paid for the recovery and his popularity with the pain of

millions of people thrown out of work and hundreds of billions of dollars the Government must borrow in the next four years. a spokesman said. .

Mr Scargill's interview, on the BBC radio World this Weekend programme, began with an attack on Mr Neil Kinnock, the Labour Leader, link, but he yesterday denied knowledge of the affair or whether cash had been ordered who had earlier issued a But he did say he knew that Mr Roger Windsor, the NUM's chief executive, had statement saying that any offers of assistance from the Gaddafi regime would have to be NUM's chief executive, had been holding secret talks with the Libyan government. "I was told over the phone by a friend that Mr Windsor or a man resembling him had been pictured in the Libyan newsrejected.

The NUM president said:
"Mr Kinnock would have been better advised contacting me first to find out the facts. It is not true that made any approach to Libya. In fact, quite the opposite. What happened was that when we visited Paris to arrange for a food convoy from the French working class to the British miners who are on strike, we must require the property of the

British miners who are on strike, we met several delegations who were there, including one from Hungary, one from Libya and one from the Soviet Union.

An invitation was received for the sherest setzetary of the National Union of Mineworkers to go to Prague to speak to an international miners' conference and one to go to miners' conference and one to go to Libya, to our chief executive officer. At their expense - there was no expense to the NUM - and simply to state the case of the miners' union to trade unionists in Libya."

Mr Gordon Clough, the interviewer, asked: "And what response did you get from the Libyan trades Scargill: "We have no response whatsoever so far. We haven't had

one single penny. I stress to you that we did not make an approach to the Libyan Government, and nor did we go over for that purpose. "All of the national officials of the

NUM knew of the visit; there was nothing secretive about it whatsoever. Indeed, when we were asked if Mr Windsor could go over and explain the position of the British miners to the trade unionists in Libya, we said: "Yes, of course, we've already contacted trade unionists all over the world and we have received invitations and responded positively to those in at responded positively to those in at least 50 countries".

Mr Clough then pointed out that Mr Windsor had also talked with Colonel Gaddafi, and asked: "What happened in the conversation between Mr Windsor and Colonel Gaddafi, which earlier on this morning you were saying you weren't even sine had happened."

Scargill: "Well, I've no idea what happened between Mr Windsor and the leader of Libya. All I can say is that if a representative of the National Union of Mineworkers visits any country anywhere in the world it is not unusual for the leader of that country to request, for example, an interview or a meeting."

Clough: "Mr Scargill, as president of the NUM, you are telling me that you don't know what passed between your chief executive and the Libyan head of state?"

Scargilt "What I am telling you is that I can't know all the details of what was said from one person to another. All I know is that Mr Windsor certainly did not ask to meet the leader of Libya and simply said the same things to him so far as I am aware, as he said to the trade unionists in Libya; and that was the current situation of the mining dispute in Britain.

"He did not discuss anything other than that, and that was the reason he went there."

Clough: "Would you be happy. Mr Scargill, as a socialist, as a trade union leader in Britain, to accept money from Libya – Libyan trade

unions are not entirely separated from the Government - from the state which was responsible for the murder of policewoman Fletcher and for the murder of Libyan dissidents abroad? Are you entirely happy that your public image has not been damaged by this contact with the Libyan regime?" Scargill: Let me make one thing absolutely clear. Let's distinguish

absolutely clear. Let's distinguish-between trade unionists in one country and government policy. You wouldn't, for example, associ-ate Arthur Scargil's views with Margaret Thatcher's. As far as we are concerned we would welcome assistance from trade unionists anywhere, while miners, their families and their children are suffering terrible hardship as a result of this Government's policy in of this Government's policy in trying to close our pits and destroy our communities."

Clough: "And you genuinely think that any cheque that you get from the Libyan trade unionists is not financed by the Libyan Govern-Scargill: "And what gives you the right to say anything other?"

Clough: "I think we'd better leave it

Scargill: "Why? You're not only interviewing me, you're making assertions that you can't back up by any facts whatsoever and I think that's really deplorable on the part of a BBC interviewer."

Clough: "I could refer you, Mr Scargill, to the human rights handbook which says that trade unions in Libya are under constant pressure from the Government to merge the national socialism with the Islamic state."

Scargill: "Well, what you're saying is, of course, that trade unions are under pressure. That obviously suggests that what I am saying to you is correct and that what you have been suggesting to

Clough: "Mr Scargill, thank you

The leader expressed sympathy with the striking workers who suffer from abuse and exploitation at the hand of the exploiting ruling class in Britain. He also conveyed to the NUM envoy Jamahiriya's solidarity

The NUM envoy explained the hardship of the British miners, whose strike now entered its eight month and continues because of the Thatcher Government's obstinacy, its rejection of the workers' demands and closure of 20 pits, which led to the dismissal of 20,000 miners.

The envoy also talked about the police daily repressive actions against the striking workers, explaining that the objective behind the strike, which is the longest in British history, is to reinstate miners

whose existence was wholly unknown to scholars. The painting (left) depicts Ann Carr, Countess of Bedford (1617-1684) at the age of 22, holding a white rose in her

The appeal has been brought by Mr Edward Gunnell, aged 53, over his recall to prison two years after he was released on licence. He had served 17 years of life sentences for four offences of rape and two of

attempted rape. The case raises the question of whether the board should be governed by the rules of natural ustice as would a judicial

appeal body.
Mr Gunnell, who is mentally handicapped was recalled to prison on the Home Secretary's direction, despite complying with conditions of his licence, because of "feelings of suspicion and unease" arising from two

incidents.
When Mr Gungell's case came before the High Court it was said that the licence was authorized because of the similarity between the incidents and the manner in which he had committed the original offences. He was later told this by an

assistant governor.

But Mr Gunnell contends that under the rules of natural justice he should have have been given reasons in writing and that he had a right to see the reports before the Parole Board when it made its decision

so he could answer them. But the High Court rejected The Home Secretary. Mr his case. Natural justice rules. did not apply to the board, it said, as it was performing an administrative function and not

'Dying' village gets say in its future

searchers established that villagers did-want new housing in Curry Mallet after all, including that intended in the original duchy proposal. They also wanted special housing for the old and cheaper homes for local people. They were warried about the poor level of public services and about

level of public services and about shopping and transport. They also called for improved employment opportunities for women and young people and complained about the lack of recreation and sports facilities. Some were worried about the loss of community spirit and the fact that the

village was almost "dying" through the loss of young people.

The researchers decided that most of the villagers looked to new development as a means of encouraging a more balanced population. They found that many were unclear as to the role of the duchy, some seeing its influence as minimal, others as dominant and beyond challenge

There has been little developm since the duchy obtained the parish more than 500 years ago. It still owns most of the 1,500 acres of land, farmhouses and buildings and tied

In the years between the two world n-intensive farms and associated crafts meant local jobs for most of the then 314 inhabitants.

But subsequently the village, which has one public house, one shop and two buses a week, has slipped into decline.
There is only a handful of jobs left on
the land and a disproportionately high number of elderly and retired people.

The report recommends that the duchy goes ahead with its original plans for housing and also considers releasing other land for cheap homes and accommodation for the elderly. It also suggests that the duchy makes houses available through mortgage and co-ownership schemes for the less well-off.

retaries are so dissatisfied that

financial savings are wasted.

hour. But she had been temporarily allowed to work for three months starting at 8.30am and finishing at 4.30pm with half an hour for lunch, giving her the same number of hours

worked.

The council's chief executive Mr John Lowton, rec-ommended that she should be allowed to continue with that affect her department's work, But the council's staffing sub-committee refused to support the move because it set a precedent and went against the council's policy of refusing flexitime working to its 300 clerical staff.

The tribunal chairman, Mr John Haslam, said that the committee's words pointed to a concil serving its own convenience and not to any real need or requirement. Other employers might justify such a decision by showing there was an effect on business or staff; But in this case there was none.

The decision was discriminatory because a far greater proportion of women than men could be affected by it.

The tribunal's order was made by agreement between the parties without prejudice to the right of appeal

Co-op profit fall leads to reform call

By Derek Harris

The Cooperative Wholesale Society was under further pressure to take urgent action to reverse its fortunes after hearing of declining sales and falling profits during its half yearly meeting held at the weekend.

The society's half year pre-tax profits were down 15.4 per cent at £6.6m on a turnover of £958m. Last year the society made £16.0m profit on a turnover of £2,100m which was 8 per cent up on the previous

Mr Peter Paxton, the society's chairman, gave the meeting a warning about un-profitable retail societies. He said: "We cannot afford to permit large Co-ops to continue to make losses and thereby weaken the fabric of the cooperative movement as a

He added that although the CWS must try to encourage strong regional retail groupings, the CWS had no plans to involve itself in further mergers with regional societies or with the Cooperative Retail Society (CRS), the movement's biggest

The society discussed the possibility of reducing the number of retail societies from the present 100 to about 25.

Winning policy becomes lever for social change

On the eve of the privatization of British Telecom, DAVID WALKER. Social Policy Correspondent, charts in a three-part series the progress of the largest single transfer of state assets to the private sector: the sale of council houses.

Almost unnoticed in the excitement caused by the miners' strike, the Labour Party accepted the right of tenants to buy their own homes.

Labour's policy is hedged with qualifications, but its essence is unmistakable. The owner-occupation impulse seems unstoppable. With the right to buy provisions of the 1980 Housing Act, sweetened further in the 1984 Housing and Building Control Act, Mrs Margaret Thatcher's govern-ment found not just a winning policy, but a lever for changing

Sales to date in England, excluding sales under previous arrangements for tenant purchase, total 404,000 council dwellings and some 4,000 new town properties. At a rough average of net capital receipts to councils of £10,000 a dwelling this represents an addition of more than £4bn to council

The paper value of this property to tenants, who have bought at discounts of between

Council house sales					
Sales to circle	Housing stock (Dec 1883)	Salay es % stock			
England 410,000	4,766,000	8.6			
Scotland 51,000	1,015,000	6.0			
34,700	272,000	12.4			

30 and 50 per cent, could be Telecom is likely to raise.

The table shows sales to date for council and new town property measured against the stock of dwellings at December

These sales have pushed council tenures down to about 28 per cent of all English households: owner occupiers now represent at least 63 per cent and the proportion continues to grow.

The peak in annual sales has passed. But sales are likely to continue at a steady level. Mr Alan Murie of Bristol University's School of Advanced Urban Studies said: "There is a ornal stitutes said: "I nere is a family life-cycle effect; as people grow up and leave home, the pool of potential owner occupiers gets new recruits." But he adds that the key to sales is what haveners to occupier. is what happens to council rents: the higher they rise, the

more incentive there is to buy.

For the Treasury, council house sales have become a vital element in calculations. In the current financial year councils are deemed to be receiving £1.4bn from them, which allows central government to cut the amount it permits council to borrow to build new houses. Even if, by 1986, the rate of sales has fallen to predicted levels the Treasury should be able to count on at least £500m flowing in annually.

Councils 'forced to hire extra staff'

By Hugh Clayton, Local Government Correspondent

councils to appoint more than with the 15,000 extra staff in the past service. five years, according to a research paper commissioned by local authorities for a key meeting with ministers tomor-

The paper was prepared from data supplied by Labour and Conservative councils by the Local Authorities Conditions of Service Advisory Board for the councils bargain with ministers shout finance

Ministers claim that one reason why they need special powers against councils is the local government workforce in benefits.

The Government has force the past five years compared nuncils to appoint more than with the deep cuts in the civil

that the size of the cuts made by councils has been masked by a parallel increase forced on them by the Government, It adds that the effect accelerated last year when most of the increase in council staffing complained of by ministers was the Government's own fault.

The research shows that councils have appointed an extra 600 staff in the past five years to handle house sales and more than 3,500 to administer

Irish potato quality not what it was

The quality of potatoes in the Irish Republic is not what it was, and after almost 300 samples from stores in Dublin and Carlow failed to meet grading standards, the Government is doing something about

A licensing system for growers is under review, with the prospect of fines of up to Irf1,000 (£840) and the threat of revoking the licence if the farmer is in serious breach of regulations.

Many consumers have been

buying potatoes imported from Britain and The Netherlands because the quality of home-grown produce is so poor. Of 288 samples bought over a

six-month period, almost helf had more than the permitted level of diseased tubers. Mechmical damage affected one fifth and 95.8 per cent failed to meet existing regulations on substan-dard potatoes.

Gangrene was the disease affecting acceptability, regulations on grading by size appeared to be ignored and 90 per cent did not state the name and address of the packer or information about variety and

India visit by informal **Princess**

From Michael Hamlyn

Princess Anne arrived at Delhi airport yesterday to begin a tour of India in what will plainly be maximum

There was no official Indian welcome at the airport, merely a group from Britain's High Commission

The Princess was hatless and wore a sleeveless like hipster dress.

The Andover of the Queen's Flight had brought her from Dhaks in Bangladesh, where her visits to projects run by the Save the Children Fund, of which she is president; were the control of marked by an equal lack of formality.

The Princess's 12-day tour

of India will take her through some of the world's most dreadful slums in Calcutta, where she will meet Mother Teresa, and to some of the most beautiful areas in the world, Jaisalmer Fort in Rajasthan, and the Mussoorie hill station in the Himalayan foothills. The only formal events come

inday, when she lays a wreath at the memorial to Mahatma Gandhi at the spot where he was cremated by the banks of the Yamuna River, and where she calls upon Mr R Vankata-raman, the Vice-President. She will also call on Mrs Gandhi on Wednesday and dine with her at the Prime Minister's resi-

Prado gets more room for display

The Prado museum in Madrid will soon triple its space and regain control of its own affairs from the Government. Señor Javier Solana, said at a news conference that January 1, when the new measures are to go into effect, "will be a historic day for the Prado museum and

for the culture of our country". The museum will gain much needed additional space by taking over two historic buildings nearby. One is the Hall of the Kingdoms, the present Army museum, which is almost all that remains of the seventeenth-century Retiro Palace complex.

The other is an eighteenthcentury building, the Villaher-mosa Palace, recently used by a mosa Palace, recently used by a bank. The museum will regain control of its own affairs through the establishment of a Prado Foundation, which will remove it from the direct control of the Ministry of Culture and simplify bureancratic and administrative matters.

As the Villahermosa Palace was restored only a few years ago, the museum can start using much of the additional space as soon as the new measures take

A Culture Ministry spokesman said many of the works, now stored for lack of display space, will soon be on show to the public

Politics and dollar hit bridge Olympiad

Fifty-five countries are competing in the seventh World. Bridge Team Olympiad which opened here yesterday, and that in itself is something of an achievement Some time ago it became

clear that more than a third of the member countries would not be permitted to compete if South Africa was in the field. The South African Bridge Federation saved the day by announcing that they would not

submit an entry.

Next, the withdrawal of Russia and its satellites from the Los Angeles Olympics virtually assured the non-par-ticipation of the Eastern block countries with the exception of Poland, one of the strongest European bridge playing coun-

tries. Then the strength of the five of the quarter-finalists from

pools of 27 teams who will meet each other over the next eight days, playing three matches each of three hours duration for nine successive days' at the end of which the leading four countries in each pool will qualify for the quarter-final Great Britain will be rep-

resented by L. Rose and R. Sheehan (London) W. Coyle and B. Shenkin (Scotland) and R. Smolski and K. Stanley (Notts and Warwickshire) with Armstrong of the Northst as non-playing captain. In Pool "A" Britain will meet the semi-final stages.

US dollar led to the withdrawal of a number of countries.

In the open series 54 countries are divided into two countries. "Chinese Taipei", while Canada, New Zealand, Israel and Poland are also expected to mount a strong challenge.

The USA, in Pool "B" are favourites both for the open and ladies titles. In the ladies event they are the defending champions but Britain, represented by Sally Sowter and Sandra Landy, Nicola Smith and Pat Davies, Gill Scott-Jones and Sarah Scarborough, are the reigning world champions and it will be a considerable surprise if both teams do not survive to

clecting a president.

body will have already met on December 17 (which happens to be the first Monday after the second Wednesday of December, as laid down in the Constitution) to cast its ballots. For almost two centuries Americans have been electing their presidents under a cumbersome and complex system conceived by the Founding

Fathers as a compromise perween electing presidents by Congress or direct popular vote.
Although various attempts have made to abolish the electoral college, most recently the most recent being Kenned in 1977, the system has in 1960 and Nixon in 196 survived the radical transformation of the United States from Adams (1824). Rutherford

1 20 mg

America's cumbersome com In the first of three articles on an agricultural scaboard nation the electoral system of the to a superpower.

United States, Nicholas Ashford,

Under the electoral college

The electoral system: Part 1

chief Washington Correspon-dent, examines the mechanics of system, each state is cutitled to electoral votes equal in number to its Congressional delegation - in other words, the number of representatives from that state,

plus two more for the state's two senators.
The state with the biggest number of votes in the electoral college is California, with 47.
The smallest are Alaska, Delaware, the District of Columbia, North and South Dakota, Vermont and Wyoming, each of

which have three. Under a system which has developed over the years, the votes in each state are considered as separate mini-elec-tions and the winner takes all the electoral college votes to which each state is entitled. Thus, if President Reagan wins a majority of the popular vote in, say, Texas, he will get all of that state's 29 electoral college

The next President will be the candidate who wins a majority of the 538 votes cast by the electoral college, that is, at least 270 votes. In the unlikely event that neither candidate receives a majority, the task of choosing the President falls to the House of Representatives.

Because of the way the system works, it is possible for a candidate to be elected President without winning majority of the popular vote. In fact, there have been no fewer than 15 "minority" presidents, in 1960 and Nixon in 1968.

Voting patterns of the past two decades suggest that Mr

Comorrow: The other contes

Europe seeks bigger Nato role From John Earle

Seven European countries have taken a modest step towards reviving the dormant Western European Union as a counterweight to United States dominance in the Nato alliance. A meeting here, at the end of last week of foreign and defence ministers of the seven member countries decided they will meet regularly twice a year in future,

while a more lively role is planned for WEU's 89-member parliamentary assembly. The union, consisting of

Britain, France, West Germany, Italy. Holland, Luxembourg and Belgium, was founded 30 years ago with the intention of ensuring that West German rearmament was kept in bounds. For years this has ceased to have meaning. Its new role is providing a European voice in Western defence and

Spain is reported to be inter-ested in doing so. The ministers instructed the WEU permanent council to reorganize its arms control agency and standing armaments committee, to be better able to study matters such as arms control, problems of disarmament, and security, and joint European production and pur-

Mitterrand's state visit

France laments loss of British sense of humour

President Mitterrand's fourday state visit to Britain will be remembered here for emphasizng the excessive touchiness and uneasy feelings of rivalry between France and Britain, rather than the underlying. more important, entente cordiale it was supposed to be

The explosives incident in the French Ambassador's gardens is seen to have completely overshadowed the visit, which would have passed off otherwise without particular comment. apart perhaps from a few halfenvious descriptions of the traditional pomp and pageantry of the British Court and Parliament. The French are still

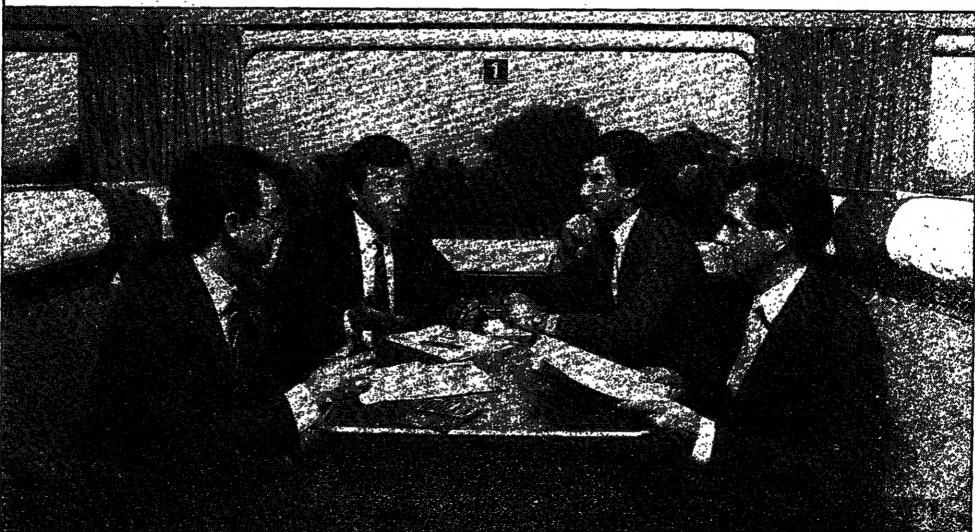

monarchists at heart. Britain's version of events is generally accepted as more accurate than that of the French police. But there is, amazement and horror here at the virulence of much of the British press and certain MPs, considered out of all proportion to the importance

Was it not just a little prank by a policeman which unfortunately misfired, the French many, it is simply evidence that the much-vaunted British sense of humour does not apply when that humour is directed against them.

In a front-page leading article on Friday, Le Monde commented somewhat sadly: "The immediate reappearance of strong anti-French feelings (among the British) seems to have reduced to nothing the anticipated effect of this visit, whose sole purpose was to consecrate Franco-British re-

The visit, however, seems to have ended on a happier note. French journalists were pleasantly surprised that, after all the unpleasant brouhaha, their British colleagues chose to mark M Mitterrand's sixty-eighth birthday by singing "Happy Birthday" to him at his closing press conference on Friday Perhaps that sense of humour

Chernenko's Asia worries prompt fresh offer to solve Sino-Soviet rift

Mr Jambyn Batmunkh, the new leader of Mongolia, left here at the weekend after talks in which President Chernenko declared the Soviet Union's readiness to keep the door open

At a Kremlin dinner for Mr Batmunkh, Mr Chemenko said that a normalization of Sino-Soviet relations would contribute to improving the situation on the continent of Asia. Moscow would "always keep open the door to constructive talks with China".

The remarks came as Mr Leonid Hychov, the Kremlin's top negotiator with China and a Deputy Foreign Minister, held a further round of talks in Peking with Mr Wu Xueqian, the Chinese Foreign Minister. The atest round opened on October 18 and give every appearance of being as fruitless as previous efforts. But there is an im-proved atmosphere after Mr Wu's lengthy conversations with Mr Andrei Gromyko last month at the United Nations.

The presence of about 25,000 Soviet troops in Mongolia is one of three bones of contention between Moscow and Peking The others are the occupation of Afghanistan and support for Vietnamese activities in Cambodia. The Vietnamese Foreign Minister, Mr Nguyen Co Thach, arrived in Moscow yesterday for talks, hard on the heels of

Playing down the bitter US presidential election, as well hostility between the Soviet as providing a forum for Union and China for the past changes in the Kremlin. Union and China for the past 15 years, Mr Chernenko said a Sino-Soviet rapprochement was desirable in view of a common effort by the imperialist powers" to undermine communism Asia. "Under such conditions, the socialist countries cannot but hold clearcut class

positions."

Moscow is disturbed by Peking's relationship with the United States and has sharply two parliamentary chambers, meets twice a year. It has largely ceremonial functions and formally considers resolutions put forward by the Polisians and criticized recent Chinese economic reforms as aimed at pleasing American capitalists.

THE ARTS

Opera

Sure comic touch makes for beguiling feminine wiles

Le astuzie femminili/ The Kiss Wexford Festival

After Massenet's Le Jongleur de Notre Dame, described on this page on Saturday, Wexford completed its traditional trio of operas with Cimarosa's Le asture femminali and Smetracy's The Mini Parties of the Parties of the State o Smetana's The Kiss. "A good, safe Festival repertoire", was the com-ment attributed to Wexford's artistic director, Elaine Padmore, in one of the Irish papers. But it is highly unlikely that she said it: even in Wexford it is difficult to get away with that sort of remark. There has never been anything "safe" about the choice of operas in this town, which consistently treads in areas where others are reluctant to dip even a toe.

Somewhat against the odds Le astuzie femminili, the second opera on show, has turned out the success of the Festival. Quite often the middle work is the runt of the litter. There are sound practical reasons for this: rehearsal conditions ususally dictate that the central opera must be chorusless and most Festival directors like to have their succes fou playing on the last night, which means that it has to be third on view. But Astuzie (Feminine Wiles) has well and truly broken the mould.

The key to Cimarosa is sharp production. Even II matrimonio segreto, his only opera most of us are likely to encounter nowadays, can be tedious if it is not staged with style. Cimarosa writes melodies that are beguiling while they are on the wing but vanish at speed from the mind when they are over. His stage music is all too often as unsustaining as the proverbial Chinese meal and many of the numbers in Astuzie (1794) could be swapped between characters without too much upset.

Fortunately Wexford engaged one of our few young producers with a sense of fun and a sure comic touch to make something out of Cimarosa's confection. And confected Astuzie certainly is, from the basic ingredients of *opera buffa*; an elderly guardian, an elderly suitor, two young lovers, a maid/confidente and, just for a change, a governess. The two old men get the slightly shopsoiled goods and the lovers end in each other's arms. How else could it be resolved?

Andy Hinds has stirred this all into wild farce by updating the whole thing to the 1920s and the age of The Boy Friend. Just why is not quite clear, except that it allows his designer, John McMurray, to create hideously diverting sets in apple green and white, the colour of some venomous pudding created by a berserk chef, and Mr Hinds himself to make a series of sight gags at the expense of every Twenties figure from the Cubist painters to Rudolph Valentino. Even more important is Andy Hinds's ability to get his cast working without inhibition. They have a ball and so do the audience. The leader of the revels is a pert

Swedish soprano called Susanna Rigacci, who pips out her notes with sure musicianship as Bellina, the young heiress everyone is chasing. She rolls her eyes like a Theda Bara and has a fine sense of comedy - not and has a fine sense of comedy - not a great deal of chance to display that in the Bellini repertoire in which she normally specializes. Raul Gimenez has a clear, well-focused tenor another in the Luis Lima South American line - as Bellina's lover, who despite the Valentino parody behaves as something of a wimp. The two old men are in the exceedingly safe hands of Peter-Christophe Runge and Arturo Testa, as the suitor with a ripe Neapolitan accent. Nancy Hermiston is the maid who can also Charleston and Nuala Willis's Governess looks as though she is on the run from Les Biches.

György Fischer knows all about the eighteenth-century operatic repertoire and he made Cimarosa's score sound rather better than it probably

First staged in 1905, The loysey Inheritance indicts the

Edwardian haute bourgeoisie and hands them the bill. A

wealthy, respected old solicitor

reveals to his son and partner, Edward, that he has been speculating with clients' trust funds and the firm is six figures

in the red. Edward's horror and

none to leave.

Robertson's staging of Smetana's The Kiss inevitably looked a bit folksy and middle-aged. But in his defence it must be said that he had virtually nothing to work on: if Cimarosa's libretto is a confection then the one provided to Smetana by Eliška Krásnahorska is but a thread, a wisp of a thing that would scarecly sustain a short short story. The titular kiss is refused by the

heroine Vendulka to her betrothed, who in the best Czech tradition goes out and gets drunk. Reconciliation follows swiftly after an encounter with a band of smugglers - what were they smuggling in old Bohemia?

The Kiss is probably the best-known of the three Wexford operas this year and it turns up occasionally in student productions - Mark Elder and David Pountney combined to stage it in their Cambridge days thanks to Smetana's lush score. The best moments are orchestral, when Smetana gives us his forest murmurs while the smugglers are plying their trade or when dawn breaks over the mountains. Albert Rosen showed his own Czech origins while conducting these, but otherwise was inclined to push the RTE orchestra a bit too

Vendulka has the best of the arias, a caressing lullaby at the end of Act I as she puts the child of Lukas (by a previous marriage) to sleep while he is off at the pub. This was affectingly sung by Marie Slorarch, who has plenty of feel for Central European style. Would that Eduardo Alvares had the same: he was an unrelen-tingly loud Lukas and should have noted something of the acoustics of the Theatre Royal on his previous visit here. There were much more accomplished performances from John Ayldon and Roger Howell as Vendulka's relatives and a splendid cameo from Patricia Johnson as the aunt trading with the smugglers and Miss Johnson, once a renowned Carmen, should know all about smuggling.

John Higgins

Cimarosa meets The Boy Friend: Arturo Testa (left) as the suitor from Naples and Susanna Rigacci and Raul Gimenez as the young lovers at Wexford

Don Giovanni

New Theatre, Cardiff

Hold on for a moment while I try to understand this latest production from Welsh National Opera. It is not going to be easy. However, as I see it, the cast have taken themselves off to Barry Island where they have struck unlucky with the tide. Indeed, the sea has retracted so far and for so long that they find themselves on a wide crazy-pavement of baked mud.

From the cracks in this they discover objects left behind by previous visitors (socks and shoes, a teapot, bits of underwear, a foot bowl: that sort of thing) and naturally it occurs to them to save the day by singing Don Giovanni to one another.

Lo and behold, there are even swords sticking into the mud at intervals: potent symbols surely of death and, oh yes, phallic into the bargain. It all looks rather promising. Ruth Berghaus's production begins with a staging of this scene, but of course all one's favourite moments from the opera are there as well. You

shame are as nothing compared of Bohun in You Never Can

While

Edward

whether to expose the deficit or

labour to retrieve it, they react

impotently with fury, cajolery and, in one last fatal instance,

blackmail to defend their rights.

And Barker explicitly questions

played by Peter Copley, and the sparking, sane Holly Wilson as Edward's potentially smug fiancée. John Elvery, whose

work is too seldom seen in

London, contributes two typi-

cally evocative plush-and-pan-

elling interiors that peel out significantly at their furthest edges. Bristol Old Vic has long been associated with dis-tinguished productions of clas-

sic masterpieces; this is exactly

Don Giovanni is discovered to be Leporello. There he is, lying under this piece of the crazy pavement into which the nun languidly drops black darts, and then he crawls away until the spaceman stops him with a foot, This is excellently achieved, though one must point out a mistake doubtless caused by a typing error in the copy of the story that was sent to Miss Berghaus. The lady is Elvira,

A few adjustments to the costume will take care of this misreading. Otherwise I think I have no complaints. It is good to see Elvira arriving for once on a real conveyor belt in the first act, and here properly dressed as some fantastic mixture of ballroom dancer, shepherdess and cardinal. The episode of her lament-ing her phantom dead baby in a snowstorm is also most touchingly

Unaccountably the cast seem not This is a Don Giovanni sung without charm or wit: even Nicholas

will remember that point in the Folwell's Leporello is delivered for second act sextet where the presumed much of the time through clenched teeth, and William Shimell's Don Giovanni comports himself vocally and physically as a man of seething anger, his up-tempo serenade turned into a threat. Both performances are remarkable more for strength of utterance than beauty of tone or line, or sensitivity to others in ensembles.

> The same goes for the rest of the cast. Laurence Dale as Don Ottavio cannot disfigure the attractiveness of his sound, nor can Elaine Woods as Donna Elvira conceal a voice of secure clarity, brightness and flexi-bility, but both of them join Anne Evans's stentorian Donna Anna in aiming for vehement self-projection.

There is quite a bit of that too from Sir Charles Mackerras's rough, punchy orchestra (though I like the liquid, gently sensuous accompani-ment of the dry recitatives from a square piano). Clearly someone has misinterpreted Miss Berghaus's stuto have understood the production's pendous inventiveness as a mess of infinite subtlety and discernment.

Paul Griffiths

met a man at The Place last week who found Timothy Buckley's programme full of joy, which makes me feel a real wet blanket. It is not that I disliked him and his group, the Troublemakers, just that there seemed little about them to like or dislike.

season, they come hyped with words like zest and energy, which seems to bear out Leonide Massine's theory about people remembering only the ast four minutes of a ballet. And actually they never put out as much energy as their pianist, Gene Tyranny, whose forceful playing is amplified and superimposed on taped sounds of his own devising, including some incomprehensibly mumbled speech. Fidgety, rather, is the word for the dancing.

Musical **Borrowed** innocence

Chess Barbican Hall

Flotillas of photographers surged down the aisle, while outside the door a journalist was dictating a live report in what sounded like Swedish. And there was one of those standing ovations that are absolutely de rigueur on musical first nights - whether as bad as Peg or Y, or as bizarre as a Tim Rice/Benny Andersson/ Björn Ulvaeus (late of Abba) opera about an international chess match combining a bewildering range of borrowed musical styles in blissful inno-

Strictly speaking, this was a concert preview coinciding with the album's release. An impenetrable programme synopsis in three languages suggests that, if this show is ever staged, there will be a lot of dialogue. An American and a Russian grand master (unnamed, but we could call them, say, Bobby and Boris) wage the Cold War in little over the chess table, with Bobby walking out, Boris harassed by his apparatchik second Molokov and the glamorous Florence, Bobby's second, joining the Russian in a series of tortured duets.

The opening Tyroleans' chorus, straight out of White Horse Inn. is clearly a joke but unfortunately the same cannot be said for Boris's patriotic author intended to bring the anthem intended to bring the house down with the first-act curtain, or the sub-Albinoni adagio, very suitable for an after-dinner mint commercial, for which the ever-busy lighting technicians bathed Anders Eljas and the London Symphony Orchestra in violet:

There is also some sub-Lloyd Webber, a capable operatic quartet (Schumann with a dash of Bach) that I fancy turned up later as a silkily-played orches-tral scherzo, and a good deal that Liberace might look at.

Several numbers might, with promotion, be hyped into singles but hardly any deserve it, apart from a heartfelt duet, "I Know Him So Well", in which Elaine Paige (Florence) and Karin Glemmark (Boris's wife) gave everything they had. One inbuilt flaw of the show is that the action is soinegative: affairs that come to nothing, chess matches abandoned, Molokov threatening, Bobby snarling,

In fact Bobby is not much of The ever-professional Denis Quilley is a pungent Molokov and Tommy Korberg brought lots of passion to Boris's long, dull role. We must now see if all those who bought albums and T-shirts will make Chess enough of a cult show to roll it into the West End.

Anthony Masters

Television Dancing difference

cissies, though envy nudges the elbow of the mept. Peter Schaufuss, Danish director of the London Festival Ballet, a dancer and a child of dancers, in Proper Job last night, first of his four BBC2 programmes under the title Dancer, is aware of misconceptions and unfurled

of misconceptions and unfurled the flag of masculinity at once.

People often thought male dancers, with whom he is concerned, "efferminate, different". They were different, he said - "Stronger, fitter than most athletes, training to compete against ourselves throughout our whole career. And we never win." He invited And we never win." He invited doubters to try to lift their girlifiends or wives above their heads without straining. "like a weight-lifter", but smiling. He demonstrated. One imagined an awareness of physical limitation among many male viewers. Mr Schaufuss then intro-

duced a succession of dazzling male dancers - European, American and Russian - in performances of awesome strength and grace. Interspersed were glimpses of the inexorable training routines at schools in London, Paris and Copenhagen where budding male dancers contest their bodies.

Then there was the formidable Maurice Bejart, choreographer of the physically impossible, to tell us that the most important element in dance was the man. Mr Bejart, whose piercing eyes deflect argument, said that dance had its origins in

activities of the male. No doubt we were all convinced. It is a proper job and watching it should be delightful as well as

liberating. BBCs 2 other new series, Our House, which will investigate six different homes where successive generations have spent their lives, took us to Harrow and Mr and Mrs Bill Johnson Mr Johnson has lived there all his 56 years. His father bought the three-bedroom semidetached for £1,100. I understand it might now fetch around £60,000. These facts I elicited after the programme, which was

not revelatory.

Mr Johnson, a teacher and now an administrator, and his wife Elsie have no intention of selling. They were happy but defensive, though I surmise they were prompted, about suburbia.

THEATRE

Theatre A Midsummer

Night's Dream Haymarket, Leicester

Quite a shock to come from the beauty and sensitivity of John Caird's great Twelfth Night for the RSC, which I saw the night before, to such a misbegotten mess as this. Its ingredients are sets and costumes in John middle a non-production by

Even before Don Warrington and Souad Faress saunter on with cocktails to plan Athenian wedding entertainments Emil Wolk and his merry men are adlibbing noisily in the band corner that will later show their furious offstage post mortems as Bottom and Co. In addition to masking some indifferent speaking, their musical contribution makes some extended numbers from the lovers' verse, mangled to fit - thus intensifying the suggestion of Joe Papp at his most fidgety.

But, though their own comic dialogue can hamper them, they achieve typically brilliant feats of comic coordination: watch Bottom's script slipped from hand to hand before disappearing, and some verbal inspirations like Mark Long's Quince distributing the parts with instructions to con them (namely us, the audience) by comorrow night.

Give to those who gave - please

fully into half-comic priggish-

ness as he drops the bombshell (you have been living off fraud and your legacies are frozen)

audience in riveted silence only to release them in ripples of understanding laughter. As in The Madras House, Barker excels in family portraiture: dear, deaf old Mother (Peggy Ann Wood) placidly engrossed in Notes and Queries, the careworn and taken-for-granted spinster daughter (nice pathetic comedy from Susan Colverd) and pompous sons, here brilliantly cast against type. The booming Major, tiresomely overwritten, becomes tolerable and equally convincing in Andrew Hilton's sensitive hands while Malcolm Mudie gives his barrister brother some of the outrageous assessmeness

This Rational Theatre show combines sound and light, dance, gymnastic display and speech in theatricalizing the work of the sculptor Denis Masi, artist-in-residence at the Imperial War Museum, which is soon to be exhibited separa-tely in the ICA's Upper Galleries. I take the handout's word fot it (reinforced by the picture of caged human and animal heads) that Mr Masi's chosen theme is power; but I would never have decoded that

Set in a white box equipped with weight-lifting apparatus and a television monitor, it opens with a series of personal confessions from the company of six, who then change into gym kit for a series of exercises whose main effect is to leave them fagged out on the floor. A pair of side-screens flashing up enigmatic orders invite us to see them as human laboratory specimens, manipulated by ome unseen authority.

Otherwise the spectacle offers nothing more sinister than a cheeful little group, with bags of

pep, meeting for a weekly keep-fit class. Of course, that may be the point. Perhaps the fact that they are unaware of being manipu-lated is intended to make your flesh creep. Perhaps the eager-ness with which they reel off their confessions demonstrates supine complicity with their

interrogator. But it strikes me as fatally indecisive to leave all such possibilities to the spec-tator's speculative reveries. The stage picture has the heightened definition of a perfectly recalled dream. Andy Wilson's company show an impressive range of skills from formal dance to animal perfect. formal dance to animal pantomime, and some passages, such as the appearance of a lone body-builder working away at his own tempo in the midst of the frantically drilling group, do

make memorable statements in strictly visual terms. Other visual items, such as projected photographic mon-tages and the background figure of a seated technician, have no evident relevance to the company's routines. Nor, alas, do the words, which evoke sus-picions of the Emperor's New

Irving Wardle in those sections where Guy

Bochmann Quartet/ Canter

Barry Guy's new work for solo oboist, Circular, shamelessly exists only for the purpose of glorifying the instrument and the performer. But, though it makes no pretence at bearing any profound messages, its bewildering technical difficulty has by itself created an arresting dramatic conflict between intention and realization of the sort often found in the music of

Wigmore Hall

Xenakis or Ferneyhough. Few exponents could have negotiated it with the kind of panache, even relish, shown by Robin Canter in its world première on Friday. For one thing, even without the plethora of multiphonics and other special effects that Guy employs, its furious perpetuo style would have defeated many. Canter is also fortunate in his command of the so-called "circular" technique of breathing (the device that presumably inspired the work's name), so that he was able to play for long periods

without appearing to pause for air. This was especially effective

Concert

requires his soloist to produce difference tones" by playing near-coincident pitches on two oboes simultaneously.

The sheer thrill of all this dominated a concert which otherwise included some British otherwise included some British pre-war chamber music and Ravel's String Quartet besides. The Bochmann Quartet played the Ravel with a warm assurance where perhaps a slightly more astringent sound would have served the sometimes sinewy counterpoint better, and Britten's Phantasy Quartet of 1932 sounded equally cosy. 1932 sounded equally cosy. This is in any event a mildish work that cleverly returns to whence it came (a gently oscillating minor third) but that meanwhile visits nowhere very

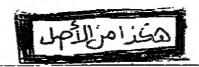

It was like an oasis however among the other three works Bax's Oboe Quintet of 1922 was the most assured and, I suppose, the most interesting of them. But the two Interindes from Delius's Fennimore and Gerda, transcribed for oboe and string quartet a few years back by Eric Fenby, are really as dull as dischwater, and Holst's admittedly early Three Fantasy Pieces for the same combi-nation are scarcely better.

SAAB - PROUD TO BE THE BACKING GROUP FOR CHESS.

NOTHING ON STAGE COMES CLOSE.

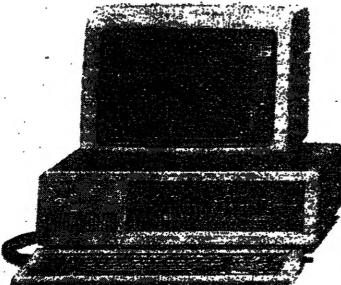

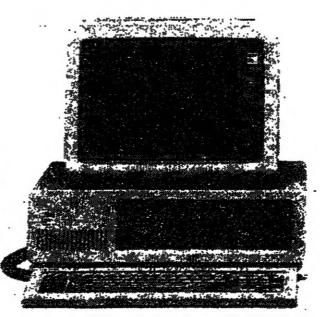

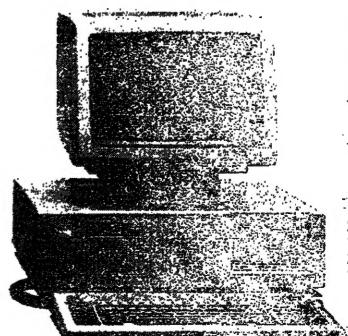

IJIjOceth.

For businesses of all sizes: computers of all sizes.

We've always designed our Personal Computers so that they can adapt to different needs and working environments.

To that end, we make our hardware as flexible as possible.

And that's why we're so pleased to announce an extension to the range of Personal Computers.

For people who don't stop work when they leave the office, there's the IBM Portable Personal Computer.

It does almost everything a desk-top Personal Computer can do, and you can use it wherever there's a mains socket.

The standard IBM Personal Compu-

ter is one of the world's most popular tools for meeting the challenges of modern times.

And because you can upgrade it like all IBM Personal Computers, it's suitable for anyone from a one-man business to a multi-national corporation.

If, however, you need to store large amounts of data, then it's worth looking at the IBM Personal Computer XT.

From recording complicated accounts to handling large inventories of stock, the IBM PC XT can do it.

And finally the powerful and nimble IBM Personal Computer AT It's perfect for

people who need even greater speed and memory capacity. Its new technology means that it can run almost all the programs written for the IBM Personal Computer, at up to three times the normal speed. And you can expand its memory to 41 million characters.

With all this to think about, perhaps the best part is that you don't have to worry about which model will suit you best.

Simply phone 01-200 0200 or clip the coupon for your nearest IBM Authorised Dealer or Retail Centre.

They'll help you cut our hardware to fit your needs.

Roger Kojecky, IBM United Kingdom Product Sales Limited, FREEPOST, Greenford, Middlesex UB6 9BR. (Telephone: 01-578 4399.)

pride in correctitude and classical style. A lot of the main scorers are those who club it, like Gooch and Botham. On the other hand, the rate of runs per hundred balls is higher (than 30 years ago), there are more centuries, and the overall standard in county cricket is higher: there are no pushovers."

Peter Roebuck of Somerset, articulate and literate and with a first in Law from Cambridge. has assiduously tailored himself to the modern game. As a non-Test player yet eighteenth in the batting averages he has no vested interests. Relentless competitive pressure, he believes, is the mitigating factor

for batsmen's limitation Golfers can work at their game, but cricketers can't" he says. "You can't assume that technique lasts forever. McEnroe or Nicklaus regularly revert to practice: we play matches. players too infrequently ask", this encourages batsmen to G. O. Allen, captain in 1936 concentrate on being aggressive, and a fast bowler of peerless or touch players, rather than action who disapproved of Jardine's bodyline theory when a member of the 1933 tour, agrees that one-day cricket has but are forced to try to score off agreed that better than the same background (as before of the same background to try to score off the same background the same background the same background to try to score off the same backgrou good balls. Short bowling eliminates classical driving. It's 'edge-behind' cricket. We get out through frustration.

Starting with the Gillette Cup in the 1960s, the importing of foreign players has restricted the development of home players, though this has been reduced since 1981 to one player per

Yet could more be achieved with the material available by better selection, captaincy, or the appointment of a full-time team manager? Peter May reasons that the loss of 15 players under the three-year ban for South African involvement has been unavoidably inhibit-ing, but that the inclusion of Gooch and others would not

Ted Dexter, debonair stylist. of 66 Tests and captain against five countries, thinks that Insole should call for an enquiry into the whole framework of Test team administration: he argues that West Indies, New Zealand, Pakistan and Sri Lanka have concentrated positively on improvement, while England, for so long more experienced than all but Australia, make do

He believes that selection, coaching, training, back-up finance, captaincy and personal character should be analysed, that an elite squad of 30 players, vened for technical soundness should be established rather than a selection policy of hit and miss; and a team manager should be appointed to work with the captain and replace the selectors. Roebuck agrees. "A sense of unity in strategy and policy is needed. The selectors at present are unaccountable." Why should England select two spinners for the first Test first? Gubby Allen considers appointing a team manager with the right might work sort of person. Ken Barrington, had he lived, could have given a lot of moderate batsmen con-

derable help."

May and Insole, broadly. question the usefulness of a team manager, believing that only the captain can be in touch with all the shifts in emphasis hour by hour, that county managers such as Ray Illing-worth have had only limited success. Furthermore, May doubts how much you can try to coach an established batsmen who has scored thousands of runs. Yet the situation where England have no more than a quick pre-Test net on a Wednesday, and Botham can

through a couple of windows, is sympomatic of haphazard prep-

Have England been inadequately led by Botham, Willis and Gower, following the departure of the extrovert Greig, under a cloud, and the retirement of the intuitive Brearley? Have not both bowlces and batsmen been insufficiently tactically disciplined? Roebuck wonders whether the old-style amateur captain is needed, unconfined by pro-fessional attitudes. "The pro-

6 A sense of unity in strategy and policy is what is needed 7

Peter Roebuck

fessional captain is impercep tibly reluctant to instruct another test-calibre prodoubts the effectiveness of tearn managers, but thinks few captains have a natural aptitude for ideas, "yet they have to be in charge, to direct their bowlers, sometimes. Fairly basic things (against West Indies) haven't been observed, though no side selected could have beaten them. But your bowlers must not be allowed to begin to feel

Brian Close is characteristically sharp. "There are no captains today. Money over-rides the game. Top players are given the captain's job, but have to give all their efforts to their own game to keep in the money. Allen drily observes that the discipline of players on and off the field is not as good as it used to be, "which leads to lack of concentration". Yet in defence of the players. Insole says that he found a minimal difference in attitudes over 30 years between being player and tour manager - and that there is now less drinking. Roebuck points out that the huge improvement in fielding stan-dards is not compatible with alleged lack of fitness, that staleness and mental fatigue are more relevant.

Where, then, does the definitive answer lie? Maybe there is none. England has no right to supremacy when others are Are the players overpaid, uncaring and slip-shod, or simply over-burdeped? Would technique return if the sug-gested four-day, 16-match county programme was intro-duced? Or if limited-over crowd-pleasers were abolished, together with bouncers? Cricket is no more a protected species than the music-ball, and it is probably too big and demo-cratic to arrest, by simple commercial expediency.

Yet it cannot be of retaining Cardns's "poign-ancy of those hours on the summer field" when Roebuck can thus reflect upon a season; "We won a cup final at Lord's, but I look back with more affection upon our time during the World Cup when we were a weak (depleted) young team doing its best. If I learnt anything, it is that the pleasure of professional sport lies not in winning trophies but in playing in a team which is giving itself heart and soul to its work. Cardus would have approved, though perhaps not of that, to him, inappropriate final word.

A service falling into decay

Part 1: Teresa Skelly explains how a series of improvements in diet and health care have created a crisis in Britain's dental

profession. Patients, she says, are suffering because training methods are outdated and the payments system encourages dentists to opt for treatment rather than prevention, costing the public millions

Last year 33 million teeth replacing old fillings at the were filled, six million ex- merest hint of decay tracted, two million crowned and one and a half million sets why children who had never

ental practitioners in Britain.

In all 35 million courses of decay.

There had to be another Fnidemiologists treatment were carried out on the National Health Service. It explanation. Epidemiologists cost around £680m - that's may argue but two factors, quite more than we spend on unrelated to dentists' restorative about the same as the amount spent in one year on Trident, changes in the amount and type But it is still only a fraction of of sugar we consume the £15,501m total cost of the health service in 1983.

in Britain than almost anywhere clse in the West. Teeth are healthier now than at any time since the launch of the health service in 1948.

In the last decade alone the proportion of five-year-olds with some known decay has fallen from 71 to 43 per cent. Adults can now expect to keep at least some of their natural tceth until they are 60.

Upon a brief examination it would appear that there is very little wrong with the dental service today. It operates smoothly and efficiently, it provides necessary treatment on demand for the entire population of Britain and at a cost which isn't enough to warrant close scrutiny by the

But a more detailed investigation reveals a crisis so great and so far reaching in its implications for the dental profession that it cannot afford to be ignored in 1984.

"Already we have far too many dentists chasing too little work and consequently some of them are carrying out unnecessary work in order to maintain their income from the NHS,"

said one academic in London.
To understand why you need to go back to the early years of the National Health Service. They were balcyon days for dentists. Dental disease was rampant and their earnings soared as they worked long hours to fulfill the promise of free dentistry for all made somewhat rashly by Aneurin Bevan in 1948. In the first year alone many dentists had earned £4,000 - twice the earnings of

most GPs. Faced with this colossal workload they began to become more efficient, employing better management techniques and more receptionists and surgery assistants. In the mid-fifties the arrival of the high speed drill revolutionized dentistry. Better forms of pain control arrived in the sixties. By the seventies they were completely geared up to treat the levels of disease they had discovered in 1948.

And there were more of them. Following early fears about too few dentists there had been a massive expansion of the dental schools in the sixties. But then in the mid-seventies something happened which was to be the root cause of the crisis now facing the dental pro-

Decay rates began to fall throughout western Europe. A national survey into children's teeth was hurriedly carried out in Britain. Against the background of several minor surveys its findings tended to confirm the fall in decay noticed in Europe and, by now, the United

improvements were noticed in all ages, socio-economic groups and areas - although the most dramatic were in London and the South east.

thought to have retired or left the country, 500 are dentists Since this was also the area where there has traditionally been a higher concentration of working exclusively privately. 2,000 are salaried dentists in the dentists the profession was, and Community Dental Service. 1,000 work in the Hospital still is, eager to applaud its own clinical ability. It was hailed as Dental Service, about 600 are a triumph for restorative dentisacademics working in dental schools and about 400 work in ury - a philosophy which encourages doing fillings and the armed forces.

But that did little to explain of dentures fitted by general even had any dental treatment dental practitioners in Britain. were also experiencing less

coronary disease or cancer and skills, have emerged - one is fluoride and the other is

Fluoride was first identified ealth service in 1983.

Dental treatment is cheaper a Britain than almost anywhere se in the West. Teeth are remineralize – in the thirties. Research into why people in Colorado, USA, had less tooth decay revealed that it was due to the fluoride which occured naturally in the water supply from the Colorado springs, In 1945 it was added artificially to the water supply of Grand Rapids, Michigan. It also began to be added to toothpaste in the seventies.

Although successive governments have been reluctant to compel local authorities to add fluoride to the water supply it has proved to be a successful agent against tooth decay in those areas which have including Newcastle, Leeds, Durham, Scunthorpe, Kilmar-nock and the West Midlands.

In the West Midlands alone dental decay has been haived since fluoride was added to the water supply in 1964. Sugar, 100, has been linked

with decay since at least the thirties. Indeed, scientists have discovered that in the days before sugar was a part of our normal diet there was little, if any, decay. It began to appear in the sixteenth century when sugar began to become avail-able, but only to the affluent. them how to prevent decay or Elizabeth I.

Apart from falling decay it has also been widely accepted that periodontal disease, a gradual shrinkage of the gums caused by a build up of bacterial adults, is largely preventable. Combined with a gradual loss of

The rest - around 16,000, are the local dentists, who make up the General Dental Service of the NHS. It is for them that the fall in dental disease poses the greatest problems while prevention clearly pays in terms of dental health, it doesn't pay the dentist working in the

Indeed, the "Fee for Item" system under which they are paid seems to conspire against dentists practising prevention in

the NHS Unlike doctors who, broadly income according to how many patients are registered with them, dentists are paid solely according to what they do. So for each filling, scaling and crown fitted, the dentist submits a claim for reimbursement to the Dental Estimates Board.

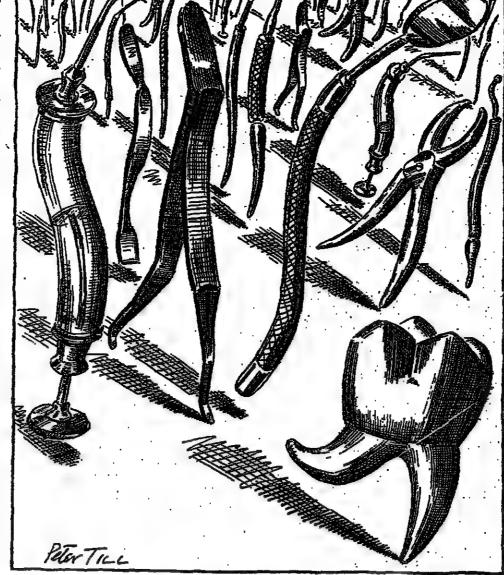

For each job a fee is set. For example, a small, single surface filling is worth £3.30, a large filling, £7.50.

These fees are fixed annually by the Dental Rates Study Group whose job it is to devise a scale of ices which will enable the average dentist with an average pattern of work to carn the target income rec-ommended each year by the Doctors and Dentists Reviews

It is now £46,533. Allowing for average practice expenses this should leave a target net income of £19,100, compared with estimated average incomes for doctors of £25,000. To achieve this the average dentist will have to earn about £25 an hour, five days a week, 52 weeks a year. To cover time spent on holidays, most dentists will try to push their hourly carnings higher, up to at least £35.

Since they earn nothing for financially, to stick to active taxpayers, people are getting a treatment. "Not only that, it's fair deal what they've been trained to service in Britain. do", said one young practitioner in the East Midlands.

"Despite the fall in disease plaque and suffered mainly by the curriculum for dental the curriculum for dental is a resounding "No".
students is still heavily biased towards restrictive treatment. It practitioners were far more students is still heavily biased

DRILLINGS AND FILLINGS

Both children and adults are suffering less dental disease than 10 years ago.

In 1973, the average age when a child had one completely decayed tooth was only 10. By 1983 it was at least 15. In 1973, the average when children had at least

repeated fillings rather than

prevention, it is fair to ask

they often lose

their teeth

before men'

decade later it had risen to 10.

By the age of 15 the average child in 1973 had had six fillings. It had fallen to four by 1983.

A national survey in 1978 showed that 29 per cent of adults had lost all their natural teeth, compared with

37 per cent in 1968. The biggest change was in the 35-44 age group where only 12 per cent had lost their teeth, compared with 22 per cent in 1968.

The average age at which people could be still expected to have some of their natural teeth had risen from 50 to 55.

PENNY PERRICK

These young fogies are charming rebels

certainly did not; so I eschewed the Oxford entrance exam and sat the Vogue talent contest.

Oxford caught up with me a few years later when I married few years later when I married one of its stars, a publishing prodigy who, during his time at New College, had bought the student newspaper and licked it into profitable shape. By the time he began to take me back to the scene of his triumphs the Sixties had propressed a bit and Sixties had progressed a bit, and underneat, the spires wandered equally dreamy children with smooth, spoon-shaped faces, oblivious of their educational

The man who, at the time, was steward of the Oxford Union, did not take to the current intake. "Things have changed, sir," he mourned softly to my husband, "since you and Mr. Heseltine were

Mr Heseltine had been a favourite, for he had white-washed the Union's cellars and organized dances in them.

After his departure, Oxford's flower-children used this choice bit of early-Tarzan interior design to drift around discussing the personal being political and similar devilish concepts while the Union's president, far from being an aspiring Tory politician, was a serene looking gentleman called Tariq Ali.

In other words, Oxford students had begun to resemble people of their own age everywhere else instead of giving plausible imitations of their own fathers during their time at Oxford. And I, 100 late in the day, realized that there train their cameras on the was more to an Oxford students disappointed to find education than silly young men them dressed in Benetton rather in brocade waistcoats getting drunk, and soppy young women getting locked out of their

colleges and having to giggle their way over the wall.

Hitting my teenage stride in the long been retired. It is probably early 1960s, the last place I just as well as there is much in wanted to go was Oxford. Did today's Oxford that would make that city of dreaming spires have a Vidal Sassoon, a King's think, be ill at ease at the recruitment stand for a society called Car San Ha would report recruitment stand for a society called Gay Soc. He would regret the sprouting of mixed-sex colleges and with them the declining need for rules to keep the sexes asunder.

Today's rules are very pro-saic students are not allowed to keep sandwich toasters in their rooms since some college residents, instead of producing cheese butties, used the toasters fuses to be blown.

But with the flower-children's children, including mine, who are both at Oxford this year, the retired steward would feel at home. The current intake does not drift around the honeycoloured city with a vacant expression on its unlined face. It is starp and eager with a hard-edged energy. Into the quads the students come and go, talking of merchant banking and becoming a politico. The Conservative societies are flourishing touting the distant past in true Oxford fashion with We love Winnie badges.

Yet these young fogies are not the mixture as before. Their rebellion against laid-back parents is subtlet they refuse to them into Sixtiesapproved careers such as-designing record sleeves or directing animated cartoons, and hint darkly that they may become chartered accountants. But they are full of charm and wit and sunshine manners, as befits a generation brought up by mothers and fathers who wore fringed jackets and long dresses and took guitar lessons.

The coachloads of middleaged tourists, decamped from their coaches in front of Trinity. than Brideshead. But as they listen to the rattle of the leaves swept along The Turi, watch the sun turn the stone yellow, gold and pink, they just think, with wistful envy, that Oxford is their way over the wall.

The seward who regretted wistful envy, that the end of the Heseltine era has wasted on the young.

encouraging, the scheme will be expanded for a two-year experiment to be assessed in 1987.

It has been cautiously wel comed by the British Deutal Association. This is the body set up originally to negotiate dentists' fees with the DHSS. Ironically it was the BDA

who warned of hurried and shoddy work under the "Fee for shoody work indea he rector.

Item" system when it was proposed by the Labour Government in 1948. Now-adays, it appears, the system is less opposed by the BDA. There is also a reluctance to

accept lower sugar consumption as a major reason for the fall in decay. Only now is a working group on sugar being set up by the BDA.

Allegations of abuse and widespread overprescribing have brought a strong reaction from the professional establishment. Dentists who speak out face the threat of censure for bringing the profession into disrepute - a possible breach of the rules of the Regional Dental

In the wake of growing public disquiet all the BDA can do is pass the buck to the DHSS. In a letter written in June to Health Minister Kenneth Clarke it called for an immediate tightening up of the system for monitoring work done and claims submitted to the Dental Estimates Board, despite the fact that the Government is unlikely to increase the number of dental officers who carry out random checks on dentists.

Meanwhile the Labour Party is worried about the level of patients charges and also the unequal distribution of dentists in Britain. It can vary between an average of 3,000 patients to one dentist in the South, up to 8,000 in deprived areas like Tyneside.

Undoubtedly compulsory fluoridation of water supplies would help dental health, but it could do nothing to help the dental service and the dental profession out of noday's crisis brought about by years of self-protection on the part of the profession and an appalling apathy and lack of foresight and funding by successive govern-

season's styles.

A suitable case for treatment

Mr Kenneth Clarke, Minister of Health, points to the capitation study as evidence that the Government is finding out whether it will provide a better standard of dental care. He is conscious there are too many dentists and points to the 10 per cent cut in dental students intake implemented last year. Mr Clarke said: The Government is concerned to cut abuse but we have to ask ourselves whether the amount we spend in deterring abusers is not more than the abuse actually costs". A Green Paper will be published before Christmas, and Mr Clarke added: "We are considering bringing forward the replacement of the computer at the Denial

This will be welcome news to the BDA which regards the computer as outdated and the information it supplies, regarding patterns of treatment, as obsolete.

THE TIMES **DIARY**

The case of Dr Patel

The career of the new director of the London School of Economics, Dr L G, Patel, has not been without its travails. In 1976, when he was deputy administrator of the United Nations Development Programme in New York, his former Filipino domestic servant, Nativdad Diza. joined her sister Perlita in filing a Som suit against him and others who, they claimed, had "imported or employed persons below minimum wages and under conditions of involuntary servitude." The sisters said they were forced to work for up to 14 hours a day, seven days a week, and were forbidden to leave the premises except on business. A Manhattan judge dismissed the case "for failure to state a legally cognizable claim," although he did say he was "not unmoved by the sisters' plight." By then Dr Patel, who had throughout strenuously denied the charges, but had understandably claimed diplomatic immunity, had returned to India. Yesterday Dr Patel said: "We looked after her every need and she went back happy." An LSE spokesman said the selection committee had been aware of the case.

Red rag

Sir James Goldsmith, incensed by jibes that after three years his £50,000 prize for exposes of Soviet infiltration of the western media is still unawarded, tells me he is determined to find a worthy recipient next year. Journalists in search of easy loot should not call him; he will call them. The presentation will be made on October 8 - the anniversary of this month's settlement of Der Spiegel's libel action against him. Sir James's belief in the communist threat is as fierce as ever; indeed he has even slipped journalists the odd fiver to encourage red-bashing, but won't

 Robert Maxwell's paranois continues apace: the Mirror Group is currently advertising for a barrister and a solicitor, emphasizing the importance of experience - in

Balancing act

Daily Telegraph journalists fear they have lost all credibility for political independence following the disclosure at the weekend that Sir Geoffrey Howe's new PPS. Richard Ryder, MP, is to write leaders for the paper. They contend that he cannot comment impartially in the Telegraph while carrying out his duty to promote the Government. Ryder's first leader was due today but he failed to write it because he was unwell. He protested that he will not comment on foreign affairs, and will only be doing Sunday relief. "You mean there is a feeling that I could be biased." he asked. "Well that is not for me to comment."

Cross purposes

Brian Crozier, founder of the Institute for the Study of Conflict, says he has chosen to write a novel about Soviet espionage because the "British law of libel is a very real obstacle in factual works." For the book. The Andropov Deception, he has adopted the pen name John Rossiter. It is not fictional enough to avoid other difficulties. The agent for a real-life John Rossiter, expoliceman and crime novelist, has written to Crozier's publishers. "Andropov" I've never met the chap," he says,

Will coal stocks see us through the winter? Steve Thomas, Jim Skea and Chris Langdon make some predictions based on aerial photographs of supplies at key power stations

Why the lights could still go out

Since the miners' strike began in March there have been a series of dramatically conflicting predictions about when the lights would go out as power stations run out of coal.

Not surprisingly, the predictions usually support the interests of the side making them. Moss Evans, leader of the Transport and General Workers Union, claimed 10 days ago that there would be power cuts by November. Mrs Thatcher, on the other hand, said last month: "There are not going to be power cuts this side of Christmas, and I don't believe there are going to be power cuts the other side of Christmas".

independent analysis who have tried to estimate the size of power station coal stocks have had to contend with a lack of hard information. Generally they have had to do their best with informed

company made a detailed assess-ment of coal stocks at ten of the country's largest power stations, six in the Trent valley in the Midlands, and four in south Yorkshire. These ten stations together comprise more than half the country's coal-fired capacity. The survey used standard but very sophisticated methods of calculating volume from aerial photographs as used by the company in its work for the Coal Board and the Central Electricity Generating

The results show that the stocks at the Yorkshire power stations are very low. Eggborough had 471,000 tonnes and Ferrybridge 640,000 tonnes, enough to last each four weeks at full burn. The other two. Drax and Thorpe Marsh, had respectively, three and seven weeks full-output supply. These four stations have not received any new supplies since the strike began.

By contrast the stations in the Trent valley have been receiving supplies from the nearby working mines and the Midlands opencast sites at a rate of at least 600,00 tonnes a week. The largest, Ratcliffe-on-Soar, has 1.3 million tonnes, enough to run for nine weeks flat out. Cottam and West Burton each has more than one million tonnes, enough to last at least eight weeks.

These figures were compared with secret CEGB figures for regional coal stocks in England and Wales. The two sets of figures tally almost exactly and suggest that stocks are low in all areas except the Midlands.

The figures as a whole seem to present a much less rosy picture than the Government's pronouncements: but is is also clear that coal supply problems will not arise until late winter.

The key factor is demand for electricity during the winter months. Usually it rises from 25GW at night to 37-40GW during the day. Coalfired stations normally provide 81 per cent of electricity, nuclear power 14 per cent and city, nuclear power 14 per cent and oil-powered stations

This winter, if the strike con-tinues, we estimate that oil and nuclear stations will provide 50 per cent of supply. The Midlands power stations will be able to provide a further 30 per cent. But if the CEGB is to cope, it will have to rely on the stations outside the Midlands to provide the last 20 per cent. The key question is, do these stations have enough coal stocks to provide it?

Computer simulations by the Science Policy Research Unit at Sussex University predict that, at average winter conditions, stocks at the power stations outside the Midlands will fall from 6.8 million

Major Power Stations

COAL @ OIL (1)

tonnes at the beginning of October to 5.3 million tonnes by early December and 4 million tormes in January. By early February there would be only 2.5 million tonnes, and by March levels would be

Stocks in the Midlands would still be high: 6.1-million tonnes, a net drop of only 1.3 million tonnes since October, but the Midland stations do not have the capacity to fill the gap left by the other areas. Overall, peak demand throughout the county could not be met.

The achievement of the CEGB's engineers in delaying the point at which either power cuts must begin or the Government must take the major step of attempting to move coal stocks from strike-bound pits has been remarkable. Their success is undoubtedly due to more than simply running operational oil-fired stations to their maximum extent. Oil stations such as the Isle of Grain, Ince and Littlebrook have been taken out of mothballs to substitute oil for coal. Kingsnorth, a dual station which normally burns coal has probably been switched to oil. A small dual-fired coal/gas station, Hams Hall, may also have switched.

Oil firing has also been introduced into some stations officially designated coal-burning. At two "shifting stations" such as Didcot, which are turned on during the day to meet demand fluctuations, oil burners are normally used to start the station up. By running these oil burners continuously it would be possible to conserve coal stocks by between 10 per cent and 20 per cent Also, some of the newer oil-fired stations may be capable of generating up to 10 per cent above their designed output, though for how long this could be done without

the plant is not an easy question to answer. Regular supplies of up to 600 megawatts, the equivalent of the output of a large station, are being received from Scotland, which has

But despite the CEGB's ingenuity seems unlikely that it will be able to avert a shortage in late winter. If this is indeed the case, the CEGB and the Government have a number options open to them. The Government could introduce volun-tary "Save It" campaigns and, if these were not enough, could ration electricity for street lighting and domestic use. But these measures would cut demand by only 2 - 3 per cent. Measures such as the reintroduction of a three-day working week would be more effective, but even then consumption would be cut by only about 15 per cent.

It would be possible for the CEGB to bring in imported coal from its stocks in Rotterdam, which are reported to total more than 2.8 million tonnes. These stocks could be moved to the coal-fired stations on the Thames such as West Thurrock and Tilbury, which have adequate unloading facilities. Alternatively, coal stockpiled at the striking pits could be moved to the power stations. This would require whole fleets of lorries. It has been estimated that it would involve 50,000 lorry loads to move 1.25

THE ENERGY GAP

Normal winter

Main Street in the firing line

Jayne Anne Phillips: writing from real life

Catch phrase

New words for old, by Philip Howard

Phillips explains: "I think children inherit, not just gestures and features from their parents, but also their parents' unresolved histories."

The book is set in a small town in West Virginia, like Buckhannon, where the novelist grew up. She says that all the sensory details are taken from her own childhood, together with some of the broad strokes of family life. Her father worked in the construction business, her mother was a self-educated school administrator - closely paralleling the parents in the book.

is on offer, to call for "a pint o"

Legionnaire's."

This new phrase illustrates a

number of characteristics of slang. It

shows how fast the sort of

sensational news that is presented in

black headlines three inches deep in

the pop tabloids affects the language.

It illustrates the emollient propen-

sity of slang to mock the distasteful.

brighten the gloomy, and say the

It exemplifies the sharpness of Glesga talk: "Awawn dunk yer doughnut". But the local point of the

metaphorical use of Legionnaire's means, I think, that it will not

Phillips learnt the art of waitressing early in life, just like her heroine Danner. As a schoolgirl she wrote poetry, escaping from family tension into its privacy. I've always been glad I came from a family that wasn't literary or academic. There is a kind of genuine innocence in that sort of life – and I have a protectiveness towards it."

It is easy to see, then, the genesis of the novel's structure. Moving slowly, with a feeling of accident, it cases the characters into the reader's

language is continual and irresist-

ible. Some new words are so noisy,

like a pint o' Legionnaire's, that we notice them at once. Other new

words creep into our vocabularies by

stealth, so that one day we sit up with a jerk when we find ourselves

saying or writing them. A friend of nime who is the features editor of a

famous old national magazine

stumbled over the phrase "sight

unseen" in a contributor's copy the other day, and tried to replace it with the simpler and shorter word

unseen". The contributor objected

and the odious phrase stood.
"Sight unseen", when you stop to

think about it is an odd ohrase, a

kind of chimera with the head of a

"I wanted the reader to gain a sense of the delicacy and precious-ness of ordinary life. You know, all the rituals? So that the reader would have a sense of loss - of what is lost - when this one kid, out of all the hundreds of thousands killed or maimed over there - was subtracted from his family. Then if you multiply, you can start to see what effect it had on the country as a

She says: "Fiction should show how events and people connect. And demand a reaction from the reader a kind of intelligent taking on of responsibility. I hope Machine Dreams does that."

She apologizes for being "kinda frazzled right now", but it is understandable. She sits amid packing cases. She is expecting a baby in December and will move, with the father, to a new life in the prosperous Boston suburb of Brook-line - "we shall need the space" turning her back on the obscurity of

Jamaica Plain.
So we drive to the new house, and she seems relieved to instruct the painters, and ask my advice on the colour of the kitchen doors. A large sunny room with a glearning wooden floor will be her study; a dolls house (made for her as a gift by her lover) stands alone in the middle, like an empty book waiting to be filled with people.

But no hurry. Machine Dreams took four years to write and, although she has ideas, she will wait. Jayne Anne Phillips was a drifter, a traveller, someone who moved from worlds of motel and cheap kitchens, to writing schools and literary magazines and who never expected this happiness to happen. So the brand new crib in what will be the baby's room, the new fence,

the second coat on the dining room ceiling - all these changes preoccupy her now: the customary rituals of creating ordinariness. *Black Tickets is published by King Penguin Books, £2.95. Machine

Dreams is published by Faber & Faber, £8.95.

tautology, the tail of a contradiction, and the body of a goat. It has come into the language only recently, but it is recorded in all the latest dictionaries. I guess from the exemplary citations that they give, about buying a car sight unseen, that the phrase comes from the flash and prolific jargon of car sales. On the other hand it might just indicate, as Robert Burchfield of the OED argued devastatingly in the latest edition of *Encounter*, that lexicogra-phers are the world's greatest

I think it is just an attempt to sound trendy: "unseen" does the same job more economically. I resolve never to use it myself, and to remove it from the copy of any contributor, be he or she as emment even as the Queen Mother_

Philip Howard's The State of the Language: English Observed is published by Hamish Hamilton today at £8.95.

Edward Mortimer

Follow my leader, American style

I went to Washington the week before last for a "leadership seminar" at Georgetown University. The idea was, apparently, for assemble a group of foreign "leaders" and instruct them in the arts of American leadership - how Americans lead each other, and how they try to lead the rest of us. Of course I am not a leader, only a leader-writer; but when offered an invitation like that it is foolish to quibble.

Americans do not believe in doing things by halves. Having once not us all in Washington for a week they made sure that every minute of it. was filled, from "breakfast roundtable" to working dinner, with top-level "presentations" on almost every imaginable area of policy, foreign and domestic. As often as not the speaker was a senior member of the present administration, but we also heard dis-tinguished members of the previous one, as well as independent economists, political commentators and even theologians.

What struck all of us foreigners, I think, was the extraordinary buoy-ancy and self-confidence of the current American mood. Having lived in America at the time of Reasan's election, and through his first seven months in office, I remembered his supporters as people given to a rather alarmist view of the way the world was going, and preoccupied to the point of obsession with the menace of Soviet

All of that has gone. After nearly four years in office, these people exude an impressive serenity. If they have not already solved all the world's problems, they really seem to believe they are well on the way. Far from being obsessed with the Soviet menace, their attitude to the Russians is condescending, almost indulgent. US-Soviet relations, we were told, are not as bad as they may sound: witness not only the recent Gromyko visit but the agreement to upgrade the "hot line" and various other quiet diplomatic dealings. True, there is a lot of anti-American rhetoric in the Soviet media, but one should not take too much notice of that. The Soviet leadership is currently passing through a difficult transfer of power from one generation to the next (needless to say, the fact that Reagan and Chernenko are the same age is not much emphasized), but once this is resolved, if not sooner, it can be expected to return to arms control talks on more or less the previous basis. Why? because the creaking Soviet economy cannot face the strain of the aext lap in the arms race, the "star wars" lap.

The American economy, by contrast, is booming. To the crucial question "Are you better off now than you were four years ago?" a majority of Americans can cheerfully answer yes, and does not appear unduly worsied about the minority, comprising most of those who were worst off to start with, which would have to answer ac.

Inflation is down to 4 per cent. Unemployment, which peaked at 10.6 per cent in 1982, is now 7.4 comparing favourably with almost all European countries. The "misery index", invented by President Carter to express the combined effect of. inflation and unemployment, now stands at 11 per cent compared to 20 when he left office. It is true that real interest rates - i.e. the cost of borrowing money over and above what is required simply to maintain its purchasing power - are two or three times as high as they have ever been in peacetime. But the psychological impact of this on Americans is small, partly because the actual figure a bank charges on a given sumof money is so much lower and partly because the rates are attracting an enormous inflow of foreign capital which fuels the boom. That in turn keeps pushing up the value of the dollar, making imports and foreign travel cheap and helping to

hold domestic prices down.
It all seems very unfair. While the US government sternly admonshes Israel and various Latin American countries to get government spending under control in order to service their debts and stabilize their currencies, at home it practises the opposite of what it preaches, running a current account deficit on its transactions with the rest of the world of \$80bn, with apparently excellent results. Former US treasury secretaries of both parties waru Reagan he must reduce government borrowing by taxing more or spending less, or preferably both. He solemnly swears to do neither, and the rest of us scramble to lend him more and more money.

"Expectations", a well-known-economic pundit reminded us, "are very important in economics". The mood in US business circles is. definitely "up-beat", and to a large extent this is self-fulfilling. The same gentleman saw no economic future for Europe except as "a museum". At this point at least one European in his audience was tempted to remind him that the mood was also rather "up-beat" in the summer of 1929. Similarly, when hearing about the inability of the Russians to bear the cost of the "star wars" race, I could not help remembering the recent thirty-fifth anniversary of the Soviet Union's graduation to nuclear power status - an event so many Western experts had predicted could not happen, or at any rate not for many years. Nothing is certain in this life but

two things strike me as probable, One is that the Soviet Union will make almost any economic sacrifice rather than accept a position of permanent military inferiority to the United States. The other is that a boom fuelled by massive government borrowing overseas to finance an enormous foreign trade deficit will sooner or later go bust. But I expect I have got it all wrong. Let's hope so, because it will be no fun being proved right on either count.

Anne Sofer

Back to your own chairs, everyone

Despite all the furore, most people do not realize how silly the Government is being over the GLC. The House of Lords may have knocked the biggest constitutional outrage out of the Paving Bill, but it left plenty of smaller nonsenses intact. One of these is the requirement that the letting of any of the thousands of flats the GLC still manages, and will continue to manage for the next two years, is subject to Department of the Environment approvel.

This is part of "removing a tier of government." in fact, looking back over that opening sentence, "mad" would be more accurate. Relations: between national and local govern-ment have reached a level of psychotic distrust in which the only ctivity permissible is a sort of Mad Hatter's musical chairs. The main rule is "Whatever your job is, do somebody else's". Thus while the Department of the Environment allocates flats in Bethnal Green, the GLC runs the Northern Ireland Office - or pretends to.

And there is the difference, Local government's forays into national and international policy-making may irritate or inspire but they have no more immediate effect than does the peace women's idealistic gesture of declaring the Greenham Common duck pond a nuclear-free zone. By contrast, when national government decides to wade into local government's territory, it does so wearing steel-capped wellies.

The GLC example is not a one-off anomaly. It is an extreme and highly visible symptom of a general malaise, a malaise of frustrated muddle at the heart of the Tories' local government policy.

It is all about the delivery of services. At the centre of Thatcherite thinking is the conviction that the ideal form of service delivery is by private treaty between customer and provider - hence the sale of council houses and the educational assisted niaces scheme. But it has now been realized that

this philosophy cannot be taken to. its logical conclusion without a radical redistribution of wealth and power every family cannot be potential home-owners without something like a negative income. tax and a big house-building programme a universal voucher system in education cannot be operated without both a large. increase in public spending and a significant interference with the independent schools admission

Similar frustrations have companied the drive towards the "next best" form of service delivery

been shifted by compliant Conservative councils from directly employed labour to independent commercial undertakings, but the impact on overall costs and efficiency has hardly been earth-shattering. Society is not going to be transformed, or government got off our backs, by such relatively minor changes. Hence the Government is forced

back on a dependence on local government to provide basic-services. To rub salt in the wound, Whitehall knows that local government has been more efficient at cutting expenditure over the last five years than it has itself. The Government, psychologically incapable of accepting with good grace that it is stuck with the existing relationship, is behaving like arr erring spouse returning reluctantly from a dream romance; growling and sulking and treating its mate as the wholly guilty partner. The conventions of joint deliberation are abandoned and a programme of orchestrated criticism and public humiliation is embarked on. If it were not for the state of total

war that exists between the Government and Labour local authorities. the bad relations with Conservative councils would be getting more prominent headlines. As it is, almost every week there are stories of furious meetings of the Conservative-controlled Association of County Councils, and angry warn-ings about the forthcoming rate grant settlement. In large part this is caused by the Government's remorseless retraction of funds. But it is also because of the new practice of suddenly, and without consultation, changing the rules.

Pacing with fidgety frustration, around the problem of public spending as if it were some sort of giant board game, ministers keep moving services from one place to another, pouncing suddenly as if a bold gambit, that just might prove a winner, has been made. Some counters (vocational education, London Transport) are moved from local to national management; others (housing benefit, community care) are moved from national to

Institutional marriage guidance is badly needed. Perhaps the latest new inquiry into local government finance which Patrick Jenkin has so unconvincingly announced may contain one or two experts great and good enough to utter some wise and healing words. Most people, by now, think that it's too late for them to have much effect.

THE IRISH DIMENSION

course was the instinctive response of ministers to the outrage at the Grand Hotel in Brighton. It is also the rational response after reflection.

The course of British policy towards Ireland was summarized for the Brighton conference by the new Secretary of State, Mr Douglas Hurd. It is rooted in the maintenance of the union with Northern Ireland in accordance with the emphatic determination of the majority there. It has three strands; to prosecute the campaign against insurrectionary violence; to continue to seek out common ground between the political parties in Northern ireland; and to foster good relations with the Republic of Ireland. After an attempt on the lives of members of the Cabinet it is natural and right to throw into relief the first of those components, the suppression of terrorism. But not being bombed off course means keeping all three components in play.

The policy is criticized from the left for the absence of any positive reference to Irish unification. It is criticized from the right for conceding too much to terrorism. You cannot, it is asserted, placate the IRA. But nobody in authority supposes that you can. Placating the IRA has formed no part of government policy, at least since Mr Whitelaw's processulate are constituted. Whitelaw's proconsulate more than ten years ago when they tried talking truces with the Provisionals. Assuaging the grievances and fears of the nationalist minority in the province is another matter, and that does form part of government

That is in line with rule one of the manuals on counter-terrorism, which is about winning the hearts and minds of the population that spawns the terrorists. The terrorists themselves are implacable. But the communities that shelter them in this instance, are not, being variably less fanatical, motivated, discontented and fixed in hatred. In the classic metaphor, policy must seek to deprive the fish of the water in which they swim,

The nationalist community in Northern Ireland (not by any means coextensive with the Roman Catholic community) is the one substantial section of the island's population that is not seated comfortably in the rough and ready dispensation of partition. The grievances of northern nationalists, real or imagined, historically conditioned or presently experienced, are the elements into which the Provisional IRA was born and in

Prudence suggests those grievances must be attended to, those fears reduced. Otherwise the sting of republican violence in Northern Ireland, spilling outwards over the British Isles, will not be drawn, save by methods of military repression more extreme than any British govern-ment is likely to have support for over the full period of time the methods would have to be given

To this analysis it is objected that what animates the Provisionals is not other people's grievances but their own hopes. Starve them of hope that they

Journalists on both sides of the

American sense - that is, left of

centre. The popularity of a

conservative populist President

We shall not be bombed off Ireland and the imposition of revolutionary socialism throughout the island) and they will face the facts, ground arms, and bide their time, as other generations of IRA commanders have done since 1922. Any concession to the nationalists in Northern Ireland will be seen or twisted by the Provos and their apologists in Sinn Fein as a concession won by them and a measurable step towards victory. By accommodating any part of the demands of northern nationalist the Government furnishes the terrorists with hope, which is the sustenance of their campaign.

> That is a conclusive argument against granting any concession which really is a preliminary to the abandonment of British responsibilities in Ulster, or making any move which carries a clear implication of that kind. But by no means everything the nationalists are looking for is of that description. And to advocate the refusal of even non-unificatory concessions to the northern nationalists on the ground that the IRA will choose to misrepresent them for the benefit of its own morale is to overlook the security impli-cations of the Irish border.

The organization of the IRA, its supply lines and its recruiting grounds straddle the border. The cooperation of the authorities in the Republic is required if the IRA is to be squeezed out. That cooperation is to an important extent conditional on the Northern Ireland administration doing right (as Dublin sees it) by the nationalist community there: Thus the effectiveness of any counter-terrorist policy in its security aspect depends crucially on Anglo-Irish cooperation, which in turn depends on how Britain deals with the unsettled minority in the North.

The linkage is dubious. Is not the threat posed by the IRA to constitutional government in the Republic plain enough for Dublin to cooperate in its extermination without conditions? Yes, but it has to be recognized that there are practical political restraints on how far. any Irish government can go in joining a British government in an offensive against the IRA without first, or at the same time, achieving conspicuous betterment of the status of the northern nationalists. Irish ministers are their self-proclaimed protectors and guarantors. If Dublin is to join forces with London and Belfast in smashing the terrorists' way of improving the political status of nationalists in Ulster. Dublin has to show that it has a better way that

Now it may be the case, and at one time it looked to be the case, that the full exteint of the Republic's law enforcement will not be applied comperatively against the IRA unless the British government somehow signifies an intention to commit its influence to the achievement of Irish unity. If so, one might as well stop looking for Dublin's participation in a joint drive against republican violence; for the price demanded, payable in broken faith and civil war in Ulster, would be too high. It would then be necessary to fall back on unilateral measures can get to their objective (expulsion of the British presence in make the border more secure

and points of entry from Ireland to Great Britain subject to closer control

However, the glosses Dr Garrett Fitzgerald has been putting on the report of the New Ireland Forum point to a different conclusion. Their significance is that Dublin may be signalling that it is not now setting as a condition for har-monious relations and uninhibited collaboration in security a requirement that the British government esponse the cause of lrish unity, or offer its best endeavours to win consent for it, or establish a framework in Ulster capable of rapid conversion into Irish federalism, or perform some other crab-like motion in that direction; rather that Dublin acknowledges the reality and durability of the Ulster unionists' grand refusal, and is ready to settle tacitly in this generation for arrangements that give the northern nationalists practical assurances that (in words the Unionist party itself has extended to them) "the province is theirs also", and that they have a window to the south. If that is so, the ground has

. It is to be hoped that the machinery of the Anglo-Irish intergovernmental council and unpublicized meetings between British and Irish ministers are being used to test the truth or otherwise of that impression, so that Mrs Thatcher when she meets Dr Fitzgerald as expected next month will be in a position to form a judgment for herself.

If that impression is correct that Dublin (without burying the "national aspiration") is not looking for gestures or action bearing the hallmark of unification, but is looking for new ways by which the nationalists can be induced to play a full part in the public life of the province under British sovereignty for the time being and for as long as the majority holds to that allegiance; and if Mr John Hume's SDLP. which was of course a participant in the new Ireland Forum, is also of that mind; then the British Government should be generous in its examination of ways and

It should be ready to look again at possible provincial institutions, lines of cross-border consultation, and inter-government and inter-parliamentary forms, always provided they do not actually compromise or call in question Northern Ireland's status as a part of the United Kingdom.

It will be necessary to proceed gradually and to carry the confidence of both sides of the community in Northern Ireland. Ulster unionists are owed a political leadership that is capable of distinguishing between conciliatory moves which do and conciliatory moves which do not put the union at risk. Their political friends at Westminster have a special responsibility in that respect. And they are owed a leadership that has the frankness to tell them that the union is most perhaps only - endangered by weariness on the part of the English, Scots and Welsh at the apparent inability of the members of the Irish component of the kingdom to take even small steps together to compose their inveterate sanguinary quarrel.

LETTERS TO THE EDITOR

Tebbit rescue

From the Secretary of State for Trade and Industry

Sir, Since there has been some comment, both in Parliament and the media, on the decision to televise my rescue from the rubble of the Grand Hotel, I think it may be

of the Grand Hotel, I finne it may be helpful for me to make known my own (admittedly subjective) view.

I understand those who, with my interest and that of others who may be in similar circumstance in mind, have criticized the benedicast as an have criticized the broadcast as an invasion of privacy. Had I been asked before the event a hypothetical question on the issue I, too, would have said it would be wrong to broadcast. I now believe that is wrong and the BBC was right.

My view has been shaped by knowledge of the reactions of many people who have written or sent messages to me. They and millions like them of widely differing political views and in many countries were shocked and dismayed, perhaps in some cases disillusioned, by the wanton violence and evil of those who use bombs to maim and kill, rather than democratic means, for political ends. Perhaps, too, the TV coverage will have reminded us of the quiet courage and skill of the emergency services on whom we all depend, but hopefully few of us have occasion to

I remain of the view that it would be wrong to transmit such pictures of the distress of victims of, say, a railway accident, but this was no accident; it was murder and attempted murder and it was an event of public and political importance. Yours faithfully, NORMAN TEBBIT,

Stoke Mandeville Hospital, Mandeville Road, Aylesbury, Buckinghamshire.

Competitive cars

From the Director of The Society of Motor Manufacturers & Traders Ltd Sir, Your leader "Competitive cars" (October 16) was right to draw attention to the importance of the motor industry, right to focus upon the problems of production scale compared with other motor manufacturing nations and right, too, to note that the drive for competitive-

ness is not yet over.

The motor industry in Britain believes that there is indeed potential for further growth, with its associated scale economies, if the constraints upon the industry to which you referred - e.g., the discriminatory car tax - were removed, and if all concerned realize the importance of achieving competitiveness in costs.

You were wrong, however, to suggest that the manufacturers were able to frustrate a free market; and your advice that the industry should cease to resist full competition within Europe was not based on a sound analysis of the realities of that

in particular, the EEC's proposals to enforce harmonization of car prices in Europe would pose a serious threat to the industry's survival. There is no common market at present and never will be so long as countries have different fiscal policies, different rates of inflation, fluctuating exchange rates and different political regimes. In these circumstances it is misguided in the extreme to hand price control of any commodity to bureaucrats in Brussels.

At a time when attention is increasingly focused on unemployment, the health of an industrial sector which provides in total more than a million jobs, and its ability to secure those jobs and create others,

is of the first importance.

The motor industry will, in the months to come, set out in detail the steps necessary to secure that health, one of which is a minimum of legislative interference — be it by Whitehall or Brussels. Yours faithfully,

ANTHONY FRASER, Director, The Society of Motor Manufacturers & Traders Ltd. Forbes House, Halkin Street, SW1. October 18.

Trials in Yugoslavia

From Mr Anton Logoreci From Mr Anton Logoreci

Sir, Writing about her recent expulsion from Yugoslavia because of her contacts with critics of its communist regime (October 11), Nora Beloff says that Milovan Djilas "is treated as a political leper by Western diplomats who share his values but not his courage".

In fact, Western governments as well as diplomats have maintained more or less the same attitude to the

more or less the same attitude to the many hundreds of young Albanians who have been sent to prison in Kosovo and Macedonia since the student riots of 1981. Trials are still being held more than three years' after those events.

For instance, at the beginning of last July, seven Albanians in their early twenties and two minors were sentenced by a court in Prishtina to from two to ten years, Early this month, six Albanians aged from 17 to 27 were given prison sentences, by a court at Pec, ranging from eight months to seven years.

These and numerous other trials

that have taken place since 1981 have never been referred to in public, let alone condemned, by any problem. Western government Such pusillanimous silence clearly does nothing for the wretched persecuted Albanians of Yugoslavia. But it also does nothing for the political stability, cohesion and, ultimately, the independence of Yugoslavia itself. Yours cincerely

ANTON LOGORECI. 18 Disraeli Gardens. Fawe Park Road, SW15. October 16.

TV showing of the Common aims for defence in Europe

From Sir Clive Rose

Sir, What are you trying to tell us in your leading article on "Europe's nuclear triangle" (October 24)? That the Federal Republic has lost faith in the American commitment and is likely to go either nuclear or neutralist? That Britain and France might ofer - or the Germans request - their nuclear forces as a credible alternative to the American guarantee? That France has no defence commitments in Europe other than the defence of French territory?

If true, the first proposition should make our flesh creep. But there is no hard evidence to support it. The "peace movement" in West Germany is strong and vocal: it is anti-nuclear, anti-American and anti-Nato. But it is not about to take over from Chancellor Kohl's government, which was elected last year on a platform based on precisely the opposite of these policies and has demonstrated by its actions its support for Nato and for actions its support for Nato and for the decision to deploy American missiles in Europe.

The national aspiration for reunification has always been recognised and respected by West Germany's allies, but the neutralist route - if it ever existed - was rejected by the West Germans in 1954. Its dangers are as evident to the majority of Germans today as they were then. As for a "nuclear" Germany, it would do more than rule out hopes reunification. Apart from being a direct breach of the German undertaking in the Brussels Treaty, it is difficult to think of any action by the West which the Russians would regard as a more flagrant casus belli. Is there any serious constituency in the Federal

serious constituency in the Federal Republic for this course? I doubt it. The second proposition really has no foundation. There is no informed support in any of the countries concerned for the idea that the two national nuclear forces, either separately or jointly (and that raises some big questions) could take the place of the Americans. Within what strategic concept or political frame-work (short of a federal Europe) would this idea be viable? What sort

of assurance could the West Germans have that the minimum strategic forces under the indepen-dent control of the British and French governments would provide a credible deterrent to a Russian

attack on the Federal Republic? As to the third proposition, one need only refer to the obligations which France has assumed under the two multilateral defence treaties to which she is a party. Both the Brussels Treaty and the North Atlantic Treaty commit France to provide military assistance to any party which is the victim of an armed attack. France's absence from the Nato military structure since 1966 is a major disadvantage, which weakens the Alliance's defence posture. But it does not in any way affect France's treaty obligations, which no one doubts would be

honoured to the full.
You are right to emphasize the importance of bilateral defence relations between France and her principal European allies. This can go some way to mitigate, though it cannot eliminate, the weakness referred to above. It is, of course, no substitute for the continuing multi-lateral planning and discussion of strategy which goes on in Nato. This is why you are also right to stress the limitations of moves towards a "European defence dimension". To the extent that these lead to a stronger European defence contribution to and voice in Nato they are to be welcomed. But any idea that such a "dimension" should develop in some way separately from or outside Nato would risk undermin-ing the whole basis of Western

A key issue for bilateral Anglo-French discussion must be to establish a common objective for defence co-operation in Western Europe, for example, the French initiative to revitalise the Western European Union. Yours faithfully, CLIVE ROSE. Chimney House, Lavenham,

Imperilling union

From Mr Vernon Bogdanor

Sir, Your leader of October 25 is itself eloquent evidence that, as President Mitterrand has tactfully hinted, British and French attitudes towards the future of Europe are not the same. The Preamble to the Rome treaties pledges the signa-tories "to establish the foundations of an ever closer union among the European peoples". Yet, when practical proposals designed to achieve this aim are endorsed by a majority of MEPs from every member state of the European Community, except Denmark, your response is to dismiss them as unworthy of consideration.

Can there be any doubt, however, after the recent elections to the European Parliament, that the institutions of the Community appear to the electorates of the member states as remote and ineffective? Moveover, the likely accession of Spain and Portugal in 1986 is bound to place even more strain on the convention of unanimity in the Council of Ministers.

Oxford October 25. international agreement exists which requires any food used in an official aid programme to be charged against aid budgets at market price. The increased use of surplus food as aid, under these circumstances, would seriously reduce the aid funds available for development projects.

Four years ago the Agricultural Committee of the House of Commons, following a detailed investigation of the use of surplus dairy products in food aid programmes, recommended in its report that this agreement should be done away with. But for this agreement milk powder for Ethiopia could be subsidised in the same way that it is for animal feed. Surely the needs of starving children should take pri-

ority over feeding animals.

If the agreement referred to by the Agricultural Committee prevents larger quantities of surplus milk powder being made available for starving children, immediate action needs to be taken to revoke this Yours faithfully, S. F. BARNES.

Safe tenure

From the Director of Shelter Sir, The reports from the Conservative Conference that the Government are contemplating reducing security of tenure for private tenants come as no surprise but are depressing nonetheless.

It is, of course, true that the private rented sector has, histori-cally, been discriminated against. Whereas governments have subsidised the costs of owning and renting from public landlords, they have, in effect, used rent control to avoid having to do the same for private tenants.

Four years ago, in an attempt to encourage new investment in rented homes, the Government introduced the concept of "assured" tenancies. Basically, this allowed registered landlords to let homes at economic rents. These landlords were potentially major investors for whom security of tenure was not a

The assured tenancy scheme has failed because economic rents are so high in relation ot the costs of a mortgage. It took off briefly when providers of assured tenancies were given the opportunity to claim capital allowances, an advantage inadvertently removed in the 1984

Budget.

If economic rents are not sufficient to encourage investors, all that removal of security will do will Sudbury, Suffolk. October 24. The danger is one of total deadlock and *immobilisme* in Community institutions. The practi-

cal realities of the European Community demand, therefore, that

a fresh look be taken at its structure and method of operation. "The unity of the Community cannot", you declare, "be achieved by trying to enforce it through institutions". That is precisely why the Government, which supports the Community, should play its educat-ive role in stimulating a debate about the future of Europe. Otherwise. President Mitterrand's avowed sympathy for the aim of European Union could lead to this union

participation. It will then be too late to complain, as we did after the Rome treaties were signed, that the arrangements reached are inimical to our own national interests. Yours faithfully,

coming about without British

VERNON BOGDANOR. Brasenose College,

From Mr S. F. Barnes

Ethiopian relief

Sir, I have just arrived from India where the Indian Express. September 2, referred to the huge stocks of surplus food in the EEC under the heading: "Human food going to animals". The paper reported that the EEC will spend \$950m (approximately £780m) this year in giving surplus human food, including 1.3 million tons of grain and 1.8 million tons of powdered skim milk, to

It has been known for over a year that the shortage of food in Africa would become critical, a fact that seems to have been largely ignored by the EEC Commission. It is difficult to understand how any Western government holding huge stocks of surplus food can get rid of it by heavily subsidising its use as feed for animals while, in poor countries, children starve to death.

The EEC allocates some 10 per cent of its surplus food to food aid programmes. The reluctance of the EEC to increase this allocation is perhaps understandable while an

be to enable landlords to get vacant possession more quickly, and either charge grossly high rents or sell to would-be owners. We desperately need more rented housing but we

12 Palace Street, SW1. October 25.

Yours sincerely. NEIL McINTOSH, Director,

will only get it when government acts on the ridiculous imbalance in

the subsidies available to owner and

157 Waterloo Road, SE!, October 12.

Cards of identity From Mr Charles Fylle

Sir. In answer to Mr Richard Fiennes (October 17) we did indeed have identity cards during the war and pretty useless they were. Crime flourished, as always, and there were some 50,000 deserters who were never caught although identity cards Hic jacet . . . were necessary to obtain a ration book and employment cards.

Identity cards give employment to civil servants, a lovely sense of power to those who can demand to see them and, like the passport, are a nuisance to the honest man and no deterrent to the dishonest one. Ask Mr Ronald Biggs, Dr Pontecorvo or the rumoured unextraditable crook. living on the Costa del Sol. Yours faithfully, CHARLES FYFFE. 52 Holmdale Road, NW6. October 21.

Doubts on Unesco membership

From Lord Harris of High Cross and others

Sir. The record of the United Nations Educational, Scientific and Cultural Organization is deplorable. It has become thoroughly politicised and has adopted an illiberal view on human rights and a totalitarian view on the exchange of ideas and information. Its accounting pro-cedures are inefficient and there is no check on where the money goes. It is hostile to the West in general and Britain in particular,

The US has, quite rightly, given its withdrawal notice. The reaction of Unesco's Director General, Mr M'Bow, is to suggest some merely

cosmetic changes.

There are, in fact, no chances o: reform unless other countries join the United States.

It is vital, therefore, that Britain gives a year's notice of withdrawal, this will have considerable impact on other European countries and or less developed nations who apparticularly suffering as a result a Unesco's inefficiency. Yours faithfully.

RALPH HARRIS. IAN ORR-EWING, ALFRED SHERMAN, T. E. UTLEY. MICHAEL IVENS. 40 Doughty Street, WC1. October 26.

From the Director of the United Nations Association of Great Britain and Ireland

Sir. I was interested to read the report of Unesco's acceptance of Western proposals that there should be no increase in the budget for the two year period 1986-87 and heartened by Mr Al'Bow's assurance that he would not increase the remaining members' contributions to make up the loss of the United States contribution if that country leaves the organization. I hope very much that these developments will help the United Kingdom to decide to remain in the organization rather than to announce its intention to

The Government's main criticisms of Unesco seem to concern the nature of its programmes on communication and media questions and on human rights, peace and disarmament; the working of the executive board and the general conference; certain budgetary matters and maladministration and overcentralisation at headquarters. Some of these criticisms may well be justified but they are being highlighted in a manner quite out of proportion to the total work of Unesco.

Unesco has done and continues to do a great deal of very valuable practical work in the field. Its iteracy campaigns have had considerable success. It is deeply involved in the preservation of historical monuments and sites such as Venice, the Acropolis, the Plaza Vicja in Havana, the island of Goree in Senegal and Sri Lanka's Cultural Triangle. Its scientific work, for example, the International Hydrological Programme, the Programme on Man and the Biosphere and the occanographic research pro-grammes, is generally applauded. It is often forgotten that the United Kingdom benefits considerably from its membership of Unesco. A high proportion of Unesco scholarship holders and professionals are trained in this country and much equipment of Unesco projects is bought from

The United Kingdom Government has made a number of proposals for the reform of Unesco and it seems that they are being taken seriously. It would, in our view, be infinitely preferable for our Government to decide to remain a member and to continue to work from within for such reforms as it deems necessary. Yours faithfully. MALCOLM HARPER.

United Nations Association of Great Britain and Northern Ireland, 3 Whitehall Court, SW1, October 24.

VAT on books From Mr Winston Graham

Sir, Last year, when I was talking to a member of the Government. amiably pressing on him the desirability of taking VAT off the live theatre, he replied: "Do you want us to subsidise the Raymond Revuebar?"
Similar arguments are no doubt

being put to the Chancellor as to why he should subsidise (by failing to tax) the paperback trash that appears today on many bookstalls.
The unfortunate truth is that there is simply no way for the Government to take a swipe at such people without hitting the wrong targets. (No way, that is, without introduc-

ing some quality test, which would make everyone ridiculous.)

The ungodly will always flourish, and a VAT would hardly worry them at all. The introduction of what would be in us effect a Philistine tax would simply make life very much harder for the good author, a good publisher, and the good bookseller. Yours faithfully.

WINSTON GRAHAM. Abbotswood House.

October 20.

From Mr George Ball Sir, Last evening, with the exception of the headwaiter's, mine and a baked potato's, all jackets in the hotel dining room had been draped on the chair backs. Surely it is epitaph time for a

nation so lacking in decorum as to undress for dinner? Yours faithfully, 5 Wimborne Road,

G. BALL October 25.

which it has its being.

Atlantic dutifully report the virtual certainty of "four more years" for Mr Reagan. But most of them do not conceal their own surprise that this should be so. Mr Reagan is not popular with the media - or not, at least, with the East Coast elite that makes up the bulk of the serious commentators on American politics. Such people are for the most part "liberals" in the

makes the pundits uneasy: they see it as a paradox to be explained. The irritation and bewilderment of the liberal elite are strengthened by its lively sense of intellectual and cultural superiority to Mr Reagan. He is not and does not pretend to be a sophisticated man. He often gets things wrong. His grasp even of such a crucial matter as nuclear weapons technology appears, to sophisticated people, to be extremely shaky. Mr Strobe Talbott, the diplomatic corre-

spondent for Time magazine,

educated at Hotchkiss, Yale and Oxford, has established this

point in his book Deadly Gam-

hits, the timing of which one

might have thought devastating

for the President's re-election

campaign. Mr Mondale clearly hoped so, for he made a point of quoting the book in the Kansas City debate. And Mr Reagan, in answering him, made it clear that he still thinks a sea, or airborne nuclear missile is scunehow inherently more commol-lable than a land-based one. He also sounded thoroughly vague about what he meant by his offer to "share" defensive missible technology with the Soviett develops it.

Such points worry the intelligentsia. But they do not seem to worry unduly the majority of ordinary Americans. The latter are materially better off than they were four years ago. Mr Mondale warns them that that will not last because the federal deficit will have to be reduced either by increased taxation or by cuts in social security, or both. That is not a message that people enjoy listening to. It is much more comfortable to believe Mr Reagan when he says that things are going to go on getting better. Why should people believe that a policy which has produced lower in-

flation and more jobs with lower taxes is bad? That is part of the story, but only part. The other thing that

AMERICAN AND PROUD OF IT most Americans clearly like about Mr Reagan is his unashamed patriotism, his determination to win international respect through strength. His objective success in doing that is debatable: the verdict would be different in different parts of the world. But his proclaimed desire to do it, rather than to conciliate carping foreigners or to apolo-gize for the use of American power, is clearly in tune with a profound American mood.

> Mr Mondale's worst handican is that he reminds people of an epoch of self-doubt and national humiliation, which most of them believe that Mr Reagan has put firmly behind them. One can argue, and Mr Mondale does, that the Lebanese débacle was auctually a worse and more tunecessary humiliation than nything that happened during the Carter presidency. But that is of feet by the success in Grenada. an d above all by the general aura of firmness, coupled with sincere bea revolence towards whoever is prepared to meet him half way, which the President so brilliantly projects. What Mr Reagan start is for is what most Americans want to believe in: their own virtue and their own strength. It is what their allies

should want to believe in too.

What exactly is the Church?

By Clifferd Longley, Religious Affairs Correspondent

Leaders of the Protestant, Orthodox. Anglican. and Roman Catholic churches of Europe took their seats in the nave of the ancient cathedral of Trent, northern Italy, earlier this month to remember an earlier occasion in the same spot, the sixteenth-century its Scottish and Irish conse-Council of Trent which set the quences, still unresolved and scal on the Reformation split of

Christendom. They prayed under the same medieval crucifix to be led out of the impasse that that council had taken them into. Participants described it as

immensely moving and power-fully symbolic. Cardinal Basil Hume, of Westminster, presi-dent of the council of European bishops' conferences, called the event "an impossible dream" in his concluding address; the Rev Andre Appel, president of the Conference of European starter Churches, said for Protestants one... Trent could become a sign of Pre hope; and the Archbishop of church Trent, Mgr Allessandro Gottardi. declared to the assembly that "all must accept some responsibility" for the divisions and dissensions which were aggra-valed by the Council of Trent. despite its intentions to foster

renewal and unity.
The service itself was heavy with guilt, shame, sorrow, repentance, and hope. Outside the common people of Trent celebrated in the streets. . .

It was all a very long way from the streets of Belfast, Glasgow, Manchester or Milton

Keynes, though Trent was very initiatives and put them much part of the history of cach of them. Whether divided by or indifferent to religion, the common people of those streets are also children of the world born then. Trent scaled the English Reformation too, with its Scottish and Irish consesocially divisive.

Lacking all that Tridentine drama, a sumeting took place in London two weeks ago of leaders of British Protestant, aiglican, and Roman Catholic churches to search out the next stage in their more local journey towards church unity.

Its genesis was the parallel initiatives, earlier this year, by the Roman Catholic Church and the British Council of Churches, who simultaneously decided that the way forward started with "back, to square

Previous attempts to unite churches in Britain have concentrated on the exestion, and foundered on the exestion, of what is unity, and what conditions should be attached. But "church unity" is two words, and the new even more fundamental starting point is what is the Church?" It seems they had been asking the second question first, and not surprisingly getting nowhere.

In the middle of September a large gathering of British churchmen had met under the Archbishop of York, Dr John Habgood, to take the two 1984

together into a programme.
It was said to be the most comprehensive -church gathering ever held in Britain, with everyone from Black Pentecostalists to Russian Orthodox represented. The Roman Catholics sent an archibishop and two bishops, the past and present chairmen of the Anglican-Roman Catholic International - Commission

happen both to be English). Apart from setting up the working party which met two weeks ago, the group agreed to the intriguing idea that each church should prepare a state-ment of what it thought it was. In due course, it was intended, each will explain and defend its self-understanding to this or some other forum.

Each will therefore have first to formulate it. This will be a far more complex, subtle, difficult, and potentially creative exercise than it might at first look, not least because. with collective debate and analysis to be anticipated, halfanswers, evasions, and plati-tudes will not be enough.

And contrary to the "papering over the cracks" approach of earlier church unity schemes, this method requires attention to the doctrines which divide, the distinctiveness each church guards most preciously, and measures them all against the test of what the Church is, and what it is for, and what it is not.

For Anglicans and Church of Scotland, the vague "nation at prayer" half-truth will stand exposed as half false: the "ark of salvation" exclusivism of the Roman Catholic side will have to wrestle with the conflicting fact of common baptism, and the awkward knowledge that the Church of England does exist and save; and the Free Churches will have to admit that they have no idea what a Baptist or Methodist is,

what a Baptist of Nactions is, except someone who likes a certain kind of hymn.

It is likely to be a bonfire of unexamined and doubtful assumptions; and in the ashes, so the hope seems to be, there will be found nuggets of true gold, common answers to the fundamental questions, or more precisely and productively. common foundations on which to build.

The Council of Trent naively thought it had found them. and history instantly proved it; wrong: they were the foun-dations for centuries of conflict. But it is impossible to detect

a sense in Anglican and Protestant traditions today that the right answers may yet turn out to be not so very far distant from those wrong ones; the idea of the Church they are groping for and grappling with sounds distinctly catholic, and one the councilmen of Trent, meeting under the ancient crucifix and the watehful eyes of emperors and kings, would

OBITUARY PROF P. V. DANCKWERTS Contributions to chemical engineering

Engineering in the University of Cambridge from 1959 to 1977 and Fellow of Pembroke College died on October 25 at the age of 68. The son of Vice-Admiral V. H. Danckwerts, he was educated at Winchester and Balliol College, Oxford;

His war record was dis-tinguished as Sub-Lieutenant in the RNVR, he was awarded the George Cross in 1940 for - was characteristic of his at gas-liquid interfaces. subsequent scientific work. He was wounded during the in-

was wounded during the invasion of Sicily and later joined the staff of Combined Operations Headquarters. In 1943 he was appointed MBE.

After the war he used a Commonwealth Fund Fellowship to study for a degree in chemical engineering at the Massachusetts Institute of Technology, There he met T. R. C. Fox, who had just heen appointed Shell Professor at Cambridge, and was also Cambridge, and was also learning the subject at that time. Fox recruited Danckwerts to become a member of the original chemical original chemical original chemical original team in Cambridge and there, in the early 1950s, Danckwerts established an international reputation with a few remark-

able papers.
They formed the starting point for many years' research by workers in a variety/ of topics: gas absorption, mixing, and residence time chara-butions. In addition to being notable contributions in themselves, these papers set the tone of post-war chemical engineering research by their freitful application of mathematics to the basic mechanisms govern-ing the operation of chemical plant. Subsequently Danckwerts became critical of this approach

Professor Peter Victor when he felt the mathematics Danckwerts, GC, MBE, FRS, had become more important Shell Professor of Chemical than what he regarded as the ultimate objective, industrial

innovation. ft was with industrial innovation in mind that Danckwerts left Cambridge in 1954 to work under Lord Hinton (then Sir Christopher) at the Atomic Energy Authority, but he soon returned to academic life; in 1956 he was appointed Pro-fessor of Chonical Engineering Science at Imperial College and disarraing land mines which in 1959 he returned to Cam-had fallen on London. The bold bridge as Shell Processor. There imaginative approach needed he established a flourishing for this work — for example research school which included lengths of string were used to an active group continuing his extract the fuses from the mines earlier work on surface renewal earlier work on surface renewal

He stimulated successive generations of research students, several of whom are still active in the field of gas absorption which has grown in importance with the expansion of the chemical industry. Much of this work was summarized by Danckwerts when he wrote the book Gas-Liquid Reactions, published in 1970 and still the standard work on the subject. He was President of the Institution of Chemical Engineers 1965-66, and was elected PRS in 1969.

A difficult man to know intimately, he had a reticent manner, sometimes mistaken for alcomess by acquaintances. But he was the kindlest of men with a sensitive regard for colleagues. His headship of department was a burden, for he did not relish administration and university committees were reckoned as polithureaus; but he did not shrink from disagreeable jobs.

in latter years he suffered from ill health; in spite of this he retained his sense of humour travelled widely and was always a brilliant letter

In-1960 he married Lavinia. daughter of Brigadier-General D. A. Machinane.

How often do your tenders for overseas contracts get beaten by foreign companies?

Worse, how often do foreign companies clinch a contract right here on your own doorstep?

You could be forgiven for thinking they have some sort of secret weapon.

Well, likely as not, they have. It's called energy management.

Applied properly, it can effectively control your energy costs. And contribute handsomely to profits.

Despite our poor showing between 1973-1982 illustrated above, thousands of British companies are proving it every day.

So could you. Your first step? Appointing an Energy Manager.

Someone directly responsible for all your company's energy use.

He can implement programmes to save you energy (and therefore, of course, money). Then help you monitor and control your performance.

With a grant from us, he could go on to engage a qualified consultant who'll devise energy-saving investments tailored to your precise needs.

Investments that will pay the consultant's fee many times over. And could cut your energy bill by tens of thousands of pounds a year. Ask your secretary to fill in the coupon.

It shouldn't be too long before you're shaking hands on some of those contracts.

FINANCE AND INDUSTRY

Executive Editor Kenneth Fleet

LBS echoes Lawson outlook on growth

The London Business School's new forecast, published today, is perhaps the closest approximation we have to a Treasury forecast with the warts left in. It provides a useful news photograph, so to speak, to compare with the society portrait due to be published by the Chancellor in a

The original reason for this closeness the assumption of the LBS's chief forecaster on to the heights of the government economic service in 1980 has faded almost into ancient history. Since then, the LBS has often produced forecasts differing markedly for the Treasury's. But today the LBS is optimistic in many of the same ways that the Treasury is optimistic. Thus the black spots in the LBS forecast provide a convenient checklist of worries to apply to the Chancellor's forthcoming version.

The LBS believes, as Mr Nigel Lawson has already claimed, that Britain's recorded growth rate in 1985 will be roughly as strong as in 1983 - over 3 per cent. Disentangling the effects of the miners' strike (which for forecasting simplicity is assumed by the LBS to end on December 31) this means a slower underlying growth. rate in 1985 than in either 1983 of 1984. On the other hand, it does not imply either slump or even a "growth recession, next year - output continues to rise faster than its (rather pathetic) trend rate.

Again like the Chancellor, the LBS expects this growth to be sustained by a little bit of everything. Investment continues to rise, though by less than in 1984. Industry rebuilds stocks a little. The mood of pessimism generated by the strike has undoubtedly contributed to the unexpected industrial destecking this year, which means it has probably done more to depress output than the Government statisticians have so far publicly allowed.

Exports, the LBS forecasts, will be stronger in 1985, helped by the fall in the pound and gathering economic strength in Europe. Hence the forecast's most encouraging - perhaps - too encouraging? feature: Britain's output actually rises faster than domestic demand. But domestic demand is still the main driving foirce; and consumption is still the motor of expansion.

In the LBS's view, it is not just private but also public consumption that rises. The LBS assumes that the annual culling by the Treasury and "Star Chamber" does not prevent a continuous real increase in public expenditure. However, since it also assumes the Chancellor sticks to his financial strategy, the consequence of this is not a bigger public-sector deficit, but fewer tax cuts than the Chancellor plans.

This probably underestimates the Chancellor's tax-cutting zest. Just why is he so keen? Back to tHe LBS forecast. If taxes are cut by more than the LBS supposes, the net effect would be to increase still further the rise in consumer spending. Arguably, however, the rise in consumer spending is too strong anyway, coming as it does from the continued rapid real increases in the earnings of those still at work.

Not the LBS forecast is not, as these things go, particularly apocalyptic about wages - or about their impact on inflation. It is actually projecting a slight slowdown in the rise in manufacturing earnings. It is also, and probably rightly, reinterpreting official statistics to maintain that productivity is still growing pretty fast.

Thus the inflation figures in the LBS forecast look pretty rosy. Between now and 1988, prices rise by 5 per cent a year or even slightly less.

Back, however, to those wages figures. Even in the LBS's view, manufacturing carnings rise nearly 8 per cent next year. For those who remain in work, the increases are validated by strong productivity gains; but the counterpart is a continuing fall in manufacturing employment. In the economy as a whole, the tiny increase in employment opportunities is not enough to prevent a further rise in

A familiar story - but one which is not well illustrated by the official Treasury forecast. This is always a bit coy about earnings, for fear of influencing the pay round. It is more coy still about unemployment. Only "assumptions", for national insurance purposes, are published - which have conventionally (and inaccurately) been that unemployment was always just about to level off.

But Mr Lawson has had plenty to say in retrospect about wages and uneployment. He recently suggested that the rise in real wages during 1982-84 had cost Britain about half a million jobs a year. Even if his figures (the outcome of simulations with the Treasury model) were correct, it would be no use crying over spilt milk. The question is; why did it happen? And what can the Chancellor do to prevent it happening again?

In each of the three years 1982-84, earnings have risen by roughly 3 percent-age points more than prices. Why? First, parts of British industry have taken the step we have noted on toa faster productivity excalator; profits have gone up, and the workforce too has reaped its reward. But second, in slower-moving sectors, perhaps some employers simply did not dare jeopardize industrail peace by offering less. And third, this judgment may have been distorted by the fact that both sides of the negotiating table probably misjudged the pay rised needed to keep pace with the cost of living.

In repsonse to the first change, the Chancellor should applaud the pro-ductivity gains and consider whether his overall policies are geared up to a faster trend rate of growth in the economy. Meanwhile, all ministers should ask themselves whether enough has beeen done to improve the workings of the labour market. But the third possibility raises some immediate questions for Mr

At least a third of the real wage gains of the past three years were unexpected. That is, inflation fell faster than the Treasury forecast; a fault for which it can hardly be blamed, when independent forecasts were higher still. If, however, inflation were now to stabilize at just below 5 per cent. there would be much less reasn for an unplanned rise in real earnings.

no rise at all. He has recently been at some pains to explain that his preoccupation with wages does not mean that he wants to see living standards cut. He has a vision of a world in which earnings simply rise no faster than prices. In this world, employment rises (because while labour productivity goes up, real wages stand still) but the real living standards of those in work continue to rise (because the Chancellor cuts taxes).

This is a much more individualistic version of the "social contract" than that offered by Labour in the mid-1970s, which was for an increase in social spending in return for wage restraint. But even though Mr Lawson's predecessor introduced the "tax and price index" to try to rub home to wage negotiators the beneits of income tax cuts, retail prices remain their prime. concern. It is not obvious, to put it mildly, that the Chaellor can now buy greater wage restraint with a general cut in income taxes. He should therefore consider whether a more useful "fiscal adjustment" would not be in those taxes which bear directly on employment in a wholesale recasting of the national insurance system.

Opec plans big cuts in oil output to defend prices

From David Young, Geneva

an emergency meeting starting today plano defend their precollectively accepting a cut in

Saudi Arabia will bear the brunt of the cut, which is likely to be nearly two million barrels a day off the present total output of 17.5 million barrels a day. The Saudi oil minister, Shaikh Ahmed Zaki Yamani, has already said that Opec "could have a surprise for the oil consumers" after this week's

The Algerian oil minister, Mr Belkacem Nabi, said yesterday that Saudi Arabia would reduce its output by between 500,000 and a million barrels a day.

The Saudis are estimated by the oil industry to have been producing recently at about 4-4.2 million barrels a day, up rom 3.2-3.4 million at one

Opec ministers in Geneva for point last when they and some other Opec members were temporarily able to shore up sagging open-market oil prices with deep cuts in output.

But in response to questions ahead of the meeting. Mr Nabi said he did not think the 1.5 million barrels a day cut was enough, and he would be pressing for more.

Such cuts, when worsening weather in Northern Europe and the US is expected to stimulate sluggish demand. would have an immediate effect on depressed spot-market prices, sending them up to and possibly beyond the exisiting Opec market price of \$29.

A firming of world demand and prices would allow Nigeria to meet Opec's request that it restore its prices to the official level and almost certainly send Britain's and Norway's North Sea prices back

Shaikh Yamani: surprise in

WHEN SHIPBUILDING CAME TO AN END,

WE TOOK A CLOSE LOOK AT OUR FUTURE.

And we saw a great future in biotechnology.

We knew that recent breakthroughs in genetics had meant that microscopic organisms could now be created and 'programmed to carry out productive tasks.

However, we also knew that to use this technology in continuous mass production would present a major challenge to engineering design.

At John Brown we accepted the challenge.

To date, only one really large continuous protein process has reached commercial production, its name; the ICI 'Pruteen' plant

It needed meticulous attention to engineering detail to ensure that the fermenter was kept sterile. We gave it.

And it all proved worthwhile.

The 'Pruteen' plant now has the world's biggest single airlift fermenter with a capacity between 50,000 and 70,000 tons of protein a year.

But we are not only involved in the big projects. We also offer a comprehensive service to help realise

those ideas conceived in the laboratory. Our clients range from Government departments to

major chemical concerns and new bioscience companies. And it is our ability to meet our clients' individual needs,

that has resulted in some 10 contracts from companies based in North America.

While an East European company has sought our expertise to help develop its invention for intensifying aerobic Yet if our experience in the biotechnology field is unrivalled,

so too is our experience in power generation, oil platform design and polymer plants.

We are diverse in our expertise. And international in our scope of operations.

And we adhere to one principle: to maintain the highest standards of engineering excellence.

IOHN BROWN

Proud of our past. Committed to our future.

THE GILT-EDGED MARKET Interest rates optimism justified

Sharp falls in the gilt-edged market and in sterling two weeks ago were in some ways similar to the events of July. They were triggered by the possible escalation of the coal dispute and an unexpected reduction in oil prices announced by Norway, Britain and Nigeria. The falls were also underpinned by the virtual absence of official support for sterling at a time when the Bundesbank was supporting the D-mark.

The effect was that any talk of a base rate cut, so prevalent prior to the publication of the September money supply figures on October 9, was replaced by a discussion of whether the pressure on sterling could be ridden out without a repeat of July's interest rate increases. Criticisms of the Bank of England's response in July, however, made any repeat much less likely, and the final withdrawal by the National Association of Colliery Overmen. Deputies and Shotfirers of its strike threat has contributed to a revival of sterling and a rise in the gilt-edged market. A truly significant recovery may have to await the settlement of the miners' strike, at which time the rebound will be particularly strong if the settlement is not seen as a sell out to the National

Robert Thomas

Union of Mineworkers The weakness in oil prices is both more complicated and of potentially longer-term signifi-cance. Because of the depreciation of sterling, the fall in the dollar price of oil since late 1980 has not been sufficient to strike on the PSBR is much less prevent a rise in oil prices quoted in sterling. They now stand at the peak of more than

£22 per barrel. ment on the possible effect on government finances of the decline in the sterling/dollar rate. If sterling remains at around \$1.20 for the rest of 1984, its average for the year as statement also suggested that a whole will be \$1.33, some 9 the authorities believed the per cent below the Chancellor's Budget assumption of \$1.46. In consequence, oil revenues in 1984/5 would be more than £800m above the Budget fore-cast. In contrast, the reduction of \$1.35 in the price of North Sea Brent crude will reduce oil revenues in the remainder of

1984/5 by less than £100m, and by only £300m in a full year. The miners' strike has significantly raised government spending and reduced tax

part of the fall in sterling from has been due to the miners' strike, the consequent buoyancy of oil revenues has been partial offset. The corollary is that the overall impact of the than that implied by the parrowly-defined costs. The Chancellor confirmed, in

his Mansion House speech, that There has been much com- the domestic monetary and fiscal position is under control. He was clearly, and in our view correctly, trying to reassure the increase was unnecessary. His the authorities believed the pressure on sterling to be only temporary.

The partial recovery sterling last week and the speed with which talk of a base rate cut reappeared, indicates that the authorities' decision the hold the line on interest rates

was justified.

The Chancellor said he expected both sterling M3 and MO to be within their target ranges by the end of the financial year. There is nothing revenue. However, given that in the current figures to suggest

that such a view is misplaced. Indeed, the preliminary indi-cations for October are that sterling M3 grew relatively slowly, bringing its growth rate down again into its target range.
A PSBR figure for September of £633m, well below most market expectations, gives a high probability of hitting a PSBR figure of below £8bn for the year as a whole. Our expectation is that there will be virtually no net government borrowing in the second half of the year. Inflation is under control at

4.7 per cent with only a small increase to just over 5 per cent anticipated in the first half of 1985. Both short-term rates and bond yields are high in real terms. The main objective of the authorities with little accelcration of inflation in prospect, the main objective of the authorities, will be to reduce rates as soon as possible.

This is consistent with the Chancellor's rejection of significant reflation via higher government spending as a way to cut unemployment to be decline in interest rates, even if part of the fall has to await either the eventual end of the miners' dispute or a clear decline in the

British equity market. The prime reason for this is casy enough to determine - bid fever. On October 10, Unilever consummated its (contested) bid for control of Brooke Bond through the largest open market operation of its kind so far conducted in the London market (with 133 million Brooke Bond shares being acquired at a cost of £166m in Barlow Rand also recently went unconditional in its £285m bid for J. Bibby (October 15).

With these and other examples from related sectors in view, such as Dee Corp's bid for Booker McConnell, it is no surprise that investors should be looking for other exciting opportunities elsewhere in the

Their ambitions here are being fuelled by the cash obtained from Brooke Bond sizable further cash return from bid acceptances (of about £200m) will be coming through

If further encouragement were needed, all fund managers have to do is look at the situation in the United States. Here there has been a parallel outbreak of merger mania, led by the Beatrice Foods acquisition of Esmark (\$2.8 billion), Nestle's purchase of Carnation (\$3 billion), and a whole raft of

people business), every other stock in the sector is well within the reach of US predators, whole many of them are just as exposed to the domestic variety.

FINANCE AND INDUSTRY

In recent months, there has been a spate of bid speculation joining food companies together in virtually every imaginable permutation of national and international groupings. In some cases, share prices have reacted favourably to these stories, in others not; in some cases also, the previous share price performance had been dull, while in others it had already been good. Inevitably, this has given rise to a wide spread of individual price movements relative to the

Our own list of favourites is headed by Tate & Lyle and ling reasons for maintaining a RHM; Tate & Lyle because strong stance in the sector has having lost out on the battle been the fact that not only are itself, and RHM because of improving fundamentals and its fine clutch of brand names. detect the mood of the sector, Others to deserve specific then suggesting specific candidates is not quite such an easy thing to detect the mood of the sector, Others to deserve specific mention include Pauls, looking dates is not quite such an easy thing to de With the creations. dates is not quite such an easy increasingly lonely as an inde-thing to do. of Uniliver (too big) A. B. Rowntree Mackintosh which Foods (too tightly held) and S. has been a bid story all year, & W. Berisford (too much of a and Frich Lovell, another old

Of late, shares' to receive greatest attention have included Avana, Cadbury Schweppes, Rowntree, Tate & Lyle, and Unigate. How persistent this support will remain is obviously uncertain, with the possibility of new contenders moving their way up the buying list at the expense of those already established there - selectivity is thus an important watchword. What seems an important general rule here, at least in the present mood of the sector, is that the strongest performers are likely to be those offering the best combination of bid prospects and fundamental value.

Throughout the past few weeks one of the most compelsusceptible to offers, but most of them also arguably offer sound value on fundamentals. Food manufacturing may not

high yields and low p/e's - an tive combination

but it does still offer selection of

There remains considerable price upside, therefore, should just one of the rumoured hids while there is considerable downside support too, given the still modest ratings. However, while the general sector conditions look favourable, the point about selectivity, which has always been an important investment criterion among the food manufacturers, should not be

The dynamics of the sector are now carefully balanced. Should several weeks pass by without any new bid developments, there must be some risk of profit taking. On the other hand the influx of further significant sums of cash from Unilever and Barlow Rand may still be pumped back into the sector, thereby boosting prices.

The correct response in such uncertain times must lie in the area of selective stock-picking. Thus, all of which have done particularly well on the pro-ceeds of Brooke Bond/Bibby reinvestment could well take the brunt of any profit-taking.

The rationale for this is that these shares have been bought principally because of their high yields and/or recent news on strike anywhere, we still consider it relatively unlikely that these stocks will feature most strongly in any future bid development - hence the view that over the next few months. the best performances will come from the more credible eachway bets such as RHM and Tate & Lyle.

AMERICAN NOTEBOOK

Money markets wake up to rapid fall in growth

The financial markets have realization that the US economy is plunging towards zero growth. There is no unanimous acceptance of this view. Nevertheless, the collapse of interest rates and the flow of very negative economic information

point to an important change.

The vertiginous descent of the federal funds rate (that paid by banks for oversight money) has been most striking. At the end of August it was close to 12 per cent. Today it is close to 9

Bonds have enjoyed a grand raily. December T-bond futures have broken out of the holding pattern of around 66-68 which they held for the mouth ended October 18 and have headed up 59 at the end of June, these T-bond futures have risen 20 per cent - at an annual rate of more.

Many crucial economic indicators are showing strongly negative signs. The third real goo number only 2.7 per cent quarter annual rate of increase. Industrial production fell last mouth. and durable goods orders were down 4.3 per cent, imparting a severe shock to the markets. Initial memployment claims – a sensitive indicator of the labour market - are almost up to 400,000 from 350,000 in

The Federal Reserve has engineered a negligible growth of money since May. The money M1 aggregate

Henry Kanfman: bond rally a pleasant Interlude

hardly increased at all for five mouths. The narrow mo MIA aggregate, which has proved to be a superior indicator of inflation and nominal gup growth in the past two years, actually declined last month and this.

Not everyone agrees that, this situation Indicates the rally in bonds. Mr Henry Kaufman, of Salomon Brothers, said on Thursday that the recent bond rally was only a pleasant interlude on the way to higher interest rates. Unfortunately, Mr Kanfman's forecasting recording now is so blemished that to many be has become a figure of fun. As the decline in economic

and as interest rates tumble, the dollar has also started to weaken. Around the world, long dollar positions unravel as the

recent peak of DM3.15 it is clearly headed to what dollar

bulls hope will be a strong resistance point at DM3.00. The major change in direction for the US economy has worked on the financial mar-kets and interest rates have tumbled, reflecting the cess-ation of the growth of credit

This has been followed by intense speculation on the trend

of Federal Reserve policy.

The Fed is in a spot. So far, the reaction of the Central Bank has been the passive one of allowing the federal funds rate to dive: only intermittent and ineffective attempts have been made to halt the fall in the funds rate. Other short-term rates have collapsed as the funds rate has fallen. The yield on 90-day T-bills has now approached 9 per cent. The

This passive role by the Fed is satisfactory as far as it goes. However, Fed officials know full well that the US economy is capable of growing within safe margins of tolerance at 4 per cent during 1985 and 1986. failure on their part to achieve this rate of growth would be inadmissable.

There is another reason for the Fed to ensure strong economic growth in 1985 and 1986. The dollar is very voluerable to the threat of stagnation in

APPOINTMENTS

ICL chairman joins board of STC

Cables: Or Robert Wilmot, chairman of ICL, has joined the two companies last month.

STC: Managing directors of five STC companies have been made executive chairmen of their respective organizations. Sir Kenneth Corfield has handed over his chairmanship of the management companies to concentrate on strategic issues for STC in his capacity as its chairman and chief executive The five are: Mr John Cottrell,

of STC Telecommunications, Mr Jim Utterson, STC Communications International Mr Eric Bates, STC Residential Electonics: Dr Simon Willder, STC Technology, and Mr Ken Walton, STC Components.

Each retains his position of managing director. Mr Walton also continues to be executive chairman of STC Distributors of Business Systems. Land Rover: Mr John Sewell has become sales and marketing director. He succeeds Mr J B

Reardan who has retired. Sologias: Mr Alan Matchett. has joined the main board as director of planning and

Armitage & Norton: Mr John Hume has become managing partner of the London office. Crystalate Holdings: Mr J. E. Mackenzie has retired from the group secretary ship. Mr D. A. Brockhurst, previously assistant

group secretary, has become secretary to the company.

Cadogan Oakley: Mr Christopher G. Poulton has joined the board of Cadogan Oakley, the industrial holding subsidiary of Cadogan Fatters. He has ary of Cadogan Estates. He has

also been appointed managing director of Cadogan Huntley, a newly-acquired subisidiary. Viscount Chelses and Mr Peter Grant have also joined the board of Cadogan Huntley. Wadlow Grosvenor Inter-national: Mr Neil Mills has been appointed as non-executive director.

London and Manchester Group Mr Simon McClean has joined the company as investment manager.

THIS NOTICE DOES NOT CONSTITUTE AN OFFER FOR SALE AND THE STOCKS LISTED BELOW ARE NOT AVAILABLE FOR PURCHASE DIRECT FROM THE BANK OF ENGLAND. OFFICIAL DEALINGS IN THE STOCKS ON THE STOCK EXCHANGE ARE EXPECTED TO COMMENCE ON MONDAY, 29TH OCTOBER 1984

ISSUES OF GOVERNMENT STOCK

The Bank of England announces that Her Majesty's Treasury has created on 26th October 1984, and has issued to the Bank, an additional amount of £150 million of each of the Stocks listed below.

9% per cent TREASURY CONVERTIBLE STOCK, 1988 11 per cent EXCHEQUER STOCK, 1991 9% per cent TREASURY LOAN, 1999 11 1/2 per cent TREASURY STOCK, 2001-2004

The price paid by the Bank on issue was in each case the middle market closing price of the relevant Stock on 26th October 1984 as certified by the Government Broker.

In each case, the amount issued on 26th October 1984 represents a further tranche of the relevant Stock, ranking in all respects part passu with that Stock and subject to the terms and conditions of its prospectus, save as to the particulars therein which related solely to the initial sale of the Stock. Copies of the prospectuses for the Stocks listed above, dated 26th September 1983, 6th April 1979, 12th January 1973 and 18th May 1979 respectively, may be obtained at the Bank of England, New Issues, Watling Street, London, ECAM 9AA.

Application has been made to the Council of The Stock Exchange for each further tranche of stock to be admitted to the Official List. The Stocks are repayable at par, and interest is payable half-yearly, on the dates shown below:

Stock	date	payment dates	II Dusc
9% per cent Treasury Convertible Stock, 1988	14th June 1988	14th June 14th December	Lendin

Pools: As from 17th November, 1984 we are increasing the minimum stake on our Treble Chance Pool. We confidently expect that this will result in higher payments to winners and an increase in turnover. At the same time we shall be re-introducing a free "LUCKY NUMBERS" competition on to our coupon which will give the chance to win a large cash prize.

Bingo: We are close to maximising the potential in existing Bingo clubs, so growth must come from expansion. Two new clubs have been acquired this year and others are still being sought. Also we now have our own Gaming year and others are sur being account of the account own canning Machine Operating Company. This is already proving to be a successful and profitable addition to the Group.

BANK OF ENGLAND LONDON

Milton Keynes

Progression has been rapid, from a small village to a new city with new people, new technology and only one set of traffic lights.

Why move to the middle of nowhere when you can move to the middle of London?" message streams from bill-boards and television ads, put there with public money by the quango set up lo regenerate London's docklands.

The "middle of nowhere?" the London Docklands Development Corporation hints - is 40 miles up the MI motorway, a city planned to help relieve congestion in the middle of London.

But the Milton Keynes Development Corporation (answerable, incidentally, to the same government denartment as the London Corporation writing the knocking copy) is a victim of fashion, what general manager Frank Henshaw calls our national tendency to lurch to extremes.

In the mid-1970s Whitehall discovered the plight of the inner cities and derelict docklands and took another look at the demographic projections. Almost overnight, political enthusiasm for the New Towns dried up. It stayed that way when the government changed in 1979. For some of Mrs Thatcher's ministers the first issue was how quickly the New Town corporations could be wound up and their land and

Cooler counsel prevails. today: but it is no exaggeration to say that Milton Revnes, the latest and grandest of the English New Towns, is a policy orphan. In an era when planning is a boo-word and an £800-million debt (admittedly calculated on the Treasury's warped accounting scheme) is bad news. Milton Keynes could have been in 1984 just another rather embarrassing bit of the welfare state that a Conservative government did not quite know what to do with.

Instead: it looks increasingly

as though Milton Keynes has been saved - in the govern-ment's eyes - by the market. Since 1978 (Frank Henshaw's date) private sector firms have been voting with their feet. Annual private investment in the city is now around £120 million a year; there could be a further £1.7 billion over the next decade. The investors are firms national and inter-national. Milton Keynes is fulfilling the requirements of the country in attracting foreign firms", say the civil servants in their briefs.

rate - been able to say that of docklands. The nine-mile are of Buckinghamshire, from Stony Stratford in the north to Bletchley in the

They have not - yet, at any

is Britain's ultimate Buckinghamshine: at another it planned environment. Milton was to be assume of regenerating the rather/ depressed former Keynes' broad boulevards, its kilometre-square blocks seem to railway towns of filetchley and Wolvertori, then it was to be a speak of a blueprint an intelligently-organized whole.\ regional growth point. Milton Keynes is a success

Of course there was a plan - a masterpiece - pat together by, among others, the Richard Llewelyn-Davies Partnership. But it was a plan, its modern admirers say, blessed by the spaces it left, by its flexibility. There was talk of mono-tails (a particular favour-

Milton Reynes is a success despite policy flip-flops and costly delays while the siting of a fourth London airport was discussed

ite of the influential Buckinghamshire county planner. Fred. Pooley) but what happened was that space was left on a plan, space usable now as extraroadway or greensward.

Milton Keynes has gone through several major alter-ations of purpose. At first it was part of the London overspill scheme at one early point if was conceived as a means of on the southern part of

about community and physical structure derived from the 20

urban expenserats that constitute the English New Town phenomenon from Crawley in the south to Peterlee in the north, the downs have been remarkably different in their ecomomies and social success so much sorthal one writer has called the Yew Towns a programme/wathout a policy form of ra corporation with borrowing powers apointed by central go vernment.

Mator Akeyocs, designated a New Your in January 1967. was part of the third generation of an age with War-engton. Northampton and Peter boroggi. But these were expensions of existing large towns. Milton Keynes, given its scale. was uniquely a new city.

Clearly influenced by the densities and mobility of Los Angeles, the planners laid a grid pattern of mads through the designated 22,000 acres to give it immediately, a distinct ultramodern feel.

imposed by Freasury rules "Yes, there were assumptions requiring every penny of spendbuilt in on landscaping against high rise. But the point of the MK plan is that it has retained nterest rates on a 60-year loan the ability to regenerate - we've got space for that to happen."
This is Frank Heashaw. The Success, rather, is due to the people, firms and institutions (snotably the Open University) prime American influence, he. says, was the way American cities seem able to continue growing from within MK has never innovated for the sake of lo cate in Milton Keynes, and to the New Town's dynamic duo novelty, nor deliberately to Campbell of Eskan and general manager Frank Roche, Camp-bell it was who helped build attract the constant procession of visitors, many of them from Mailton Keynes' identity as a "lagh-tech" city, attractive to Britain's commercial competitors, who come to hispect.
"What we've had is ideas capable of practical resolution.

This year Milton Keynes has - within, the dimensions of the

about density and transport original plan - reached half way siage. Mr Henshaw gets an from his desk to gesture though the in its construction Milion Keynes has taken up and embellished a stock of ideas picture windows which run across two sides of his office. Some 35 per cent of Millon Kynes developable land is still available: there are great gaps

still to be filled. Current Whitehall, theory says that the Milton Keynes Development Corporation should be wound up by 1989, its assets transferred to the Commission for the New Towns or sold But on the ground a strong case is made for the corporation meaning all they have in a unique agency for committee common is the administrative and social development - 10 continue. After all, the corporation model was sufficiently impressive for Conservative ministers to transfer it steaight to London and Liverpool docklases.

> Still part of that old vision of harmonizing town and country and collective

The Government's problems with Milton Keynes are only partly financial: the net public borrowing required by the town is now quite small. Sir Henry Chilver, the corporation chairman, speaks of a private / one. The issues are ideological. The 'New Towns programme was a grand exercise in collectivisra. Mikon Keynes resides on a: plan, the commandeering by the state of land and resources for public purposes.

Yet in the Milton Keynes of the 1980s there is not much sense of socialism in action. According to Sir Henry, the expertise of Milton Keynes officials lies along the public-private frontier in their ability to create conditions for investment for home ownership, for the "mixed" provision of community facilities.

Milton : Keynes is distant in time and in spirit from the first "garden cities" imagined by Ebenezer Howard and realized eventually in Leichworth and Welwyn and the first generation of post-war New Towns. Yel Millon Keynes, named (people serongly think of economists) after an edyllic Backinghamshire village is still part of that old vision of harmonizing town and country, collective purpose and individual aspiration.

Pertaps it wilk one day realize Howard's hopes for a "small scale society more individualistic than now - if by individualism is meant a society in which itieto is fuller and free apportunity: for its members to do and to produce what they

Sir Henry Chilver, aiming high

the corporation. (Ministers are at present committed to winding up the development corporation in Milton Keynes by 1989, selling its assets and transferring the residual responsibilities to the Commission for the New

Instead, he says, there should be wide discussion. "We must look at what would happen if the corporation were turned off in 1989 - or even in 2000. We should be aiming for some sort of completion by the mid-1990s. There is viable activity until the mid- to late-1990s. although I see the corporation becoming a facilitating rather

than a development agency."

The only note of criticism of the government enters Sir Henry's judgement of the New Town's finances. Under the rules Milton Keynes, like the other New Towns, has had to linance construction and land acquisition by borrowing for 60 years at fixed interest rates - in other words the bulk of its debt is denominated in the high interest rates prevailing during the later 1970s, and so the deficits keep mounting. It is, he says. "a massive artificiality which the government has done nothing about."

The way in which Milton

Keynes has been planned and

Set up by the Urban Studies Centre in association with borough council and county education department, the Young Citizen scheme aims to provide every 11-year-old (2,500 a year) with a pack, including a letter from the Mayor of Milton Keynes, a badge, a Young Citizen's certificate, a poster map with stickers to plot home and places visited, and quiz and information sheets. Urban Studies Centre director Pat Mortimer expects, if the scheme is a success, to make it an annual event. With back up from teachers, he hopes this will create a consciousness and pride of place among MK's rising generation. Certainly though the city has its shorcomings - they have much to be

Tony Aldous

The joke that the big firms come to enjoy

short pause for hollow laughter for the and massed raspberaies, kindly tomers, direct them at the man responsible. Mr Bob Hill having o

"We are not trying to make people like us." replies Mr Hill. "We are only trying to persuade them to come to see us." After 12 years as the man charged with selling Milton Keynes, the commercial director of the city's development corporation remains quite hopelessily enthusiastic. "We are still a joke in some

quarters, but rarely asmong those who have been here. They may not like it, but they cannot fail to be impressed by the ipace of development." The commucrcials, backed by a positer campaign until it was abain-doned this year because of budget cuts, try to convey a vague and misty idyll; one tries to show the rurality of our newest city, with a businessman going fishing on his bike, while the other tries to convey a community spirit, with a great many children and several hundred red balloons.

"We are trying to sell an image," says Hill. "Our early advertising tried to convey facts and it was a bit of a failure."
When the development corporation stopped trying to do the job themselves and gave the job to a professional advertising agency, Cogent Elliott, things got better. Milton Keynes's difficulty is that what it has to sell is the

that what it has to sell is the somewhat vague concept of a pleasant environment in which

to work and live.
The promotion despite the apparent drawbacks, has un-doubtedly worked. The 1981 census showed Milton Keynes to be the fastest growing urban area of the UK.

The great success of Milton Keynes' marketers has been to attract foreign companies. An up-to-date tally shows more than 50 American, 30 Scandinavian, and nine Japanese businesses with a base in the new city. According to Hill, industry's decision-makers now have to pay much more attention than they once did to the total environment in which they are going to expand or relocate; it has to be a place where their staff will be happy to move to. or where there is aircady a stable and employable work-force.

"Wouldn't it be nice," croon the commercials on Channel 4, "if unnecessary waste of public all cities were like Milton money to have different British Keynes." There will now be a development areas competing for the same overseas cus-

"You could save money by having one overall UK development corporation touting for overseas firms," says Hill, "but it would be quite hopeless. It would be vague and bureaucratic; every decision would have to be referred back.

"I can sell Milton Keynes because I know exactly what is on offer here: I can be specific. My record from having made first contact with a company to having them committed to coming here is just under two

The missions to Japan

The facts of hard selling behind the pretty television ads can chiefly be seen in the can chiefly be seen in the development corporation's twice-yearly mission to Japan, when a team goes for specific largets among Japanese companies thinking of expanding into Europe, Back-up at home has included the opening of a Fapanese restuarant, on the development corporation's in-itiative, and the impending opiening of a Japanese school in

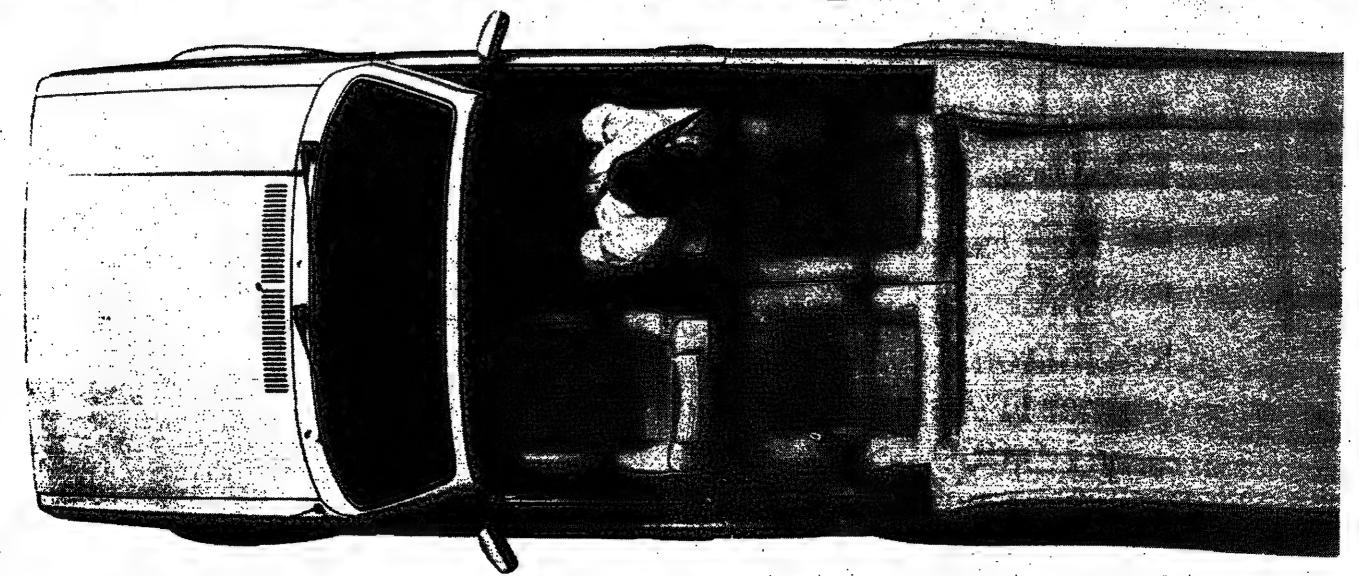

the city.
"The Japanese," says Hill, like to be liked. They appreciate that sort of detail."

Selling Milton Keynes has probably become easier over the years. Persuading a company to move in when so many are already there is a great deal casier than waving a hand across a green field site and trying to extol benefits which exist only in the imagination. The unsolicited testimonial is even more powerful than the colour spreads in the Sunday supplements and the TV commercials, both of which Milton Keynes pioneered among development areas.

Hill's personal view is that the selling job will have reached its peak in the early 1990s: the framework of the city will by then be firmly established, the population will be at or near 200,000 and the place, for better or worse, will then sell itself without the need for elever

One day you'll settle down with a roof over your head.

(We did, in Milton Keynes.)

Sports Commentary

David Miller

The best thing about England's World Cup victory over moderate Finland was not so much the emergence of Mark Hateley as an old-fashioned English centre forward genuinely capable of frightening even the better foreign defences, but that five goals were scored and the television screens were blank. The worst thing is that the next opportunity to entice a newly enthusiastic public back to Wembley is not for five months, Brazil baving been invited for a friendly on March 27. If it were November, curiosity would fill the house.

Yet before you hurry to dial your travel agent or bookmaker to inquire about 1986 prices for Mexico - long, I suspect, on both counts - it is worth reflecting that one Finnish scalp on an October evening does not make Bobby Robson an imminent English version of Zapata, in the midday son of Guadalajara. Let us be grateful merely for an encouraging start in which the promise shown against East Germany was handsomely con-firmed, and should continue against Turkey next month.

What Robson should bear in mind about Mexico is that the conditions of altitude and extreme heat - it was 97deg when England kicked off at midday against West Germany in that fateful quarter-final in Leon - impose factors which alter the character of the game. The matches in 1970 were slow and strolling in midfield. Of the 95 goals in 32 matches, 43 were scored in the last half hour or in extra time, when fatigue croded tactical organization.

Not the place for a 'running about' team

In other words, whatever England may achieve at Wembley, in Mexico they will need a team able, above all, to control and retain the ball, making it do the work. Playing at 7,000ft is not the place for a "running-about" team. In 1970 West Germany and Brazil, it will be recalled, had at centre forward the exceptional Muller and Tostao.

in such climatic circumstances a target centre forward, as he is nowadays termed. playing with his back to the defence, and with the skill to control absolutely the passes played through to him, is more economically appropriate, as Geoff Hurst was, than a more interchanging player. Bobby Robson wisely has reservations about Hateley, whose meteoric rise in four months from Fratton Park to Wembley and San Sio is danger of making him a celebrity before he has justified the acclaim of stardom.

Robson said: "Italy has not improved Hateley, but it is a new experience in education. He is lucky to have Wilkins with him in Milan to guide him. He has immense potential. There are not too many like him in the world, with size, strength and nece. He will have more time to practise in Italy than in England, having fewer matches. When he can control a ball like glue, exclusively for himself, then we can start to talk about him being a great player."

Ball-playing central defender needed

Glorious goal though his second may have been, Hateley made too many errors, gratuitously pardoned by a happy audience, the like of which by Mariner would have been criticized. The post-war pedigree of tall, conventional, successful English centre forwards.from Lawton through Milburn, Lofthouse, Tommy Taylor, Kevan, Smith, Hit-chens, Peacock, Hurst, Royle and Chivers down to Latchford. is one which Hateley seems sure to join, but the real examination lies abead.

The encouragement is that there is clearly the making of a team with balance. Can Steve Williams, three caps behind him, form the middle line with Wilkins and Bryan Robson? He has the steel of Stiles or Mullery - occasionally too much - but, as the manager observed, he needs to adapt to the specific right-sided responsibility: flexibility between defence and attack, concentrating particularly on supporting Mateley on the far post for nock-downs from crosses by

Parnes.

My concern would be the artnership of two tall central efenders. Butcher and Wright. e may have no Bobby Moore -ese days – a great ambassador gamefully ignored by the FA at embley on Wednesday, when y afterwards entertained Mor politicians and functiones - nor even a Colin Todd. it will be essential in Mexico save one ball-playing central nder. The time may come ter rather than later to ch Bryan Robson and recail or Cowans on the left. ∍'e is seldom a successful

national team without an

anding player as a free,

ing central defender.

Robson stumbles across a solution

Football Correspondent

Thirty nations have now crossed the starting line in the seven World Cup qualifying races that are to be run between Europe and Mexico. East Germany and Turkey have yet to join in, nine others have been left behind in the blocks and England, after their opening burst on Wednesday night, have emerged at the head of the field.

Their victory, 5-0 over Finland at Wembley, is the most convincing so far. Even the reigning European champions from France set off at amore leisurely pace last Saturday in Luxembourg. Bobby Robson, whose preparations lasted effectively for only 20 minutes, cannot realistically have expected his chosen men to respond more positively.

None more so than Hateley, the scorer of the first and third goals. Robson, who described him as a composite of Tommy Taylor and Nat Lofthouse, has stumbled across the answer to his attacking problem. But for injuries, the young centre forward would not have risen to prominence either in South America or in midweek.

Hateley, now furthering his education in Italy, is still learning (none of his main subjects concerns the tightening of his control) but his potential is both rich and exciting. Unless he in turn suffers from some ailmant, he is clearly the man who should lead England during the next 13 months in their attempt to qualify.

Mariner and, in particular, Withe are too old to be considered as the main contenders for 1986, Blissett and Allan are too inaccurate and Francis is too frail. Hateley's scoring record already surpasses that of Woodcock, who was involved in the messy second goal against the Finns but Fenwick and Watson, whose missed several opportunities to solid resistance was one of the increase his own total.

Cup hopes suffered a blow on Wednesday night when they lost 1-0 to Norway in Oslo.

Stein full of beans after finding right blend By Hugh Taylor

Jock Stein pinpointed the reasons why Scotland have taken such an assured first step on the World Cuptrail to Mexico in one word esterday blend. As he reflected on the 3-0 victory over Iceland which had been achieved by a bright, enthusiasue and occasionally polished display, he revealed "It is blend that matters noish in a World." Cup campaign. You must get it

chactly right.

His ingredients and hard professionalism, confidence and
flourishes of traditional Scottish
brilliance. Yet Stein is embarrassed. "I sigh and feel awkward when I realize just how many highly skilled, players of quality we have had to leave out." he said.

But Stein is more pragmatist than romantic and he declared 'It is not necessarily the best players who make up the best team. While there remains a nagging worry that Scotland should have scored more scottand should have scored indice goals against stubborn but inimagi-native opponents, there is already an encouraging balance and ma-turity about the current side, which augers well for the home game against Spain next month, "There is a settled look about us," said Stein. and that gives me confidence that

"Don't forget that this was the World Cup' debut for Nicholas. Johnson, Cooper and Nicol, who all did exceptionally well and, more importantly, can only improve."

While 19-year-old Paul McStay distinguished the match with two goals and a display of all his superb natural talents, the manager was at pains to stress that it was the all-round team effort which save the round team effort which gave the country their second successive win and proved that their emphatic victory over Yugoslavia was no

It has to be remembered that most of the players at Hampden were involved in the recent disastrous European championship which ended with Scotland firmly entrenched at the foot of a modest

So what has happened? The beaming manager explained; "The truth is that the World Cup is something else for Scots, and it looks as though this great competition has again steeled and prompted the players into fulfilling, their real potential."

Tottenham pin hopes on live link

Tottenham Hotspur, fearing that crowd trouble at their UEFA Cup match in Bruges next Wednesday could result in a ban from Euroepaa competition, are planning to set up a television or radio link at White Hart Lane, at a cost of £30,000, to relay the match live to their supporters, who have been urged not to ravel. There would be no charge for admission.

for admission.

The club have arranged a meeting with the UEFA general secretary. Haus Bangerter, in Switzerland on Monday to discuss their worries, and have sent back their allocation of 550 stand tickets. Tottenham officials are annoyed at the lack of cooperation from Bruges over crowd arrangements. Hoddle stands by for his first League game for eighth months at Manchester United

FOOTBALL . Fourth division

How Nicholas has been remade in midfield for his club and country

Changed days for striker who never struck

Megastar turned superflop turned mid-field maestro: Charlie Nicholas has run the gamut of feotball's clickes in a year. No gambi of foobalt's circles in a year. No wonder he feels old.

"When you're young," he said, looking back down from the Olympian heights of 22 years, "you don't think about things below you - and I was unly 20 when I hit the top in

Scotland. But I've known a lot of bad times since then."

He came to London as Arsenal's new scoring sensation, but London unmanned him and he couldn't find the goal. He appeared in newspaper centre folds in white leather suits. He was a disco footballer with an ear-ring. It reminded one of poor old George Best, except that poor old Charite

seemed to have destroyed himself before he even started.

Sportsmen know what to say about this sort of thing. I never let the pressure get to me. I've never wormed about the press. I always knew the goals would start coming again. Nicholas happens to be more thoughtful than that, "I really did feel under pressure last year. An awful lot of pressure, Not at first. At first it all seemed so easy," Two goals in the second match, "Charlie Pays Off" in the headlines, and it looked like a case of light the blue touchpaper and stand

"It was in the fourth and fifth match that the pressure started. We were beaten by Manchester United, and then by Liverpool, and it all started going wrong. Arsenal play a different system to Celtic, at Celtic I used to get the ball all the time. Now I wasn't getting passes. I wasn't fitting in. And I started feeling envious of Ian Rush, even of Norman

Whiteside. They were getting goals. Why not The premature obituary writers had a fine time of it last year as Nicholas's sombre November declined into Stygian December. Nicholas, 11 was said, had gone to the wrong club, and for the wrong reason. London, the downfall of many a Scot, seemed to have

destroyed him.

them hetter, was 17 They could only fall off from their high standards, and 1 didn't want to be a part of that. 1 did want to go to Manchester - United. And 1 liked Ron Atkinson, But I just sensed the club was not right for me. I panicked at the time. . . Arsenal hardly seemed the right club for him, either. Nitholas bacarite the striker who

never struck.

When the goal-scoring sensation of sesterday starts to feel the weight of his years, and "the legs start to go." as feedball, the legs start to go." years, and "the legs start to go," as loothallese has it, he steps back into midfield. This is what happened to Nicholas It was also a new trade, and one that took a few months to learn. He watched Platini

him as the remaking. "I can see what's going on." he said. "At first I thought I wouldn't be allowed into the box, but after watching Platini. I'm coming into the box at the right time, and I can see it all in front of me. I see the whole picture. And I think vision is my greatest asset. Look at the players who are the real crowd pleasers these days - Hoddie, Souness, Dalglish they are all players whose best talent is their

"Being in London was at first like being on holiday all the time. Everything open all the time — it was not like that in Glasgow!" he said. "But I really did not come to London to make money from commercial interest. I mean, you can do just as well in Manchester or Liverpool. I just wanted to play for the right club.
"Liverpool — well, I wast? going to make them better, was !" They rould only fall off

win the European championship for France from midfield, and his footballing imagination was fired once again. The prove to midfield has been not so much the making of

Charlie Nicholas: "I've known a lot of bad times".

And so we now have the older, wiser, deep-lying Charlie Nicholas. "I regret some of the things I did in London at first, some of the pictures I did for newspapers before I'd. kicked a ball. Last year the fans must have been saying, have we signed a model, or

"But I've changed in a year. I've hardened responsible to the club. If I get headlines after a good game these days, well, it's nice. but I know it's down to the team. And that's how I think of myself - just part of the

No ordinary tearn, though, Nicholas has had too intimate a relationship with disappointment to predict that Arsenal will in the chammonship, desoite current form

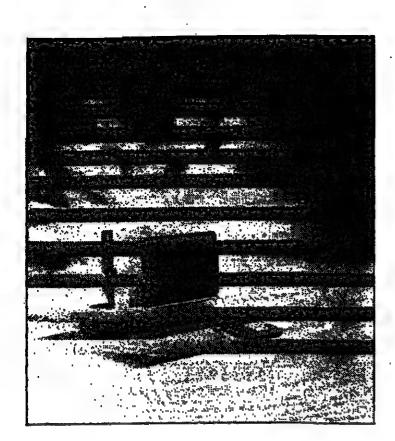

("In 10 games' time, it could be a two-horse race between Liverpool and United again? but he certainly thinks Arsenal have a teammaht now.

"Last year we were building. Then Paul Mariner joined, and he blew it all open. He cheered up the dressing room, and he's really encouraging on the pitch."

So the problems are all over now? "Well, you always say that when things are going well, don't you? But there's a real buzz at Arsenal and it's great to be a part of it. I feel I was right about Arsenal all along, it can all change, of course - that's why football is so exciting. But I'm a hubbly person - it's nice to bubble again, you know".

MILTON KEYNES

-The Spirit of Good Taste-

Pericom PLC, Manufacturers of Micro Computers Graphic Terminals and VDU's Pericom House, Rockingham Drive, Linford Wood, Milton Keynes, MK14 6LH. Telephone (0908) 670000 Telex 826442

What was once a 37 square mile greenfield site is now the fastest growing business community in Britain, with 2,000 companies and others arriving at the rate of three a week

Why this lures the Japanese

Milton Keynes is probably the fastest growing business community in Britain. What was, in 1967, a 37-square mile largely green field site with three small towns is rapidly becoming the main regional commercial and industrial centre between Lon-

don and Birmingham.

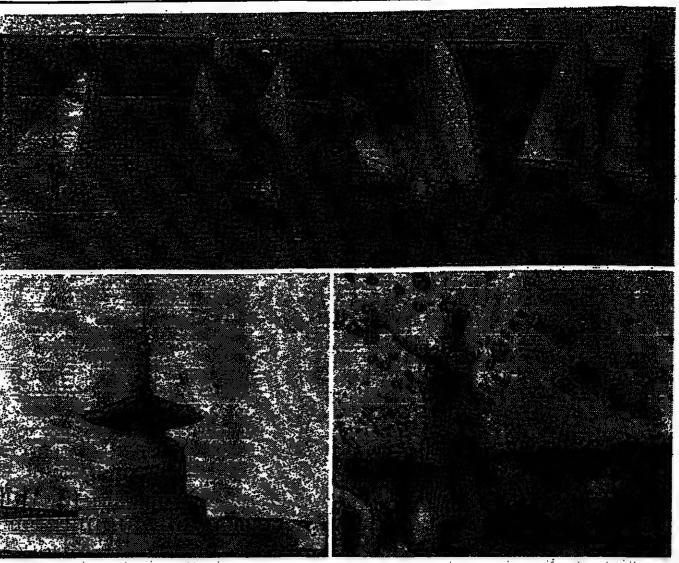

There are more than 2,000 commercial and industrial companies based in the new city, and others arrive at the rate of three a week. They include household names such as Abbey National, Coca Cola, Volkswagen and Mercedes Benz, and more than 120 high technology companies including Burroughs, Sperry, GEC Marco-ni, Hoechst and Monsanto.

Milton Keynes claims to have more Japanese companies than any city area in the UK outside London. The lure for Japanese businesses has been enhanced by the announced intention of a Japanese educational organisation to estab-lish a private school for Japanese children in the city.

The main attraction Milton Keynes is its location in terms of general accessibility by road, rail and air.

The Milton Keynes Development Corporation has been able to attract companies without the carrot of regional grants in aid. The only government monics available are the standard nationwide schemes for innovation and energy conservation and, in the case of international companies, the discretionary support for major

industrial ventures.
Instead, the Corporation fias concentrated on complementing the new city's location and life-style advantages with the advisory and other services modern businesses need to get established in the area and, at the same time, creating a dynamic business climate in

Top: sailing on Willen lake, and above, the Japanese Peace Pagoda, and those famous 5,000 balloons.

which companies can prosper

This includes providing specialist planning advice and offering a range of freehold and leasehold office and factory accommodation, either standard or custom designed to cover virtually any require-

A feature of the leased accommodation is that companies can trade their leases in for either larger or smaller premises as their needs change. Thus a small company can expand with the minimum of expense, a factor which has enabled a number of firms to grow significantly.

The computer manufacturer Pericom Data Systems has increased its turnover more than forty-fold, from £250,000 to over £10 million in eight years and now occupies its own freehold site which also has room for

expansion.
The corporation also offers help to enable businesses to make the maximum use of information technology. The city's Information Technology Exchange provides businesses in the area with a centre where ers and personal bus they can get advice on the latest computers for themselves.

Top employer

The Open University is Milton Keynes' biggest employer, with almost two thousand staff at the university's campus at Walton Hall and at smaller offices and a warehouse in Bletchley. Special-ist staff at the campus are currently involved with processing the 70,000 or so examination scripts.

This year's examinations are likely to result in about six thousand more BA (Open) graduates, bringing the total since 1972 to around 69,000. Of the 110,000 people who study the 110,000 people who study with the OU each year, more than 40,000 are studying outside the OU's degree programme, for example with the Open Busi-ness School.

in IT and how to make the best

use of them The ITEX, as it is called, offers consultancy and training services, and has a demonstration area where visitors can try out the latest microcomputers and personal business

department. The corporation makes extensive use of the computers from mainframes to personal computers in all. departments, and the centre's 14 staff therefore have consider-

able practical experience. In addition to consultancy and training, the exchange stages "events" on various aspects of IT. It recently held an archibition and recently held an exhibition and a series of seminars on computer-aided design and computer-aided engineering. Similar events on office automation and computer networks are planned.

Milton Keynes also offers companies the latest in telecom-munications facilities. For example, British Telecom's latest data transmission services including Kilostream. Megas-tream and the PSS Packet-Switched Services are all available to provide instant communications worldwide -if-

The corporation has long regarded telecommunications as an essential part of modern business and therefore an integral part of its planning

ITEX is unusual in that it is activities. As a result, com-also the corporation's computer panies in Milton Keynes will be among the first to offer services by both British Telecom and the new national network operator Mercury,

The city is scheduled to be part of the pilot ISDN (Integrated Services Data Network) and of Mercury's new data services network, both of which are scheduled to be introduced next year.

The corporation has also telecommunication services into account, when planning new business premises. Cabling for data and telephone services are built-in to all new buildings, the corporation having already constructed some 15 million square feet of office space.

This philosophy is erabodied in the Central Business Exchange (CBX), a huge combined business and leisure complex, the first phase of which is now being built. Comprising two office blocks, an hotel, restaurants, leisure garden, sports centre and night club, it is designed to accomodate present and future infor-mation technology facilities.

51,000. The number of people memployed is just under 8,600. dose to the national avarage. The workforce is employed in more than 2,400 establish-

ments, ranging from self-employed through to large organisations. Over 64 per cent are in service industries, but manufacturing industry – which employs 28 per cent – is a major growth area. According to the City's Job Centre, youth unem-ployment is low - 281 at the last ount - and it is difficult to fill vacancies in the various youth training schemes. There is also a hortage of orders for the

uilding trade. Some 60 per cent of the labour force are in the 20 to 40 age group. compared with only 40 per cent for the UK as a whole. This predominance of younger people reflects the age profile of the city as a whole Three quarters of the workforce

are in skilled or professional and managerial catagories. A survey of engineering skills, carried out by the Engineering Industry Training Board showed that industry in the unemployed is the Milton Milton Keynes has above Keynes Skillcentre. Although average levels of modern part of a national network, it technology-based skills, rather than traditional crafts and

There is also a high proportion of graduates, with 5,000 staffs. For example, it has local residents having a degree or some professional vocation qualification.

Training schemes

The most recent figures available show that about 9,300 Milton Keynes people commute to jobs outside the city, mainly in London, and 13,000 com-mute to jobs in Milton Keynes.

Having established a broadly based business community in the new city, the Milton Keynes Development Corporation has taken a number of steps to tackle unemployment and ensure that the city's education and training resources are in tune with local requirements. For example, it publishes detailed booklets on employing people and training oppor-library leading to the top of the top o all employers so that they are aware of the many facilities available. It is involved with the local education authority in the Technical/Vocational Education Initiative (TVEI), a pilot project in a national scheme to increase the amount of technical and commerce-orientated education in the curriculum of pupils in the 14 to 16 age group. To provide a focal point for future training needs and improve training for the unemployed, the corporation has set up an all-party group called the Milton Keynes Manpower Forum. Its members include representatives from the borough council, Bucks County Council, the Manpower Services Commission, the Milion Keynes Chamber of Commerce, and the Milton Keyne Trades Union Council.
To help unemployed people

3

fundamental to the creation of a and provide assistance to socially and economically balanced new city such as Milton corporation has set up an Keynes, and it is now a major organisation called the Milton Keynes Business Venture. Help Since 1967, employment in covers every aspect of the area has risen dramatically setting up and running a from about 18,000 to over business, including the preparation of innancial proposals and provision of information on the various government-aid schemes for small businesses. In addition, the venture has, workshops for suitable appli-cants at low rents and offers secretarial help. Office units are also available. Launched last year, it has already had 600 applicants and 150 are already

in operation, covering a wide variety of enterprises. As part of its information technology strategy, the corporation set up an information technology training centre (ITEC). Sponsored by the computer producer Burroughs Machines and other local organisations, it provides unemployed school leavers with a year's basic practical training in electronics; computing and electronic office skills.

Thus it offers them a bridge between school and skilled employment, and hopes provide local forms with a pool of junior staff trained in infor-

Another source of help for offers a comprehensive training service matched to local needs for both unemployed people and for employers' existing introduced courses on fork lift truck driving to meet the recently-introduced code of practice formulated to reduce the number of fork lift truck accidents. It also provides courses for electrical and electronic technicians to meet the requirements of developments.

willingness to co-operate. The area's chief education

officer, John Ginever for example, said: "We recognize our responsibility for our children's industrial future and we are fortunate enough to have new schools with which implement the changes curriculum. "Before the TVEI scheme, we

had already sent 50 of our teachers on industry appreci-

Among the many other organizations offering training Milton Keynes are the corporation's Information Fechnology Exchange which provides courses in business computing, and the chamber of commerce which is active in

business training of all kinds, Business courses are also offered by the Open University, and the Cranfield Business

THE NAME OF STREET

The new city will always subject to the economic influences of the country as a whole. "We are not an island," the corporation's general man-ager Frank Henshaw comments, but we will do our utmost to fight off unemployment".

A city of easy riders

Milton Keynes was planned for between railway and town raion recently got ministerial a car-owning and car-using centre. The station, including society and the man or woman at the wheel of a car in the new city is a privileged individual.

The "string bag" layout of grid roads which bound its neighbourhoods at one kilometre intervals provide fast, largely trouble-free motoring. Once you leave your neighbourhood roads, it is 50mph-plus throughout the system, and because of the nature of the plan, with its even spread of low density development, there are no

From the point of view of freight distribution by road, the picture is equally attractive. The grid roads feed on to the MI. which forms the town's eastern horder, and on to the new A5, 2 high-capacity dual carriageway built to near-motorway standards with grade-separated junctions. Milton Keynes is 52 miles from London, 66 miles from Birmingham; and the M25 with all its fast connections is ust 30 miles of M1 away,

The new Milton Keynes Central railway station, opened in May 1982, has exceeded all expectations, both of the devel-opment corporation and British Rail. It earned a surprising £1.8m in fares revenue in 1982-83; and while some of this was at the expense of the existing stations, Wolverton and Bletch-ley (which it replaced as the Inter City stop), much of it is new business. Traffic continues to grow: figures for the first three months of 1984 were 43 per cent up on the equivalent quarter of 1983. This is why next year's timetable will show 31 Inter City trains stopping there as against the present 18. The overall service is three or four trains in each direction, including limited stop services which reach London in just under an hour, compared with around 40 minutes by Inter

Milton Keynes Central is a lean-lined, rather superior fiveplatform station with platform buildings in cream tiles and glass. A generous footbridge plugs this into a concourse which is the ground floor of a glass-walled office building, one of several (existing under construction or planned)

concourse, cost £6.75m, of which the development corporation stumped up two-thirds. They (and BR) must be well pleased with the investment.

Outside the station, your taxi picks up one of the spacious tree-lined boulevards leading towards the town centre or back on to the grid road system. Opposite the railway station is an equally clean-lined but less luxurious bus station. United Counties green one-man buses move briskly - there is nothing to hinder them - but do not exactly overwhelm one by their numbers.

From the road you may catch glimpses of MK's parallel transport network, the Redways. This is a network of cycleways and footpaths, of which 120 kilometres out of a planned 200 kilometres plus has been completed, and so called for their red tarmac. They were planned to run through the centres of grid squares rather than follow roads, but this has disadvantages from the point of view of journey-to-work view of journey-to-work trips - seven per cent, only marginally more than national-ly, cycle to work - and perhaps also concerning security and vandalism.

> Redways are widely used for leisure journeys and by children

Recent stretches of Redway have more often run parallel to grid roads. Some users criticise poorly designed features (like blind corners) and poor maintenance, Nonetheless, it is clear that the Redways are widely used for leisure journeys and by school chidren; 46 per cent of MK households have bikes contribute more than a modest (national average 27 per cent) share (currently less than 20 per and accidents are half the cent), and Milton Keynes national average for cyclists. a quarter for pedestrians.

is the planned heliport. Having alter MK's layout or densities to public inquiry for a site near MK's main M1 connection, the development corpo-

placed heliport a mile or so further south. It is now looking for a developer. The heliport should provide for both executive and air-taxi services and, a scheduled helicopter service to

and from Heathrow. Public transport is the city's Achilles heel. MK is too low in density - on average about 11 persons to the acre-and too wide-spread to support good public transport without a very generous level of subsidy.

Dr Ralph Potter, a transport

expert until recently with the Open University, blames the inadequacies of Milton Keynes public transport on the layout of the town and the unwillingness of central government and Buckinghamshire County Council to provide adequate subsidies. There is, he says, no technological answer only a financial and political one. Wayne Purdue, the development corporation's transport planner, says he came to Milton Keynes with much the same pre-conceptions, but has changed his mind. He points that buses have running speeds and this and their direct routes are popular

with regular users. Most households have a bus stop within 200-300 metres of their front doors and the present level of subsidy - £1.1 a year to cover a 30 per cent shortfall from fares - is planned to secure a 30-minute minimum frequency on 11 trunk routes. all running through the town

cannot rely on that 30-minute frequency and if a bus drops out the wait is a long one. Moreover, whereas the development corporation's share of the subsidy is reducing, the county council (which once proposed a free monorail) is unwilling to Borough has had to pick up a bigger bill. Wayne Purdue One future transport facility would not even with hindsight, improve public transport.

Liverpool rise from basement to haunt title contenders

By Stuart Jones Football Correspondent

Liverpool..

Liverpool started yesterday afternoon amid unaccustomed alarm and discomfort. For the first time in two decades, they found themselves sitting in the basement of the first division but, after an exhibiton of stunning authority, they fin-ished in a position more suitable for the reigning League champions.

Liverpool climbed from twentieth to thirteenth place and rose in stature from the most unlikely relegation candidates to possible title contenders. That may sound far-fetched, but there was an awesome familiarity about the manner in which they took immediate, irresistible control and about the inevitability of the outcome.

Nottingham Forest had not previously failed to score at home against domestic op-ponents and had dropped only two out of 15 home points. Yet Liverpool's superiority was so overwhelming, their control so complete that one home supporter stood up after half an hour and begged them "to give us the bloody ball back".

Forest had seen little of it and used it productively scarcely at all. With Lawrenson continuing in his role as a sucel girder in midfield, with Johnston wil-lingly prompting at the front and with Gillespie bringing assurance to the back.

Hodge, free apparently to move to Queen's Park Rangers for £200,000 but not to Manchester United for £250,000, did disturb him on three occasions in the final halfhour and so, within a minute, did Bowyer and Davenport. Although Fairclough, Rush's

partner for the afternoon.

Tottenbam Hotspur had Hoddle

back in commanding form against Stoke City at White Hart Lane. Stoke, everybody's tip to visit the second division next season, duly lost, 4-0.

winger, got one of the goals. He may not be allowed by Peter Shreeves,

his manager, to play for his country in the World Cup game against Liberia next weekend. Tottenham

have to play West Bromwich on Saturday, then Bruges in midweek.

They could need even all their resources for that task.

Stoke's options are more limited. The best news of the weekend for

Bill Asprey, their manager, was that any money he gets from selling players can be used to buy others,

and not to reduce the club's massive overdraft of nearly half a milliom

Norwich City could also do with

some cheering up. Much of their main stand was destroyed in a fire last week. On Saturday. Channon,

Contenders bunch at

top of leader board

of the most promising young defenders in the country, danger seeped through the rest of Forest's defence like some poisonous gas. As soon as one yellow-coated threat was removed, another arrived

The booking of Hansen was all that interrupted Liverpool's flow, seemingly as effortless as ever, and they scored with their usual efficiency either side of the interval. Dalglish, whose aging talents have yet to be markedly impaired, created the first with a cross designed specifically for Whelan's forehead. With the assistance of Neal, who feels that Liverpool have "broken through a psychological barrier", Dalglish laid on the second as well. His low cross was turned in by Rush, and astonishingly Liverpool have yet to lose a senior game in which the prolific Welshman has claimed a goal.

Although he raised his total to 74 in 116 first division fixtures, his three against Benfica last Wednesday were perhaps the most significant. The self-doubt that had enveloped his colleagues during his Neal, who feels that Liverpool

oped his colleagues during his absence has now blown away and, as Neal said later: "The clocks were turned back this morning and we went back to the old days".

The evidence, displayed in front of a live television audience as well as Forst's biggest crowd of the season, will biggest crowd of the season, will hurt more than those who prematurely dismissed the champions. Tottenham Hotspur, their Milk Cup hosts on Wednesday night, might wish they had gone for an afternoon that they had gone for an afternoon that they had gone for an afternoon. stroll rather that watch ITV.

NOTTINGHAM FOREST: S Sutton; B Gunn, K Swain, J Metgod, C Fairclough, I Bowyer, G Mills, S Hodge, T Christia, P Davenport, C Waist. Davenport, C Walsh, LIVERPOOL: B Grobbelsar; P Nest, A Kennedy, M Lawrenson, R Wheten, A Hansen, K Daiglish, S Lee, I Rush, C Johnston, G Gillespie.

most. Unfortunately, their defence leaks abominably. They shared six with Newcastle United at Vicarage

Road, and have still not won at

from bad to worse for Portsmouth.

their first away win in 16 attempts.

Blackburn Rovers, who started

the day second in the table, lost 2-1 at Maine Road, before nearly 24,000 the division's highest attendance.

The task will get no easier for Blackburn, as next Saturday they

travel to Oxford United, the leaders. Lovell, who has scored Millwall's last seven goals, earned them a home point against Bristol City, and they remain third division leaders.

Hereford United are on top of the fourth division, dumping Wrexhaut

back into reality, 2-1.

Second division

home this season.

minute. Rummeninge accelerated minute. Runmenigge accelerated round the helpless Battistini and his sharp cross was headed home by

Yet almost immediately, with Bareal, Milan's sweeper, beginning to get a grip of things in defence, Wilkins started to control the middle with Di Bartolomei, Verza

and Evani. A minute after the substitution Milan were level as Hateley turned the ball back to Willkins on the right; he switched a long cross to the left, Virdis knocked the ball square and Di Bartolomei came through with later in disarray to smash in a shot from 12 yards.

Just helore half-time Rummes.

Just before half-time Romme-nings, looking suspiciously offside, sent a diving header a foot wide and in the first minute of the second half in the first minute of the second half forced Terramen to save. But all the time Inter were being stretched move by Hateley's running, whatever his limitations on the ground. Baresi, coming up in support of the attack, Inited a high ball from right to left which Hateley, beyond the far post, headed seroes the face of the goal. The ball was only nortially cleared. The ball was only partially cleared, Virdis pitched it back and again there was Hateley, andorne with perfect timing, to score the goal

Birmingham City Oxford United

This was not a match for the squeamish, the softie who likes bappy endings. But then neither was it a match for the hard-nosed sports reporter. Come to think of it, nor

could many among the committed crowd of 20,416 have gained much

it, and possibly a few players I can think of. It seems that whenever

teams challenging for honours meet these days, football takes a back seat

style, Baresi shamefully brought down Rummenigge when he had a clear run at goal, and twice Sabato came close to equalizing. But it was Hateley, who made the final explosive contribtion to the maich, a more newerful header away than the

David Miller on solutions to the

of three particularly valuable points, was, of course, the return of Jim Smith, the Oxford manager. The bitterass of his dismiss; from Birmingham City, one of the most

unsavoury of recent years, he can still taste despite all his sweet successes since. A draw seemed less acceptable to him than it did to Ron

saunders, his successor, who seemed well prepared for it, with five defenders stretched across the back. Having and Saunders, his successor

back. Having said that, the most noteworthy goal attempts did come-from the home tram: Wright had a ferocious free kick superbly pushed over by Hardwick Brenner whacked the foot of the post and Hopkins headed the only clear opportunity centimetres wide.

As Smith said, Oxford have nothing to fear from Birmingham, as the pair lead the race for promotion. Oxford proved on Saturday that they can mix it when the occasion demands. Hebberd, for one, revealed a surprising robustness for a player of such delicate skills. But with football back in the driving scat. I expect this little Oxford racer to show its class.

Another rough ride

on the dodgems

Clock goes back to **Greenwood years**

cruelly exposes

United's failings

Put a bet on Everton beating Manchester United in the Milk Cup

at Old Trafford tomorrow night. The way life is treating them at the

moment, they could score another five goals and make their way back

to Liverpool on angels' wings.

To say that Saturday's result has given the match added piquancy would be underselling the sheer

would be underselling the sheer impact of Everton's victory – both on United and themselves. For United it was a painful reminder of their shortcomings of character. For Everton it brought the realization that after winning at Liverpool and Inter Bratislava during the previous week, they had completed the transformation from an ordinary team into a formidable one.

"This was as fine a team performance as you could wish to see," Howard Kendall, the Everton manager, said, with the emphasis very much on "team", for in terms of collective energy and understanding. Everton are surely unmatched in the first division.

ing. Everton are surely immatched in the first division.

The present side, not substantially different from the one that a year ago was labouring near the relegation zone, has always played to the full extet of its limitations.

NOW, however, those limitations are receding a players like Southall, Reid, Steven and Heath fulfill individual potential in serving on team's cause.

the confidence that comes from being part of a cohesive unit. Here the responsibility lies with the

manager, and a performances such as Saturday's calls into question

ation and discipline.
Atkinson, who had never suffered such a heavy defeat as a manager, did not help his side by his selection. Three of the back four were big central defenders—McQueen. Hogg and Moran—and their ponderousness was repeatedly

exposed by the speed on the ground of Sheedy, Heath and Sharp. United

may be spared Sheedy tomorrow; he suffered a groip strain and was

Within 35 minutes, Sheedy had scored twice and Hearth once, to give Everton a lead which United never

Everton a lead which United never looked like reducing. The sheer eagerness of the Everton midfield meant that Robson, Olsen, Strachan and Moses spent most of the afternoon making vain lunges as blue-shirted men rushed by. Everton's fourth and fifth goals, scored late in the second half by Steven and Sharp, underlined the triumph of one side's will and the failure of the

one side's will and the failure of the

After the match Don Howe took 40 minutes to emerge from the Arsenal dressing room but his words were for the players' ears only. With West Hant's best attendance in two seasons, treated to-a craking match; it was no time for public condemnations. "Thirty-three thousand at a game like that -I have no criticism anywhere," Howe said as he hurried for the exit.

Allison scored a fine goal for Arsenal from 25 yards but the lasting memory will be of West Ham's third goal, Goddard classing the bell down and playing it off to the ball down and playing it off to Allen, whose cross was converted, via a nudge from Jennings, by Pike.

New-leaf Coventry in Shapter of accidents

By Vince Wright

Coventry City1 Sheffield Wednesday......0

Covertry City's habit of conceding late goals was not repeated on Saturday, much to the relief of their manager, Bobby Gould, who feared the worst when Sheffield Wednesday applied fierce pressure in the closing stages of an exciting match. However, protecting a lead which Gabson had given them, Coventry admirably stood their covend to

Gilson had given them. Coventry admirably stood their ground to inflict Wednesday's first defeat in the League since early September.

Two of the many odd decisions by the referee. Lester Shapter, provided the main talking points. Both incidents involved Lloyd McGrath, who was playing only his second senior game for Coventry. The first came after 34 minutes when McGrath-tripped Shelton

inside the penalty area. Mr Shapter, much to Wednesday's chagrin, gave a free kick outside it. In the second half it was Coventry's turn to protest as Mr Shapter ruled that McGrath had fouled Varadi in the hox. But their anger disappeared when Ogrizovic dived the right way to save Sterland's spot-kick.

Despite the controversies, neither manager criticized the referee. Howard Wilkinson, of Wednesday, preferred instead to blame his team for not being positive enough in the opening half hour. As it was, the unflappable Ograzovic easily dealt with Wednesday's stream of high balls.

balls.

Coventry's attacks were less frequent but more dangerous. Bennett wasted a glorious opportunity created by Gynn's thrilling left-wing run before Gibson scored the deciding goal in the twenty-sixth minute. Regis did his best work in defence as Wednesday began to assert themselves in the manner of title contenders. However, the real title contenders. However, the real drama happened at the other end when a spectator ran on to the pitch and prevented what could have been a second Coventry goal by

This was the type of fixture which would never be considered for live television, yet the entertainment value was equal to anything I have seen this season.

Rangers put Better day faith in competence By Hugh Taylor

Rangers Dundee United.

It is not only golf that has an in his 850th League appearance, Open Championship. The first division leader board remains scoring one and making the other in tightly bunched, only 10 points the 2-0 defeat of Queen's Park covering more than half the Rangers.

Watford score more goals than A well-taken goal by Ferguson in the forty-fourth minute was enough to give Rangers victory in this Scottish League Capb final at Hampden Park yesterday. It was neatly designed and lethally ex-ecuted by the former defender and it was one of the few moves of any distinction in a game which failed to provide excitement or touches of The previous week, they lost their unbeaten record at Wimbledon. On Saturday, they surrendered their home record to Wolverhampton Wanderers, whose 1-0 victory was dreary afternon.
United seemed again overawed by both Hampden and Rangers,

who have become a jinxed to them, and never looked snything like their real selves, even in the second half when their opponents were content to defend.

to defend.
Without showing the skill needed to overcome Internazionale, of Milan, in the next leg of the UEFA Cup, Rangers were at least competent and strong and deserved their win. They treated United almost with disclain in the second half. With Sturrock dominated by McPherson, who earned the man of the match award, the United attack was lifeless.

the match award, the United attack was lifeless.

Rangers did enough in the first half to win. The usually reliable United defence appeared worried by the clever touches of Cooper and the dash of Ferguson: to beat McAlpine with an accurate drive.

Sturrock had the ballin the other

net, only to be judged offside. The spready Milne had to go off in the eleventh minute with a recurrence of a groin injury and this seemed to envelop United in gloom.

Nor was it a display to please anyone apart from the Rangers supporters, who gave their team – severely castigated after their dismal defeat in Milan – an ecutatic reception as they paraded the new Skol trophy at the end of the match. DUNNEE UNITED: H Morbing: J Holt (sub J Carts, M Majors, R Gruph, P Hegarty, D Harry, E Barnon, R Hime Sub S Beedie), W Krissood, P Sturrock, D Doctos, RANGERSE P McGoy, A Deveson, M McChelled, D McPherson, C Paterson, I Rection, R Russell (sub R Phyto, C Preser, I Ferguson (sub D Mitchell), A McCost, D Concern Ferguson (sub D Missions) ... Cooper. MEFEREE: B McGinley (Bettron).

Third division

on the way for capital With a crowd of 20,156, new signings on display and a recent improvement in form by both teams, the Edinburgh derby between Heart of Middothian and Hiberman

Heart of Midothian and Hiberman at Tynecastle was expected to be a showpiece (Hugh Talyor writes). Only for 15 minutes at the start did-it produce the attractive football for which these famous old clubs have been renowned. It went sour after the builty mentions and dispenses the the bright opening and degenerated and endless running. A 0-0 draw was a fair result. Even

if the match never earned its place as the best of a curtailed primier these days, football takes a back seat in a game of human dodgems. Players were clauering into each other with rickening thuds, but the ball, sometimes by pure coincidence, was usually close enough at hand to justify the "accident".

Surprisingly, no fenders were broken, and only one player booked: Lawrence, of Oxford United, for failing to return the ball promptly at a throw-in. It was the longest piece of possession anyone had. The poor little round thing was belted around midfield without ever comeing to rest in a cradling net. About the only time the ball was on target was from a back pass. The hoarding above the Railway End scenned to have the answer: "Let Us Finish Your Products - Metal Treatments."

The reason for such a steely division programme, there was enough talent on view to allow the supporters to hope that better days are in store for the capital's clubs, who have been too long in the

As the League leaders were not in action because of the League Cup final, the matches played had no bearing on the race for the championship, which is developming into a three-pronged assault by Aberdeen, Celuc and Rangers, But Se Mines interest that recovery St Mirren improved their prospects of joining the elite by beating their Renfrewshire rivals, Morton, 2-1 at Paisley through goals scored by McAvennie and Fitzpatrick. Gillespie scored for Morton, who are at the foot of the table with five points.

Maidstone beaten at their own game

Scarborough and Maidstone United, two of the most famous FA CUp giant-killing clubs of recent seasons. have failed to reach this year's first round, the draw for year's first round, the draw for which will be made today. The two Gola League clubs were beaten inthe fourth qualifying round on Saturday by clubs from lower leagues.

Wheatley gave Tow Law Towa (Northern League) a 1-0 victory over Scarborough with a goal after 40 minutes and Bishop's Stortford (Isthmian League) beat Maidstone by the same margin with a goal by Harris 10 minutes from the end. Two more Gola League clubs, Kettering Town and Kidderminster Harriers, face difficult replays after

Fourth division

being held to 1-1 draws on their own grounds by Harrow Borough (Isthmian League) and King's Lynn (Southern League) respectively, and Degenham had to wait six minutes

The reason for such a steely

from time for Watson to give them a 1-0 win at Aveley (Isthmian

League).

Buckingham Town (United Counties League) are through to the first time in their 101-year history after a 3-1 home victory over Barking (Isthmian League), who had Phillips, Macfarlane and Hallybore sent off. Burton Albion (Northern Premier League) had Neil Warnock, their playermanager, and Vaughan, a defender, dismissed during their 1-1 draw at Scottish premier division

Metropolitan Police, 3-1 winners away to another Isthmian League side, Harlow Town, have reached the first round for only the second the first round for only the second time (on the previous occasion, in 1931, they lost 9-0 away to Northampton Town). Farmborough Town (Isthmian League), who beat Chippenham Town (Western League) 2-1, are through for the second year in succession and Pearith, 3-2 winners over their North West Counties League rivals, Formby, have how reached this stage three times in the last four years.

GOLF Brown is on course to earn tour exemption

Pensacola, Florida (Reuter) Ken Brown of Britain, shot a two-under-par 69 to take a onestroke lead after three rounds of the \$300,000 (£250,000) dollar Pensacola Open golf tournament on Saturday.

Brown, with 16 pars and two

birdies over the 7,093-yard Perdido Bay Resort course, saved par on four occasions. But the European Ryder Cup team member has three players, John Hahaffey, Bill Kratzert and Joey Sindelar, a PGA tour newcomer, breathing down his neck on nine-under par 204. One stroke behind them are Danny Edwards and Ralph Landrum, the first-round lead-

Brown's performance in this last official event of the 1984 PGA tour puts him a position o earn a two-year exemption from qualifying for the United States tour. He is curently at 151 on the tour's money list and needs about \$15,600 to break into the top 125 exempt players. A three-way tie for third place, or better, would give him the

Tom Watson, who bypassed this event, captured his fifth Arnold Palmer Award as the year's leading money winner when his two closest challengers, fellow Americans Mark O'Meara and Andy Bean, failed to make the 36-hole cut here. Watson, who has \$476,260 in official earnings this year, last won the award in 1980.

Calvin Peete, who also bypassed the event, secured the Vardon Trophy for the tour's lowest stroke average when O'Meara, his closest pursuer, returned a two-round total of 149 to missed the cut by six

SUTOKES.

Taylor in better frame of mind

By Sydney Friskin

By Sydney Friskin

Dennis Taylor had not practised since he won his semi-final on Friday night in the Rothmans Grand Prix tournament at Reading. In the first half of the final against the 1980 world champion. Cliff Thorburn, yesterday, he did not seem to be in need of practice.

Taylor eventually won 10-2 and received snooker's richest prize - £45.000.

Taylor built a lead of 6-2 in a second to the staylor built a lead of 6-2 in a second to the

£45,000. Taylor built a lead of 6-2 in a scheduled 19-frame match against an opponent who had achieved a 9-7 victory over Steve Davis the previous evening. Taylor potted so fluently in the last four frames before the main interval that he went into it with a smiling face, having compiled a brilliant clearance break of 112. Before that, he had successively made breaks of 57 (clearance), 40, and 33.

had successively made breaks of 57 (clearance), 40, and 33.

At the first interval, the frame scores were 2-2, Thorburn having once again shown his determination by drawing level, With a break of 39, he built a lead of 52-1 in the fourth frame and resisted a start built. fourth frame and resisted a spurt by Taylor, who had replied with 32.

Thorburn started the day well winning the first frame, and in spite of an early break of 53 by Taylor had a chance of winning the second He made a break of 45 but after He made a break of 45 but after potting the green lost the position he was seeking on the brown. His fate was later sealed when he missed the brown completely and hit the blue to concede five points. Taylor, taking all the colours in a row, made sure of the third frame to give ample position of better things to compare the position of the present things to compare the position of the positio when Thorburn defeated Davis on Saturday night, he became the first player to beat the world champion in nine months.

Davis, after falling 3-1 behind Thorburn, won five frames in a row to go 6-3 ahead, an advantage which was soon cancelled by Thorburn, who went on to win the march with

ATHLETICS

Too hot for some as Italian triumphs

SPORT

In the hottest New York City marathon ever and the slowest since 1976, a 26-year old Italian student with the looks and dramatic instinct of their football star Paolo Rossi

beat the Briton, David Murphy, to the finishing tape.

Several times in the last five miles. Orlando Pizzolato stopped dead clutching his stomacti, almost dead clutching his stomact, almost unseating the motorcycle policeman following behind as cramp over-whelmed him. Murphy who was 15 seconds adrift with less than two miles to go, was unable to catch the winner and eventually finished 43 seconds behind him.

Perplato's winning time was 3hr

seconds behind him.
Pizzolato's winning time was 2hr
14min and 52sec, the slowest New
York marathon since Tom Fleming's in 1975 (2:19.27).
The wet, slippery road surfaces
and 74 degree heat dictated a
tactucal race for the marathoners as

opposed to a greybound pursuit and many of the favourites, including the British pair Geoff Smith and Mike Gratton, dropped out of the reckoning, victims of the unhealthy

Onditions.

Nick Brawn, the 27-year old Oxford graduate from Canterbury, became Britain's only other representative in the top 10 finishers, clocking 2:17.42 — more than six minutes off his previous best.

The race began in misty, stiffling conditions as 18,365 competitors, the largest ever field for the event,

Increase in City centre **Olympic** drug cases

From Pat Butcher

Brussels

It did not take too much suiffing to detect the explosive material lurking under the rose garden of European athletes, lit seems that at least two more athletes, and possibly five, failed dope tests at the Olympic Games in Los Angeles. That is apart from Martti Vafnia, the Fina originally placed second in the 10,000 metres, and Anna Verouli, the European Javelia champlon from Greece, who have already been blentified.

It may seem difficult to believe

Identified.

It may seem difficult to believe that four days of athletics chat, lovinity, back-slapping and swopping of contracts could exclude any mention of the one item which could undermine the whole show. The question of drug abuse only arose as an addendum to the final press briefing, when most of the delegates had left for home. And it is only due to the sterling opposition maintained to the sterling opposition maintained by Sir Artbur Cold, the English president of the European Athletic Association (EAA) towards what he rightly calls "downright cheating".

rightly can't wowaright cheating that anything was said about it.

John Holt, the secretary of the International Amateur Athletic Federation (IAAF), admits that be has beard of two cases besides Vainio and Verouli, and has "asked for clarification from the later-national Olymple Committee, who are not due to discuss it until their council meeting in Mexico City next

Sir Arthur's riposte, bearing in mind that his association has banned athletes, ostensibly for life, only to see them reinstated by the IAAF, is that the IAAF and the IOC "are sweeping it under the carpet again. They should name the offenders straight away and ban

The EAA has also reiterated its opposition to world records set with pace-makers. This, too, is depite the decision of the IAAF Cameria Los Angeles to drop its prescrip-tions of pace-making on the ground that it was unworkable. But, as Sir Arthur points out, the IAAF did not drop its wording that a world record should be set in a bona-fide race, and that is what the EAA is

Island with Brooklyn. Many had been at the start since 5.30am enduring the crack of dawn humidity and pre-race nerves.

Among them was Gary Fanelli, a 34-year old Pennsylvanian, who was spirited along the 26,2 mile course to Central Park, drapped in a sheet and with a tree mendal course. and with a tape recorder strapped to his back blaring the theme tune to the film "Ghostbusters".

But clearly as the race progressed toward the 20-mile barrier known to long distance runners as the wall. the rejuvenation qualitities of marathon running was open to dispute. One of the favourities, Rod Dixon, last year's champion, who had been paid \$10,000 to enter this time dropped out Grete Waitz, who had admitted that her therefore the control of the control o

that her silver medal performance in Los Angeles was regarded as a failure in her native Norway, led the women's race from start to finish to win for the sixth time, in 2:29,29 Veronique Marot, who lives in York, finished second, beating one of the favourites, Laura Fogli of

race plan boosts IAC

The International Athletes' Club is proposing to hold three city-centre road races in Britain pext ventre road races in Britain pent vear with prize money of about £42,000 (Pat Butcher writes).

It is more welcome news for the IAC, who might well have been fighting for their survival, if not simply their credibility, had not their Coca-Cola meeting been included on next year's track grand prix circuit. prix circuit.

The road races will be modelled on the successful 5,000 metres event round the centres of Newcastle last April, which was selevised by the BBC. Indeed, the IAC scheme seems aimed at getting a good deal out of ITV, when their contract, separate to the one already agreed by the athletics' governing bodies, is signed in the forthcoming weeks.

in the forthcoming weeks.

If the road races are instituted as proposed, on May 5, 12 and 19, that will give the IAC a package of five events, including the "Coke" meeting on August 2, and their cross-country race, which is on December 15. Derek Johnson, the Melbourne Observation either medal. Melbourne Olympic silver medal winner, and David Bedford, the former 10,000 metres world record holder, are the IAC oficials who have been here at the European calendar conference lobbying for their club. their club.

Their five meetings would represent about 20 per cent of the annual rejevision coverage, but they were loath to admit that they could expect a comparable percentage of the £2m a year that the governing

Jones again

Steve Jones ran his first competitive race yesterday since winning the Chicago marathon in a world record time last Sunday. The corporal, aged 29, helped the RAF to an easy win over the Royal Navy, Oxford University and Thames Hare and Hounds over a 4½ miles company course as shotower. cross country course at shotover, near Oxford. He crossed the finishing line level with Chris Robison Royal Navyl, with the RAF filling the next four places.

HOCKEY: COUNTY CHAMPIONSHIP WARMS UP

Goal rationing leaves issue open

Goals were rationed in the southern division of the mens country championship yesterday (Sydney Friskin writes). Middlesex drew 0-0 against Kent at Canterbury, and Buckinghanshire were finals by bearing Oxfordshire 3-2 at likewise held at Slough by Berkshire.

This was an exciting match in Redfardshire SD which means that

These results leave the issue wide open for places in the south semi-finals from that group. All four teams have yet to score a goal. Potter, as expected, did not play for Middlesex.

In the other group, Surrey and Sussex drew I-1 at Cheam, Jeremy Cox scoring for Sussex in the fifth

Against the background of a white sandy beach lined with coconut palms, the opening race of the World Board Sailing championships

took a second place in the heavyweight division. The breeze suited the lighter sailor with good board speed, and France seems to supply most of these.

BADMINTON face challenge

best-ever performance in the Thomas and Uber Cup finals will

In the other group. Norfolk boat Bedfordshire 5-0, which means that they and. Essex have already qualified for the semi-finals in this

This was an exciting match, in which all five goals were scored in the second half. Faulkner, from a penalty stroke, and Seabrook put Hampshire two goals ahead: goals by Biggs and East enabled Oxfordshire to draw level, but Paul Jones scored the winner for Hampshire.

By beating Lincolnshire 4-2 at St Albans, Hertfordshire made sure of Cumbria.

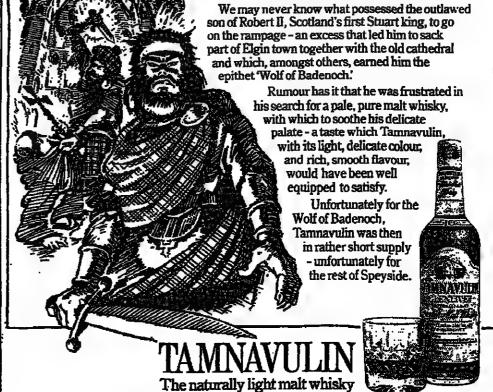

Yorkshire are held

Yorkshire and Leicestershire's county women's encounter ended in a 1-1 draw but was not with out incident (Joyce Whitehead writes). Yorkshire held the upper hand in the first half, despite Leicesterhire

the first half, despite Leicesternite taking the lead through Mary Grimley.

In Canterbury Sue lane, of Kent, and Sue Heely, of Cheshire, scored in a 1-1 draw, a surprise result for Kent. Cheshire enjoyed plenty of passession but could not score a possession but could not score a second time. After being on top in the first half, Sussex lost 1-4 to Somerset.

Babacoote's chance for belated **success**

By Mandarin (Michael Phillips)

"How the mighty are fallen" "How the mighty are fallen" could well be an api description of the Iwo sivisions of the Fawborough Maiden Fillies Stakes at Northogham today. BABACOOTE, my selection for the fast division, was Henry Cedl's "talking house" in the spring of this year, so much so that she was one of the favourites for the 1,009 Guincas even before she had set foot on a recovery. set foot du a racecon

But such are the builling characteristics of raceborses, area the most able can easily be fooled. and seven months later Balaccook is still seeking to lose her maiden certificate. This she should do at long last, following that good run behind her stable companion La Noblesse at York earlier this month when she finished ahead of Crown and Scrotte, who will be one of her principal opponents again this

Before the start of this season, Ian Balding must have been hoping that Paul Mellon's beautifully bred Mill Reef filly, NONESUCH BAY, would develop into a strong contender for the Onks in view of her pedigree and the way she ran in her only two-year-old race when she was runner-up in the Hoover Fillies Mile at Ascott But it was not to be. A variety of reasons, too many to chronicle, have restricted Nonesuch chroncle, may restricted vodesuch Bay to just two races this year, the first at Sandown in April, the second at Haydock earlier this month. But that latest run – she finished fifth behind My Volga Boatman – coupled with the fact that her stable has hit form, influenced me to go map on her to win the second division by beating that exasperating animal Recamier and Razyana

No matter how he gets on aboard ecamier, Willie Carson can win the Westborough Nursery on DOMYN-GA, always assuming that she can overcoe her low draw. Her fourth behind Sunera at Goodwood, followed by that excellent run behing Mirala at Pontefract point to er having a few pounds in hand on he book. Meanwhile

at Lingfield. MICKEY GO, so eye-caching when fifth on her debut behind Dublan at Newbory in the Stable Stud and Farm Stakes last month, can confirm that promise by winning the K F Butler's Wines Maiden Fillies KEY TO BAGHDAD (1.30)

October (3.00) and Main Reason (4.00) are my selections for the divisions of the Willow Maidea

Henry Cecil reacted furiously yesterday to the suggestion that Lester Piggott might be attempting to claim his tenth Derby on and Robin Cousins, in action.

Both François Bourin and Cash
Asmussen, the trainer and rider,
respectively of River Drummer,
who finished fourth, tacitly acknowledged Piggott's genius afterwards. "Cash had to go after Lesterif he wanted to try and win the
race," said the distinguished greyhaired Norman, "and that cooked
their goose. If he had been able to
ride a more patient race, we would Saturday's William Hill Futurity winner, Lanfranco, at Epsom next. winner, Lanfranco, at Epsom next. June. "I've never heard such utter nonsense. Steve Cauthen is 100 per cent my stable jockey, and that's the end of the matter", said the man who is now certain to become champion trainer for the fifth time. The trainer's feelings are understandable. Piggott's four-year association with Warren Place was terminated earlier this season and it was also announced that Cauthen ride a more patient race, we would have finished closer; but would never have beaten the winner." terminated earlier this season and it was also announced that Cauthen would be given the most lucrative jockey's job in racing in 1985. The 24-year-old American's outstanding talents are about to earn him his first British championship and Cauthen is just about the houest property in the sport, apart from Northern Dancer. Similarly, Asmussen commented: "I was cantering three out with Piggott was cantering three out with Piggott right in my sight. But there was nothing I could do about it."

Damister, who was only bearen three-quarters of a length into second place, would have given Lanfranco an even harder fight for his money if Khalid Abdullah's Mr Prospector colt had not hesitated when Cauthen first asked the two-year-old for his effort. The disappointment of the race was the indifferent performance put up by

Having said this, the speculation was still inevitable in view of Piggott's long and successful association with Charles St. George. The good luck and judgment of Lanfranco's owner have long been a byword in the game.

The sight of Piggott excelling on Like the Dewhurst Stakes winner, Kala Dancer, Lanfranco was a comparatively cheap, purchase,

Boos greet Procida

more fancied stable companion Mendez, who finished a most

Alain Lequeux Procida had a length and a half to spare over Nikos with the English colts, Rousillon and

Sarab, close up in third and fourth

Dancer's Dewhurst win but also that of Shadeed in the Houghton Stakes. Brave Bambino, who finished six lengths behind Kala Dancer at Newmarket, was only separated by two and a quarter lengths from Lanfranco on Saturday. The pointer to Shadeed's outstanding merit is given by New' Tick, who before being beaten five lenths in the being beaten five lenths in the Houghton, had finished a length and a head ahead behind Saurday's runner-up Damister at Newbury...

To accept the Futurity at face value as a guide to next season's 2,000 Guineas and Derby, it is necessary to discount the indifferent running of River Drummer.

As we go into winter quarters - or perhaps to brave the elements at Plumpton, whichever may be our respective lors - Shadeed and Gold Crest are joint favourites, for the 2.000 Guineas at 10-1. Gold Crest, Vincent O'Brien's impressive Berestort. States winner to States with the States w ford Stakes winner, is also first choice in the market for the Derby with Shadeed on offer at 14-1. At hese prices it might be safer to opt

The other highlight of the weekend's racing was, of course, Gay Lemur's hard-fought victory over Glowing With Pride and Bob Buck in the St Simon Stakes at Newbury, which paid a handsome tribute not only to Bore. Hardwood skill as a trainer, but also to the much under lated jockeyship of Geoff Baxter.

Geoff Baxter.

Cay Lemur split a pastern a formight after beating Jupiter Island in the Jockey Chrb Stakes in the Spring. Hobbs commented at that time. "It's only a bairline fracture. And with luck, I'll get him back in time to win the 'St. Simon in October." Seldom can a long-term plan have been executed with such hair's-breadth precision.

Middlesex selectors have work to do

By Nicholas Keith

Northumberland ...

For the third season in succession Middlesex have reached the semifinals of the county championship with livie difficulty. Once again their path to the final is barred by either Gloucestershire or Yorkshire. who much have proved too formidable an obstacle in the recent

Middlesex's victory by four tries to three penalties over Northumber-land at the Stoop Memorial ground on Saturday was achieved solely by the incisiveness of their backs. Their selectors, however, must find a front five capable of producing sufficient

They are particularly vulnerable They are particularly vulnerable in the second row, where they are missing the likes of Cuthbertson, who has opted out of county rughy. Ripley, that cheerful warhorse, makes an unhappy lock and emerged from this game with a black eye and two nutbrown ears.

Butcher, the Ripley of the Eighties at No 8, was far from

air of

anti-climax

It was, after all, too much to expect the players to lift their game for the second time in a week, particularly as this was, apart from four Gloucester men and a Wasp, a

rematch between the same players of Bath and Bristol, who figured in a thrilling encounter on Wednesday. It was a poor game. Perhaps for a non-partisan visitor from across the

water it was just as well it ended in a draw, with two penalties apiece. Gloncestershire men might dis-agree and argue that they had, territorially, the better of the game.

but those bailing from Somerset could argue with equal conviction that it was in fact they who squandered most of the scoring opportunities. Palmer missed easy

penalties in the first five minutes of each half as well as two others in the

last five. Horion, too, had gone close with two dropped goal attempts and right at the end Trevaskis, with a kick and chase, nearly got the winning try for

Hogg for Gloucestershire, had had his chances too but they were from much longer distances. For the rest of the game there was hardly a

Simpson recovered a lot of loose possession for Somerset, as did Spurrell, who carried an injured

spuriel, who carried an injured shoulder almost throughout. None of the possession even at the scrums, where both sides were equal, was of a kind that made for a comfortable afternoon for either. Harding or Hill. Both these fine scrum halves did well in frustrating circumstances whereas Sorral and

circumstances, whereas Sorrell and Horton largely kicked for position.

The scores however came from the kicking of others. Hogg and Palmergot a penalty each in the first half. Palmer, then, kicked, another one two minutes after the interval.

one two minutes after the interval, a

against, shall I say, the run of play only for Hogg to equalize with six

scrummage, although he provides a powerful presence in the lineout and the loose. Yet the Middlesex back row had great difficulty in stopping

the tireless foraging and belligerent bursts of Edwards, Gosforth's promising flanker.

shadow of the side who won the championship in 1981 and finished runners up to Middlesex in 1979.

Their forwards were game enough and more than beld their own, but

for concides ideas they relied entirely on Edwards and the boot of Johnson, who kicked three penalties but missed three more and an

Johnson also tested Stringer with several high punts. England's new full back was equal to this tank, but

failed with five attempts at goal and was generally off key with his

kicking. Stringer will be put on his mettle by yesterday's report that the

England selectors have sounded out Hare about his availability for the

attempted dropped goal.

Northumberland are

Notts, Lines and Derby 24

In ball-winning ability there was little difference at Beeston on Saturday, but in ball-using ability Notts, Lines and Derbys were a team apart, They beat Surrey by three goals, a dropped goal and a penalty goal to a goal and a penalty, and go to Gosforth ou November 10 to pay Northumberland for a place in the semi-finals of the county championship.

There were four late changes in the Surrey side, but the result would the Surrey side, but the result would have been much the same without them. Notes, Lines and Derbys are the Nothingham club under a grander name, and it came out clearly in their unity and driving force, with the forwards bunting as a pack, Hodgkinson and Murphy scheming and sniping at half back, and the threequarters running and tackling hard. tackling hard.

graced there is

Surrey were fractinally slower to think and act, made bandling errors in midfield, and did not kick the ball in midned, and tild not kick the ball well. Such juck as there was ran against them too. Their best passing movement ended with the ball dropping behind Sainter on the left wing and Notts, Lines and Derbys rushing away to score their third try, Marphy going over from a mail in Murphy going over from a mail in the corner and Hodgkinson convert-

Notis, Lines and Derbys had first use of wind and sun and were 12-0 up at the interval. Hodgkinson kicked a 50 metre penalty and dropped a goal from a ruck, and in between he converted a penalty try. Speculation that Surrey might still win was unfounded. Notes, Lines and Derbys were no less masterful in the second half than they had been in the first.

dropped goal.
It remained thus until seven minutes before no-side when Gray's

Kent pipped at the post and elsewhere failed to bring torth points and Yorkshire's line held until four minutes into the second half when Williams landed a neat

Yorkshire ... Kent

The regulations governing this season's county championship mean that Yorkshire and Kent's meeting in group two of League One at Otley on Saturday was only the second time that the counties had faced each other in close on 100 years.

faced each other in close on 100 years.

An astonishing reversal in fortunes during the last minutes will have inscribed an indelible mark on the memory of all those who witnessed Kent's sudden demise and Yorkshire's last-ditch triumph by two goals to a dropped goal.

Yorkshire had been obliged to take the field six short of the side that had beaten Somerset at Bathearlier this month. Kent's formidable pack of forwards would have no trouble, it was thought, adding to their reputation. Yet Kent's total command forward and all the possession that resulted from dominance there in the set pieces

minutes before no side when Gray's opportunism brought him a try which he converted. Kent needed to give proof of their mastery now. Alas, in their anxiety the ball ran loose, and Mason kicked on to the line to score a second try, Gray's conversion was the last kick of the match, and with it he signalled an improbable victory. improbable victory. improbable victory,

Swansea pair return to face Wallabies By David Hands

Tony Swift and Mark Davies, Internationals for England and Wales repectively, return to Swansea's side for tomorrow's match with the Australians at St Helens after missing the 25-12 win over Laicester at the weekend. Davies is joined in the back row by John Thomas, which allows Cheeseman to play lock against the towning to play lock against the touring

Neverless, Swansea will be Neverless, Swansea will be without three capped players—Richards, Dacey and the suspended Richard Moriarty. Dacey's Aled Williams, at stand off haif, opended his side's acoring against Leicester with a try and a dropped goal, but it took Swansea until the final quarter to make the game safe.

to make the game safe.

Leicester lost Woodward (hamstring) and Cusworth (ankle) in the first half but led 12-10-before Emyr and Brian Thomas scored tries and Wyatt, captain for the day, kicked penalties and two conversions.

There were commissing fortunes for the students of Oxford and Cambridge. While Oxford went down 34-14 to Northampton SWARSEA & Autmilens: M Wyatt. A Switt, G. Jacobs, S. Burns, P. Morterty, J. Williams, R. Jones, C. Williams, H. Gheon, S. Evans, P. Morterty, J. Williams, R. J. J. J. London, R. Cheebenan, M. Davies, J. Thomas. Replacements R. Byth, D. Seitzro, G. Hotchins, K. Cokobaugh, P. Hutchers, B. Clegg.

Irish selectors have plenty to mull over By George Ace

The four Irish provinces in action

The four Irish provinces in action-over the weekend in Belfast and. Limerick provided the selectors with plenty of food for thought when they met last night in Limerick to select the side to play Australia at Lansdowne Road on November 10, which will be announced in Dublin this afternoon.

Ulster's stirring victoy at Raven-Ulster's stirring victoy at Ravenhill on Saturday over Irish kingpins
Leinster by 16-3 opened ap many
avenues for conjecture and certainly
provided more in the skills of the
game than Munster's rather flattering win over Commanght at
Thomond Park yesterday, 15-6.
Names that must have figured
large in the selectors' deliberations
last night were the uncanned players last night were the uncapped players Matthews and Anderson among the

forwards and Brady at scrum half for Ulster, while Mullin, the Leinster centre, looks special. Ciaran Fitzgerald, who lost his lish place last season and was superceded by Duggan as captain for the games against England and Scotland, had a fine match-for Connaught as captain, and must be close to being recalled to lead Ireland, Ward, who scored seven of Munster's points, was equally efficient.

THE TIMES MONDAY OCTOBER 29 1984 RUGBY UNION: SERVICES PROVE EASY TARGETS FOR WALLABIES

By David Hands Rugby Correspondent

Combined Services.

Australians . As a social exercise in the lighter aris of touring. Saturday's match at Aldershot was a triumph; as a tactical exercise for an Australian side one week away from their first international, it was a disaster notwithstanding the largest points haul of the tour, which brought victory by six goals and two tries to three penalty goals at the Military Stadium.

Studium.

As a workout for a team looking suspiciously near international strength, it degenerated into a game of catch as catch can: the lineout weaknesses evident in previous games were still on show, and three players had to leave the field injured after a bizarre series of accidents left only three of the original six front-row forwards in tact. row forwards in tact.

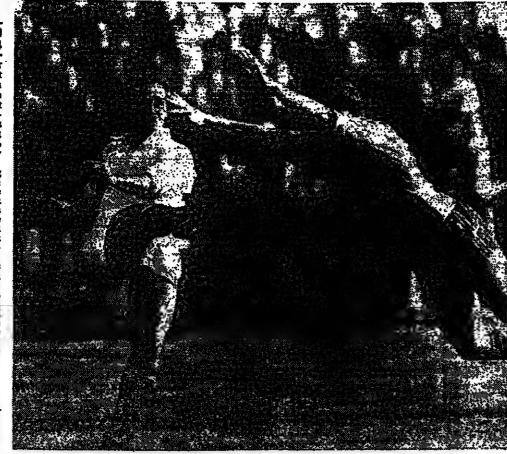

only three of the original six frontrow forwards in fact.

The most serious of those injuries
was to Lillicrap, the improving
young loose-head prop who had
been on the field barely two minutes
as a replacement for Rodriguez
when he went down with damaged
ankle ligaments. He will be
umwellable for the best part of three
weeks, so Greg Burrow, a tight-head
prop from Sydney University is to
be flown in, Burrow toured Britain
in January with the: Australian
Universities.
Rodriguez required stitches in a
cut on the top of his head and Slack,
the captain, went off at half-time
feeling a hamstring, but most
measures were precantionary with
the game against England only
seven days away. Inevitably the
impetus of the side slowed after all
the reshuffles, which took Poidevin
out of the pack and on to the wings
but in any case the Australians led
32-6 at half-time and were not
seriously inconvenienced playing
the second half with only 14 men.
Roche was limping during the last
quarter after a kick on the knee but
happily recovered later.

A degree more fortune would

quarter after a kick on the knee but happily recovered later.

A degree more fortune would have seen them score three more tries, because the Services' backs were baffled and bemused by the sleight of hand which saw the ball whipped from half back to wing in less time than it takes an average English scrum half to decide whether to pass run or kick. Such whether to pass, run or kick, Such play, of course, is fine for a sunlit afternoon on a beautifully prepared playing surface; on a grey Murray-

Drop kick: Worral kicks and Reynolds drops (Photo: Ian Stewart)

less satisfactory.

Much of the Australian back play on Saturday revolved around Lynagh, who has appeared in all four games so far. If Hawker is to regain his international place he will have to do well against Swansea tomorrow. Lynagh's dependable place kicking is another point in his favour. Un front, however, the Services' jumpers managed to match the lanky Campbell and Williams and the Australian forwards continued to concede a striding of penalties when the ball striding of penalties when the ball had gone to ground.

It was instructive to note that Campese, who played right wing in

which prevented Underwood mark-ing him. Campese scored three tres, often appearing in midfield, while Underwood saw most of the ball won by the Services locked away and eventually resigned himself to defence and a couple of try-saving tackles on his wrong wing.

detence and a couple of try-saving tackles on his wrong wing.

I imagine that Campese will be back on the right against England with Moon on the left, well though Grigg played at Aldershot. From the Services' viewpoint Evans and Goslia made some darting runs in a noble effort to onen the same but noble effort to open the game, but they were up against a side overwhelmingly better equipped to

field day, for example, it may prove the first match and full back in the less satisfactory.

Much of the Australian back play which prevented Underwood markand voting for its retention?

Turnbull's star turn Weekend results

By Iau McLauchiau Turnbull at lock must have done his In near-perfect conditions Heriots and Hawick enthrailed a huge crowd at Goldenacre on Saturday, nternational chances no harm. Kelso emphasized the difference Hawick playing like champions were worthy of their 31-25 win. They lost tighthead prop Ron Nicol, with rib damage after 15 minutes but the remaining 14 men raised their game to such heights that one research votices the discovered between the top and bottom of the

first division when they scored 15 tries against Glasgow Academicals, of their 90 points, Colin Flanigan the full back scored a try and 13 conversions for a personal tally of 30 points. scarcely notices the discrepancy.
They were hopelessly outgunned Stewart's Melville found their neighbours, Edinburgh Academicals, too much of a Handful at Inverlicith. The visitors won 22-15. Stewarts Melville acored three tries through Mackenzile, Brewater, and Clader, with Scott adding a penalty. Academicals socred through Greig and Richardson (tries) Paton (dropped goal) and Hutcheson (three penalties and one conversion). in the tight scrum, where the Nos, McGaughey, was seconded to tighthead; but in the lineout and the loose they dominated. Both teams scored three tries but where Andy Irvine had an off day with his boot, his counterpart Colin Easton, could not miss.

It would seem unfair to single out one Harwich player for special praise, but the young Derek Record victory

Cape Town (AFP) - South Africa battled to a 22-13 win over the South American Jaguars here on Saturday. The Springboks, who led 12-7 at half time, scored four tries Suva, Fiji (Reuter) - New Zealand's cohesive and disciplined forwards ran in seven tries to beat Fiji by a record 45-0 here on Saturday. Persistent pressure drained Fiji of spirit and strength and gave the All Blacks a 21-0 lead and Errol Tobias, their stand-off half, succeeded with two penalty goals. The Jaguars, who had fought to the end, replied with a try and at half-time. The match threw up a new star in Kieran Crowley, the full and three penalties from their back and the only meapped player captain and standoff, Hugo Portz. in the New Zealand side.

Knowledge of unlawful false statement not necessary

at the P

Springbok win

Wings Ltd v Ellis Before Lord Hailsham of St Keith of Kinkel, Lord Scarman, Lord Brandon of Oakbrook and Lord Brandon of Lord Templeman [Speeches sold October 25]

Knowledge by a defendant of the making of a statement was not a necessary ingredient of an offence under section 14(1)(a) of the Trade Descriptions Act 1968. Further-more, a statement could be "made" for the purposes of section 14(1) at times other than its runication to another person. Thus, in the absence of the defence afforded by section 24 of the 1968 Act, a company which in the course of its business as a holiday tour operator published in May 1981 a travel brochure containing a false statement about accommodation made a statement which it knew to be false contrary to section 14(1)(a)(ii) of the Act, when, having become aware of the error in June 1981 and taken steps to prevent potential customers from reading the false statement, the statement

on January 13, 1982. The House of Lords allowed an appeal by a trading standards officer, David Kenneth Ellis, against part of the decision of the Queen's Bench Divisional Court (Lord Justice Robert Goff and Mr Justice Mann) (The Times, December 7, 1983; 1984] I WLR 731) who on December 2, 1983 quashed the defendant company's conviction by Plymouth Justices on January 17, 1983 for an offence under section

Section 14(1) provides: "It shall be an offence for any person in the course of any trade or business -(a)to make a statement which he knows to be false; ... as to ... (ii) the nature of any ... accommod the nature of any...accommoda-tion...provided in the course of any trade or business; ... "
Section 24 provides a defence

where a defendant proves that an offence under the Act was due to the mistake, act or default of another, accident or some other cause beyond his control. Mr Anthony Scrivener, QC and Mr Nicholas Nardecchia for the

prosecutor. Mr John Mathew, QC and Mr James Price for the The LORD CHANCELLOR. agreeing with the speech of Lord Scarman, said that the certified question for the opinion of the House was "whether a defendant may properly be convicted of an college under section (A(1)(a) of the offence under section 14(1\(\chia\)) of the Trade Descriptions Act 1968 where he has no knowledge of the falsity of

the statement at the time of its publication but knew of the falsity publication but knew of the falsity at the time when the statement was read by the complainant."

The Divisional Court rightly held that they were bound by the decision of the Court of Appeal in R

v Thomson Holidays Ltd ([1974] QB 592) but made use of the authority to establish the general proposition, taken out of context from the judgment of Lord Justice Lawton, pugment or Lord Justice Lawton, that "a statement is made when it is communicated to someone".

When, in the course of a trade or business, a brochure containing a files containing a

business, a procedure containing a false statement was issued in large numbers through, a chain of distribution involving several stages and intended to be read and used at all or some of the stages, it did not follow that it was only "made" at its tination. It might be "made" when it was posted in bulk, when the infor-

posted in bulk, when the information was passed on by telephon, or in smaller batches by post, and when it was read by the ultimate recipient, provided that at each stage what happened was in accordance with the original intention of the issuing house.

It did not follow that repeated attempts to convict a firm in respect. of each separate communication of of each separate communication of an individual copy of a brochure should meet with anything but reprobation from the courts. That had to depend on the circumstances.

The company's attempt to induce the House to declare that Thomson was wrongly decided failed.

In the instant case the statement was made when the complainant read the brochure. What rendered the charge

particularly objectionable to the company was that at the time the complainant read the statement, the company honestly believed that it would be read by a member of the public in a corrected and accurate form. They had used their best endeavours to correct the statement. and genuinely believed that those

Many of the offences created by the Trade Descriptions Act 1968 were absolute offences. But offences were absolute offences. But offences under section 14 required as an essential ingredient of the offence knowledge by the maker of the statement that it was false (section 14(1)(a)) or recklessness in the making of it (section 14(1)(b)).

An ordinary person reading an account of 2 conviction after reading the section would think that the offender had been convicted of fraudulent conduct.

The Act said nothing about fraud or intent. It said nothing to the effect that the defendant should at least know at the moment when the

being made in a form other than required mens rea, guilty know that which was intended. It said or intention, in whole, in par only that at the moment when the not at all, turned on the su

who mounted the present proceed-ings and persisted in the appeal, there was room for caution by prosecuting authorities in mounting proceedings against innocent defendants. They should be even more careful in cases which ordinary people would read as containing an implication of feath but when the dication of fraud, but where the offender was of excellent reputation

LORD SCARMAN said that the statement complained of was contained in a brochure prepared and published without knowledge of its faisity by the company in May 1981. It was not read by the complainant until January 13, 1982, by which time the company knew that it was false.

Two issues arose on the appeal: first, whether, as the company submitted, the offence under section 14(1)(a) was knowingly making a false statement, or whether it could be committed without knowledge that the statement had been made. Second, what was meant by the words "make a statement" in their

statutory context.

The charge laid under section 14(1)(a) alleged that on January 13, 1982 (the prosecution tied its case to that date) the company made the false statement.

The Trade Descriptions Act 1968 was a very important safeguard for millions of members of the public who chose their holidays in reliance upon descriptions which they read in brochures which they were unable to check.

If the protection was not to be undermined, the Act had to be widely known, easily understood and be of general application save in situations specifically excepted by

the statute The Act operated by prohibiting false descriptions under the pain of penalties enforced through the criminal courts. But it was not a truly criminal statute. truly criminal statute, its purpose was not the enforcement of the criminal law but the maintenance of tradine standards.

In the end, the question whether

required mens rea, guilty knowledge or intention, in whole, in part, or

only that at the moment when the statement was made the defendant had to know that the statement was false.

Section 24 of the 1968 Act provided a special defence which was available to a defendant in section 14 cases. The company failed to invoke the section and in the absence of a plea of that defence had no answer to the charge as framed.

Without criticizing the authorities who mounted the present proceedings and persisted in the appeal; The necessary ingredients of the

offence under section 14(1) (a) were that: (1) a person in the course of a trade or business (2) made a sustement (3) which he knew to be false (4) as to the provision in the course of trade or business of any services, accommodation or facili-

the essence of the offence was knowingly making a false statement. It was submitted for the prosecutor that it sufficed to prove that the statement was made on a person's behalf in the course of his business and that its content was false to the and that its content was false to the knowledge of the person carrying on the business.

The latter construction was correct. It advanced the legislative purpose embodied in the Act in that it struck directly against the false statement irrespective of the reason for, or explanation of, its falsity. It involved contruing the offence as one of strict liability to the extent that the offence could be committed unknowingly, that is, without knowledge of the act of statement; but that was consistent with the social purpose of a statute in the class to which the Act belonged.

The strictness of the offence did no injustice because the defendant, if he acted innocently, could invoke and prove one of the statutory defences contained in sections 23 and 24 of the Act and which, contrary to the company's suboffence under section 14. Moreover, the prosecutor's sub-

mission had the advantage of following the literal and natural meaning of the words used. The subsection said not that it was an offence knowingly to make the statement but that it was an offence. to make the statement.

The question remained whether the company made any systement on January 13, 1982 when the complainant read it. The company submitted that the statement was

made only once, on publication of statement when it was published to the brochure in May 1981. The importance of the question was not only that the prosecution pinned its case to January 13, 1982,

but that in May 1981 the company

false whereas in January 1982 they That submission was not onen to the company before the justices or the Divisional Court. The Court of Appeal had decided in R v Thomson Holidays Ltd that a new statement was made on every occasion that an interested member of the publi read it in a brochure published by company engaged in attracting his custom. The court considered that

Thomson was correctly decided, although his Lordship did not accept the totality of the court's

A statement could consist of a A statement could consist of a communication to another; and in the context of the 1968 Act and, the circumstances of that class of business, communication by an uncorrected brochure of false information to someone who was invited to do business in reliance upon the brochure was to "make a statement" within section 14(1)(a).

The there could be statements But there could be statements which were not communicated to others. It was unnecessary for the Court of Appeal in *Thomson* to hold

nunication was of the In the natural case the estiment was made when the brochure was published. But further statements to the same effect were made whenever persons did business with the company on the strength of the

There was no injustice in that. If the company believed that there was no default on its part when the false description was communicated to description was communicated to the complainant it should have admitted the offence and called evidence to establish a defence under section 23 or 24. Accordingly, the company did make a staten to the complainant on January 13,

The appeal would be allowed and the certified question would be answered as follows: "A statement which was false was made by the company in the course of its business when it was read by the complainant, an interested member of the public doing business with the of the puone doing ourmess with the company on the basis of the statement. The offence was committed on that occasion because the company then knew that the statement was false. The fact that it was unaware of the falsity of the LORD BRANDON, concurring,

said that in so far as R v Thomson Holidays Lid purported to decide as a general proposition of law applicable to all cases, that a statement was only made for the purposes of section 14 when it was communicated to someone, the communicated to someone, the decision was not supported by section 14 and was wrong.

A statement could well be made even though no one immediately heard or read it.

That did not ween the statement could be immediately in the statement could be immediately in the statement of the statement of

That did not mean, however, that the statement had not been made for the purposes of section 14 if it was intended that, after it had been made once, many copies of it would be recorded or printed and those consent thereafter put and kept in circulation, with the intention, or with the natural and probable consequence that the statement would be heard or read by a particular person or body of persons, or by a substantial section of the public.

In the present case the false statement was a continuing statement in that it continued to be made so long as such brochures remained in circulation without

ring, said that on the facts the company committed an offence under section 14 without intending to do so. The company, no doubt for good commercial reasons, did not rely on the defence under section 24 It was not open to the Divisional Court to invent a different defence court to invent a different defence and to quash the conviction by asserting that when the company discovered that the statement was false it immediately did all that could reasonably be expected in order to neutralize the error.

advertisements. It was necessary that the falsity should be known but by section 24

for Mr J. E. Coyne, Plymouth; Knapp-Fishers.

RESEARCH PROGRAMME ON THE CHANGING URBAN AND REGIONAL SYSTEM

The Economic and Social Research Council is launching a new programme of research on the Changing Urban and Regional System in the UK. Outline research proposals are now invited.

The aim of the programme is to improve understanding of the local impacts of, and responses to, economic and sociel change in the UK, and to explore the implications of such change for planning and development policy. The programme will comprise a co-ordinated series of local studies, set within the context of a broader national framework developed by the Programme Co-ordinator.

Researchers or research groups interested in conducting a locality study within the programme should submit outline proposals by 30 November 1984. For further details contact: Mr J Papadachi, Environment and Planning, Committee Secretariat, ESRC, 1 Temple Avenue, London EC4Y 0BD. Tel: 01-353 5252.

HORIZONS

The Times guide to career choice

Here is a job worth asking for

By Daphne Silvester

When a well-known woman journalist advertised for a parttime researcher for 12 hours' work a week in London she received several hundred replies, some from as far as the Isle of Skye. The response was mainly because of the glamorous image of journalism together with the lure of working for a famous person. That explains only the attraction of the job, not the reason why so many people felt qualified to "do research".

How could they be qualified in the technical sense? There are no degrees in research, no "B.Scs in research" (or is it an art and not a science?) no RSA awards, no tests for speed and accuracy, no proof of practice.

Research is not a subject. It is a discipline and success in it is a result of a mixture of certain personal characteristics bound together with literacy, a know-ledge of the alphabet (a rarer phenomenon than those over 35 might think) and experience of one or more fields of interest.

Only eight years ago, when looking for a new job, I was told in confidently assertive tones by a bold lady in a first floor office in Bond Street that "researchers are ten a penny". Now her successors financial environment and in

Two top research executives explain why their profession is now an important discipline and not just an extra job for a

will tell you "they're like gold

disgruntled secretary

There has been a remarkable transformation since I was sent away with my confidence shattered - and research is used and valued widely. There are few reputable executive search firms, for example, who do not parade. the skills of their research department in front of prospective clients as proof of their company's analytical and objective professionalism. "Doing my research now" once was regarded as an automatic use for an able but discontented secretary. Now a different animal is emerging: not a passive processor of other people's thoughts and decisions but an active contributor of ideas with the brains and the commercial nous to back these ideas up with hard facts.

I have done research in a

headhunting. The qualities essential to success are common to both - and probably to any commercial setting. First, you need a certain feel or "flair" for your subject, secondly, an enquiring mind; thirdly, a good measure of dogged perseverance; fourthly, an eye for detail. It has been my experience that the people best endowed with the first two tend to be short on the last two. People with quick minds able to take a wider view are often impatient.

However, it makes sense to realize that, however clever or useful your work, its value is greatly diminished if your conclusions and arguments cannot be speedily absorbed by the' recipient. And, course, inaccuracy on one or two minor points might be sufficient to undermine confidence in the whole basis of your conclusions.

A good researcher must be able to see into the mind of the person for whom the work is intended and you must be prepared to adapt your presentation to suit the recipient. Some people prefer a few perfectly prepared morsels of haute cuisine while others are happier with bags of fast foods some prefer to wait longer for a fully digested meal.

Daphne Silvester, is a research partner for Tyzack & Partners Ltd.

Give them a clue you are bright

By Mychelle Hunter

Research is the creative and disci-plined process of investigation. It is the pursuit of a path strewn with clues, some informative, others deceptive. Eventually the pursuer of the path, distracted at times by detours, finds the answer. It may not be the expected answer to the original question, but an answer nevertheless.

Research does not just occur in the sophisticated atmosphere of a management consultancy or the detec-tive's rooms at Scotland Yard. Nor is t reliant on advanced retrieval systems, elaborate codings or impress-ive tomes. Its quality is dependent on the mental and personal characteristics of the person who has the task of finding the answer. The search may be simple and

easily resolved, or simple and difficult to resolve, or quite complex in question and answer. The researcher may be in a laboratory, a bank, the secret service, an advertsing agency, a film studio, a publishing house or a research bureau. In the commercial world these

detectives are often women – women of varying background, interest, motivation and creativity. Their arrival at the role is often an accidental event. A secretary is asked to make a few telephone calls or to

look up a company in the local library. In an advertising agency, she may start in media liaison role and gradually move into product or market research for the agency's clients, or in larger agencies, for the

agency itself. More often than not women arrive at the role out of frustration, seeing it as an avenue to avoid their current position of secretary and being released from the typewriter. Or, at the other end, they will perceive it as a route to management. Rarely does one hear a school leaver or a graduate saying that she wants to be a researcher. There seems little awareness that commercial research can be

I have interviewed, hired and trained many researchers here and abroad. Inevitably young women came to the interview out of curiosity. When asked why they came for the interview the usual response was: "It sounds exciting and I'm fed up with. .

." When asked what it was that led them to assume that "It sounds exciting" there was either silence or the aspiration for glamour and travel. Once in a while the rare candidate would come by who would manifest a desire to learn - not simply to learn a new job, but to learn about different industries, products, people. These

possessed a curiosity, an eagerness to

Only two have ever said: "I want to be a researcher". Perhaps that is due to the general lack of awareness that commercial research can be a profession with its challenges, excitements, drudgeries and rewards.

So long as employers sustain the attitude that research is a static, noncreative function, researchers will continue to be back-room support, a situation unattractive to women of drive, imagination and initiative.

If the researcher can subtly make the transition from a supplier of infor-mation to an originator of new questions and new solutions through research, someone, somewhere, will take notice. If her solutions display suggestions that not only the obvious but the subtle, less overt and even opposite avenue has been trod, then her originality may begin to be recognised and her skills may be applied to other areas.

Rather than transferring printed matter from one piece of paper to another, she will look beyond the apparent into what awaits discovery. She may become indispensable and her research might even become a marketable product for the company. Mychelle Hunter is a director of Breckeridge Research Ltd.

SHERBORNE SCHOOL

SIXTH FORM

SCHOLARSHIPS

Three half-fee Scholarships will it nered inter-se scholarships was or awarded to boys entering the achool in September 1985 for a two-year A Level course in the 6th Form as the result of an examination to be held on February 6th – 7th inclusive.

For further details and applica

forms please write to The Headmaster's Secretary, Sherborne School, Dorset DT9 3AP. (Closing date: 18th January)

Shrewsbury School requires an Assistant Chaplain in 1985. The post might suit a graduate priest who had served in his first parish and was interested in working for perhaps four or five years in a boarding school. A commitment to the pastoral side of the job would be more important than experience of classroom teaching. The School has its own Chapel and the post is

ASSISTANT CHAPLAIN

Applications should be made in writing to The Headmaster. The Schools, Shrewsbury SY3 7BA, to whom a CV and the names, addresses and telephone numbers of two referees should be sent.

The Leverhulme Trust

RESEARCH AWARDS ADVISORY COMMITTEE INDIVIDUAL AWARDS FOR 1985

STUDY ABROAD STUDENTSHIPS

Studentships for 1 or 2 years advanced study or research at a centre of learning in any part of the world except the U.K. or U.S.A.

The awards comprises an allowance of 25,000 a calendar year for maintenance plus return air passage, haggage allowance and internal travel expenses. Additional allowances at the discretion of the Committee for a dependent spouse (up to 21,400 a year), for counties with abnormatly high cost of living, and a contribution towards fees if abnormally high.

tiess with approximately high cost of living, and a contribution towards fees if abnormally high.

Applicants must be first degree graduates of a U.K. university, holders of C.N.A.A. degrees or equivalent education in the U.K., have been at actual in the U.K. or the Commonwealth, be under 30 on 1st October, 1985 and normally resident in the U.K.

3.45

 Calling a temporary freeze in television's nuclear barrage, HORIZON (BBC2, 9.25 pm) looks towards the next milestone on the road to mass destruction - germ warfare. For viewers still scarred by Threads the programme's message is as welcome as a dose of salmonella. A clandestine parallel arms race has begun. America's expenditure on biological defence has increased four-told, 15 years after President Noon outlawed such weapons, arguing that man held too many seeds of his own destruction many seeds or his own destruction to be incubating the spores of an alternative armageddon. As sharp and chilling as the cicles which drip from the hot-line between Moscow and Washington, the programme is densely woven but worth unraveling - a tale of treaties twisted and of governments armed to the testh and lying through them. Illustrating the hersh economics of CHANNEL 4

2.30 Vietnam: The Ten Thousand Day War. The third part of the

dian-made series on the

causes and occurrences of the

battles fought at Dien Bien Phu in the North-West highlands of

the country. It was here that General Vo Nguyan Glap's troops surrounded 10,000

French troops and, after a 55-day slege, forced them to surrander.

surrander.
3.00 A Day in the Gerden.

and transport supplies as well as buying 2,500 tonnes of wheat from the European Community.

According to the Overseas Development Agency, 15,000 tonnes of food from Britain arrived in the port of Assab yesterday. Because cargo hand-ling facilities are not geared to deal with a massive influx of supplies, grain is believed to be on board ships waiting to get into port. Some grain is also in warehouses because there is not sufficient transport to take it to famine areas.

A Red Cross spokesman said

that although Assab is con-gested the Ethiopian Government had started an airlift using fuel supplied by the United

Britain hopes to use the Hercules to take food, lorries, spare parts and medical supplies to Ethiopia and to fly grain to famine areas, which is more controversial. Until now, Ethiopia has severely restricted the movement of foreign aircraft.

Britain and the EEC face strong criticism for the limited aid supplied. Dr Charles Elliott. former director of Christian Aid, has accused Britain and the US of withholding aid in the hope that a disastrous famine would bring down the Marxist Government

Dr Elliot said: "There is no doubt in my mind that if the regime in Ethiopia had been of a different colour. British and American governments would have been involved in a dialogue to do something before the disaster happened. The idea of sending Hercules

ircraft with food is ridiculous. It is too late and adequate supplies are not going to get to the right places in time."

in the Lords today, the Liberal peer, Lord Avebury, will ask the Government whether it will provide food and medical aid for areas controlled by the Tigre and Eritrean rebel movements as well as those controlled by the "Ethiopian military Government".

Workers at Felixstowe, Britain's biggest container port, were yesterday urged to black plans to stockpile thousands of tons of surplus wheat in dockside sheds. The Intervention Board wants to store the grain - part of a record 25 million tonne British harvest for up to two years.

Australia is also considering an airlift to Ethiopia, Mr Bill

Soviet health care in need of a cure

power. Soviet citizens interviewed on televison after Constitution Day earlier this month dutifully thanked the Kremlin for providing free and universal health care as well as free education and

but some Western visitors to Russian hospitals have been surprised to find them crowded, old fashioned, poorly equipped and even drity, and the Soviet press has been increasingly exposing the been increasingly exposing the same defects.

Soviet medicine is renowned in certain areas, such as eye surgery. But even Izvestiya has disclosed that ordinary Russians seeking routine health care face long queues, indifferent medical staff and shoddy facilities. Izvestiva visited one hospital near Makhachala on the Caspian Sea and found that the chief surgeon had resigned in disgust. It was not hard to see why.

"I was amazed by the shabbiness of the place, the small and uncomfrotable rooms". Izvestiya's reporter said: "I saw orderlies washing bed linen in a trough, and the toilets and baths were out of order because there was no running water."
Boris Mozhaev, a Soviet

author, gave an equally remarkable account in the Literary Gazette of what happened when he broke his arm ski-ing. The arm was set in plaster rather than put in a splint for reasons of "administrative convenience": the doctors could sign him out after five days instead of having to keep him in hospital for several weeks.

Mozhaev was in agony, and when the plaster was removed his arm had swollen alarm-ingly and there was blood dripping from his ampit. The doctors refused him proper bandages because they were economizing and his arm became twisted as the bones set wrongly. Mozhaev ap-pealed to another doctor for help, but was told to put up with it. "What's the matter? You don't want to be a ballet dancer, do you?" the doctor asked coldly. "Can't you write with a twisted arm?" Finally Mozhaev went in

desperation to a famous clinic at Tallin in Estonia, where his bones were set properly. But

edly reminded recently that to see that the corridors were

the Soviet health system is second to none, and is one of the main benefits of Soviet tation. Part of the problem is that medicine is not a highly regarded profession in Russia

and doctors, the majority women, are badly paid and poorly trained.
Drugs such as antibiotics are in very short supply, and disposable syringes or even sticking plasters are almost unknown.

Not surprisingly, Russians are increasingly turning to alternative medicine, folk remedies and occult healers, rather than run the gaunlet of a state system which involves bribing doctors to jump the queue and gain access to scarce drugs...

Some medical experts approve of the unofficial healers, but others such as Acade mician Uglov of Lenigrad favour reform of the state medical service.

and the state of t

िस्माम:

In an article in *Izvestiya* entitled "Thoughts on the profession of doctor", praised the pre-revolutionary medical profession, a rare admission that health care existed under Tsarism, for serving the nation selflessly by treating patients in remote country

Soviet medicine has scored notable success in recent times. For example the Kur gan Institute of Experimental Traumatology has developed new methods of healing bone fractures. One of the most celebrated Kurgan surgeons, Dr Yakov Vytebsky, has developed a new method of diagnosing stomach cancer by analysing gastric juices, and has pioneered stomach oper-

But there is criticism of the medical authorities for not applying such discoveries to the system as a whole, and for allowing specialists to flourish while health care for the average citizen deteriorates.
"What will our grandchildren be like?" the Literary

Gazette asked recently, criticizing the state of health of Soviet teenagers, which is said did not meet the requirements of either modern industry or the armed forces. "It is time we changed our attitude to health" the paper said.
"Health is not one's private property, it belongs to the
